Whether you've mastered the basics of Final Cut Pro and want to take your skills to the next level, or if you're a video editor new to Final Cut Pro and looking to put your own system together, this book is for you. Written by chawla, a Final Cut Pro guru and veteran moderator on 2-Pop/Creative Cow, this book covers the interface basics and workflow but goes beyond to address intermediate techniques and timesaving tips for professional results. Roberts does not assume you have an IT staff on hand and therefore goes into crucial issues of set up, configuration, consumer advice on hardware purchasing, and troubleshooting. Equally valuable is coverage of working with formats such as standard definition, uncompressed, and FireWire DV.

Slides for Students Gary D. Fisk, 2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. *Slides for Students* does just that. *Slides for Students* is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, *Slides for Students* discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.
