## **How We Saved Texas Prison Chaplaincy 2011**

Michael G. Maness, 2015-10-16 As Maness so forcefully presents, religion is truly the greatest source for change in human history, and our staff chaplains facilitate that. Likewise, we came to see there would be little true cost savings, in that some staffer would have to take care religion in prison its a right after all and manage the good volunteers. Jerry Madden, Senior Fellow Right on Crime [RightOnCrime.org](http://RightOnCrime.org) House Committee on Corrections Chairman 2011-12 It seemed like all was lost. . . . Dr. Keith Bellamy Senior Minister, Woodville Church of Christ TDCJ Certified Volunteer Chaplain 15-plus years Take a ride through Maness book and learn firsthand about reducing crime, rehabilitating lives, making our streets safer, and bringing hope to the least, the last and the lost just like Jesus commanded. The chaplain of the prison brings hope and light in what can be a dark and stressful place, all the more reason we need them. Carol S. Vance Former Chairman, Texas Board of Criminal Justice Harris County District Attorney 1966-79 Every TDCJ chaplain and every chaplaincy manager owe the existence of their jobs to the efforts of a few unique individuals who rallied many to seek help from Texas senators and representatives. Frank Graham, Founder Chapel of Hope.org Politically, the TDCJ chaplaincy was doomed. God used the courage of one man to turn that situation around. Thank you, Chaplain Michael Maness, for preserving this magnificent piece of important religious history. Dr. Paul W. Carlin, LBT, Ph. D.

**Just Security in an Undergoverned World** William Durch, Joris Larik, Richard Ponzio, 2018-01-19 Just Security in an Undergoverned World examines how humankind can manage global problems to achieve both security and justice in an age of antithesis. Global connectivity is increasing, visibly and invisibly in trade, finance, culture, and information helping to spur economic growth, technological advance, and greater understanding and freedom, but global disconnects are growing as well. Ubiquitous electronics rely on high-value minerals scraped from the earth by miners kept poor by corruption and war. People abandon burning states for the often indifferent welcome of wealthier lands whose people, in turn, draw into themselves. Humanity's very success, underwritten in large part by lighting up gigatons of long-buried carbon for 200 years, now threatens humanity's future. The global governance institutions established after World War II to manage global threats, especially the twin scourges of war and poverty, have expanded in

reach and impact, while paradoxically losing the political support of some of their wealthiest and most powerful members. Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies. This volume argues, however, that a properly mandated, managed, and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and pandemic disease that transcend borders and the capacities of individual actors. It offers just security as a new framework for charing innovating solutions and strategies for effective and essential global governance.

**Data and Goliath: The Hidden Battles to Collect Your Data and Control Your World** Bruce

Schneier, 2015-03-02 "Bruce Schneier's amazing book is the best overview of privacy and security ever written."—Clay Shirky "Bruce Schneier's amazing book is the best overview of privacy and security ever written."—Clay Shirky Your cell phone provider tracks your location and knows who's with you. Your online and in-store purchasing patterns are recorded, and reveal if you're unemployed, sick, or pregnant. Your e-mails and texts expose your intimate and casual friends. Google knows what you're thinking because it saves your private searches. Facebook can determine your sexual orientation without you ever mentioning it. The powers that surveil us do more than simply store this information. Corporations use surveillance to manipulate not only the news articles and advertisements we each see, but also the prices

we're offered. Governments use surveillance to discriminate, censor, chill free speech, and put people in danger worldwide. And both sides share this information with each other or, even worse, lose it to cybercriminals in huge data breaches. Much of this is voluntary: we cooperate with corporate surveillance because it promises us convenience, and we submit to government surveillance because it promises us protection. The result is a mass surveillance society of our own making. But have we given up more than we've gained? In *Data and Goliath*, security expert Bruce Schneier offers another path, one that values both security and privacy. He brings his bestseller up-to-date with a new preface covering the latest developments, and then shows us exactly what we can do to reform government surveillance programs, shake up surveillance-based business models, and protect our individual privacy. You'll never look at your phone, your computer, your credit cards, or even your car in the same way again.

**Safety Net** Daniel Mulino, 2022-08-16 Economist and Labor MP Daniel Mulino explains how the Australian welfare state was created - and what we need to do to protect and extend it The welfare state is one of the crowning achievements of the twentieth century, giving citizens access to healthcare, pensions, disability and unemployment benefits. This unprecedented expansion of the state was a product of the postwar period of the late 1940s, when governments ramped up investment in this grand safety net. By the 1970s, half of all government spending went towards social-welfare programs, but today the welfare state

stands at a crossroads, beset by both political opposition and funding pressures as the population ages. Australian Labor Party MP Daniel Mulino provides a sweeping account of the history of welfare in Australia and abroad, from Bismarckian Germany to present-day Canberra. In this deeply researched and lucid account, Mulino looks to the challenges facing today's welfare state and reflects on what steps must be taken to protect and extend it. 'Knowledge and thoughtful analysis applied to crucial policy questions. Reassuring and inspiring after the federal election.' -Ross Garnaut 'A timely and comprehensive review of the history and future of the welfare state, and whether Australia's safety net is fit-for-purpose for the risks and challenges ahead' -Peter Dawkins, former vice-chancellor of Victoria University and former director of the Melbourne Institute 'A deep reflection on the contemporary management of social risk in democratic systems. This thoughtful and challenging book is essential reading for anyone concerned with the task of ensuring our social safety net is sustainable and adapted to the modern era.' -Emma Dawson, executive director of Per Capita 'Daniel Mulino chronicles in impressive, readable detail the global progress that societies have made in developing shock-absorbing social policies, and proposes further development in the footsteps of Australia's greatest social and economic reformers.' -Peter Harris, former chairman of the Australian Productivity Commission 'Social policies need to be shaped by policymakers as well as by scholars versed in economics and history. MP

Daniel Mulino applies all these skills in fashioning this monumental work. It's all there: a complete set of practical experience-based recommendations for every kind of social insurance. -Professor Peter H. Lindert, University of California - Davis and author of Making Social Spending Work

**Design Professional's Guide to Zero Net Energy Buildings** Charles Eley, 2016-11-15 In the Design Professional's Guide to Zero Net Energy Buildings, Charles Eley draws from over 40 years of his own experience, and interviews with other industry experts, to lay out the principles for achieving zero net energy (ZNE) buildings, which produce as much energy as they use over the course of a year. Eley emphasizes the importance of building energy use in achieving a sustainable future; describes how building energy use can be minimized through smart design and energy efficiency technologies; and presents practical information on how to incorporate renewable energy technologies to meet the lowered energy needs. The book shows the reader through examples and explanations that these solutions are viable and cost effective.

Water-Wise: Smart irrigation strategies for Africa Malabo Montpellier Panel, 2018-12-18 The report begins with an overview of the challenges on agricultural systems to make more food available and accessible and lays out the potential of irrigation to make agriculture more productive, efficient and profitable for

smallholder farmers. A discussion on the potential to expand irrigation across Africa and barriers to uptake including an analysis of the inherent risks and desired outcomes of irrigation forms the next section. The report reviews the traditional and new, innovative smallscale and large-scale irrigation approaches and technologies that have been implemented in Africa, followed by an analysis of the experiences of six African countries that have been particularly innovative and successful in terms of their institutional and policy design for irrigation. The report closes by drawing some key lessons and offering nine recommendations for actions by African governments and the private sector.

Law and Religion in the 21st Century Rinaldo Cristofori, Silvio Ferrari, 2016-04-15 This book brings together leading international scholars of law and religion to provide an overview of current issues in State-religion relations. The first part of the collection offers a picture of recent developments in key countries and regions. The second part is focused on Europe and, in particular, on the Nordic States and the post-communist countries where State-religion systems have undergone most profound change. The third and final part is devoted to four issues that are currently debated all over the world: the relations between freedom of expression and freedom of religion; proselytism and the right to change religion; the religious symbols; and the legal status of Islam in Europe and Canada. The work will be a valuable resource for academics, students and policy-makers with an interest in the

interaction between law and religion.

### **Water System Science and Policy Interfacing**

Philippe Quevauviller, 2009-11-20 Recent discussions among scientists and policy-makers have highlighted that knowledge generated by many research and demonstration projects is not reaching policymakers in an efficient way. Conversely, the consideration of research results by the policy making community is not straightforward, and difficulties arise in integrating the latest research developments in legislation. The difficulty is enhanced by the fact that the policy-making community is not defining its role as client sufficiently well and the dialogue and communication channels are far from ideal to ensure an efficient flow of information. An increasing number of experts consider that improvements could be achieved through the development of a science-policy interface so that R&D results are synthesised in a way to efficiently feed policy implementation and that short, medium and long term research needs may be identified. This book examines the issue of integrating science into policy, with an emphasis on water system knowledge and related policies. An important feature of the book is the discussion of science-policy interfacing needs, illustrated by examples from authors from different countries in relation to water system management. This publication is timely in that the science-policy interfacing is now identified as a key challenge

worldwide with regard to integrated water resource management, and therefore the book will be of great interest to scientists, water managers and stakeholders. Readers will also benefit from a better understanding of the needs, benefits and drawbacks of an established transfer mechanism of scientific outputs to policies.

**International Law and Chemical, Biological, Radio-Nuclear (CBRN) Events** Andreas de Guttry, Micaela Frulli, Federico Casolari, Ludovica Poli, 2022-03-21 The volume investigates to what extent the international and European Union legal frameworks applicable to Chemical, Biological and Radio-Nuclear (CBRN) events are adequate to face current challenges. It is innovative in many aspects: it adopts an all-hazard approach to CBRN risks, focusing on events of intentional, accidental and natural origin; it explores international obligations according to the four phases of the emergency cycle, including prevention, preparedness, response and recovery; and it covers horizontal issues such as protection of human rights, international environmental law, new technologies, the role of private actors, as well as enforcement mechanisms and remedies available to victims. The book thus offers a new way of looking at the applicable rules of international law in this field.

**Paving Paradise** Craig Pittman, Matthew Waite, 2010-05-25 Florida possesses more wetlands than any other state except Alaska, yet since 1990 more than 84,000 acres have been lost to development despite presidential pledges to protect them. How and why the state's wetlands are

continuing to disappear is the subject of *Paving Paradise*. Journalists Craig Pittman and Matthew Waite spent nearly four years investigating the political expedience, corruption, and negligence on the part of federal and state agencies that led to a failure to enforce regulations on developers. They traveled throughout the state, interviewed hundreds of people, dug through thousands of documents, and analyzed satellite imagery to identify former wetlands that were now houses, stores, and parking lots. Exposing the unseen environmental consequences of rampant sprawl, Pittman and Waite explain how wetland protection creates the illusion of environmental protection while doing little to stem the tide of destruction.

*Hope in Hell* Jonathon Porritt, 2021-04-06 A book for facing head-on—and averting—the oncoming global climate change disaster, by inspiring people to move from general concern and passive support to active protagonists for change. Climate change is our era's defining issue. We know, beyond reasonable doubt, that climate change is accelerating. To face a challenge greater than humanity has ever seen before, we must also accelerate ourselves, by summoning a sense of urgency, courage, and shared effort to match it. Jonathan Porritt's *Hope In Hell* is meant to do

just that, by confronting the issue directly and strongly, but also with inspiration and hope; it's not too late to avoid the worst consequences of climate change. Ultimately optimistic despite the dire challenge presented to the world, Porritt explores current science and new technologies, mobilization of younger people and political action, and encouraging intergenerational solidarity as older generations learn their own responsibilities in creating a better world for their successors.

Developing and Securing the Cloud Bhavani Thuraisingham, 2013-10-28 Although the use of cloud computing platforms and applications has expanded rapidly, most books on the subject focus on high-level concepts. There has long been a need for a book that provides detailed guidance on how to develop secure clouds. Filling this void, Developing and Securing the Cloud provides a comprehensive overview of cloud computing technology. Supplying step-by-step instruction on how to develop and secure cloud computing platforms and web services, it includes an easy-to-understand, basic-level overview of cloud computing and its supporting technologies. Presenting a framework for secure cloud computing development, the book describes supporting technologies for the cloud such as web services and security. It details the various layers of the cloud computing framework, including the virtual machine monitor and hypervisor, cloud data storage, cloud data management, and virtual network monitor. It also provides several examples of cloud products and prototypes, including

private, public, and U.S. government clouds. Reviewing recent developments in cloud computing, the book illustrates the essential concepts, issues, and challenges in developing and securing today's cloud computing platforms and applications. It also examines prototypes built on experimental cloud computing systems that the author and her team have developed at the University of Texas at Dallas. This diverse reference is suitable for those in industry, government, and academia. Technologists will develop the understanding required to select the appropriate tools for particular cloud applications. Developers will discover alternative designs for cloud development, and managers will understand if it's best to build their own clouds or contract them out.

**Protecting the Health of the Poor** Abraar Karan, Geeta Sodhi, 2015-12-15 Nowhere is the injustice of the global distribution of income and wealth more palpable than in health. While the world's affluent spend fortunes on the most trifling treatments, poor people's lives are ruined and often cut short prematurely by challenges that could easily be overcome at low cost: childbirth, diarrhoea, malnutrition, malaria, HIV/AIDS, measles, pneumonia. Millions are avoidably dying from such causes each year and billions of lives avoidably blighted by these diseases of poverty. Drawing on in-depth empirical research spanning Asia, Latin America, and Africa, this path-breaking collection offers fresh perspectives from critically engaged scholars. *Protecting the Health of the Poor* presents a call

and a vision for unified efforts across geographies, levels and sectors to make the right to health truly universal.
