*Report on Police Field Procedures* Police Procedures Advisory Group,1967 This report describes police field procedures and their relevant supporting activities. Each of the thirteen sections describes standard practices which modern police departments should now be employing. Each section suggests new procedures which have been field tested and which can be adopted by police departments if the procedures appear to meet local conditions. There are pilot projects or other tests of novel procedures proposed. While these are promising, they have not yet been sufficiently tried out and evaluated to enable assessment of their general merit. In addition, the sections may explore general problems and discuss broad issues relevant to the successful application of field procedures and the effectiveness of law enforcement itself.

*A Police Field Manual for Managing Multi-Risk Incidents* ,2016-12-03 This publication is to inform the public, in a professional way, how police officers do their work, and, to offer practical risk-reducing guidelines for the aspiring police officer and leader. Its focus is on how police officers manage multi-risk incidents during calls-for-service or encounters in the field and on the street.

**Police Chief** Daniel S. McDevitt,Mark W. Field,2010 Based on over seventy years of extensive experience at the federal, state, county, and municipal level, the authors draw on current knowledge to provide a thorough overview of the realities of the position of chief of police. The book provides practical, common sense advice for preparing oneself for the position, successfully negotiating the application and screening process, and competing in various selection procedures including the assessment center. The book then addresses negotiating an employee compensation and benefits agreement, and once the position is offered, how to prepare for your first days as a chief of police. It also furnishes sound advice intended to help the chief retain his physical, emotional and ethical health while leading a professional law enforcement agency. Chapter topics include advice on taking control of the police department and setting the agenda in place, emphasizing the extreme importance of role modeling the behavior that the chief expects of department personnel, the requirements for a productive relationship with the command staff, exploring the multifaceted relationship a chief has with his employees, and guidelines for managing relations with collective bargaining units, schools and businesses, and the various elements of the community. It also examines establishing and maintaining your relationship with your superior (whether that is a city manager or elected official), developing and managing a budget, managing the disciplinary process, how to respond when things go wrong (to include officer-involved shootings and other misconduct), and building a good working relationship with the media. Each chapter concludes with a Points to Remember section that will be beneficial to the new police chief in order to avoid mistakes and build on the body of knowledge that constitutes professional law enforcement leadership. There are several sample policies, procedures, and forms included in the book that will prove very useful for the new or veteran chief. This resource will be invaluable to all prospective and current chiefs of police, law enforcement professionals, policymakers, and police academics.

*Letters and Documents Regarding the Chicago Police Department's New Field Contact Form* Minor K. Wilson, Marvin E. Aspen, Chicago (Ill.). Police Department. Patrol Division, 1966 Letter from Minor K. Wilson, Chicago Police Department aide and legal coordinator, to Dean Terrill, rebutting claim that establishing a field contact form violates citizens' constitutional rights; Patrol Division special order no. 66-2, a memorandum detailing procedures for using the field contact form; copy of the Chicago Police Patrol Division's field contact card; transcript of response offered on WBBM-TV's editorial segment Standpoint by Marvin Aspen, assistant corporation counsel, to criticism of field contact procedures.

**Managing Criminal Investigations** Ilene Greenberg, Robert Wasserman, National Institute of Law Enforcement and Criminal Justice. Office of Development, Testing, and Dissemination, 1979 Drawing upon the MCI (Managing Criminal Investigations) field test experience and available literature, this report outlines a range of options for better management of the investigative function. The five MCI model components are the initial investigation, case screening, management of the continuing investigation, police-prosecutor relations, and an investigative monitoring system. Although preliminary findings indicate that the field test achievements appear to be modest along each of three valued dimensions--resources saved, investigative efficiency, and investigative effectiveness--the program did successfully construct a framework for goal achievement in the investigative process. Thus, MCI should be viewed as ongoing and extending to the development of the kinds of investigative functions and strategies that have direct implications for efficiency. Conditions for successful implementation of MCI include commitment from top management, training, a call-screening system, a management information system, the services of a policy analyst, and assessment of the cost implications of MCI. Due to the field test experience, the program design has been revised. Elements added to improve allocation efficiency include an expanded role for the patrol officer, a special reporting form, a call-screening system intended to increase uncommitted patrol time, and new procedures for patrol supervisors. For case screening, the elements are a system for screening out predictable 'unsolvable' cases, flexible screening criteria, a screening model that reflects local investigative priorities, and more. Investigation efficiency also is dependent on changes in police department policy outside the investigative function, such as personnel and promotion policies. Suggested policy

revisions and guidelines and procedures for evaluating an MCI program are given.

*Tactical Perfection For Street Cops* Steve Albrecht,2009-04-01 The key to police officer survival is doing the right things, the right way, under extreme stress, every time. Tactical Perfection for Street Cops teaches cops the lifesaving value of perfect repetition during any field situation, stop, radio call or encounter. Police training expert Steve Albrecht shares the secrets of veteran cops who have mastered streetwise ways to handle the variety of situations they face every shift: ringing alarms, domestic violence calls, loud parties, pursued felons, and the drugged, the ganged-up, the violent and the mentally ill. Albrecht breaks down the work into four categories: The Stops—Performing traffic stops, pedestrian field interviews, street gang contacts and pursuits in the patrol car and on foot. The Calls—Handling calls for domestic violence, robbery, burglary, prowler alerts and the latest and most tragic: school and workplace violence. Special Arrests—Dealing with hard-core professional crooks, transients, substance abusers and the mentally ill. Tools of the Trade—Searching, handcuffing and transporting suspects, and using nonlethal and lethal force. In police work, not focusing on the little details can be deadly. Learn from the street and beat knowledge of some of the most experienced police officers in the country and maximize your safety and success every time you hit the streets

*Managing the Investigative Unit* Daniel S. McDevitt,2005 The strategies and techniques that you will read about in this book will help make managing the investigative unit a rewarding experience. Many of these techniques and strategies were learned through trial and error. It begins with a look at the various elements of the investigative process. Organization of the investigative unit, whether it is a general assignment or highly specialized unit, is discussed as well as how to determine proper allocation of resources. Selection of investigative personnel is discussed at length, and selection strategies and a structured selection process are outlined very clearly. Methods of developing new investigators as well as mechanisms to train patrol personnel for potential assignment to investigations are also covered. The book will be useful for patrol officers or detectives who are interested in preparing themselves for supervisory or management positions. Those persons already in these positions will also find the book very useful.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved
