Selected Areas in Cryptography Ali Miri, Serge Vaudenay, 2012-02-21 This book constitutes the thoroughly refereed post-conference proceedings of the 18th Annual International Workshop on Selected Areas in Cryptography, SAC 2011, held in Toronto, Canada in August 2011. The 23 revised full papers presented together with 2 invited papers were carefully reviewed and selected from 92 submissions. The papers are organized in topical sections on cryptanalysis of hash functions, security in clouds, bits and randomness, cryptanalysis of ciphers, cryptanalysis of public-key cryptography, cipher implementation, new designs and mathematical aspects of applied cryptography.

Information Security and Privacy Josef Pieprzyk, Suriadi Suriadi, 2017-05-26 The two volume set LNCS 10342 and 10343 constitutes the refereed Proceedings of the 22nd Australasian Conference on Information Security and Privacy, ACISP 2017, held in Auckland, New Zealand, in July 2017. The 45 revised full papers, 2 keynotes, 8 invited papers and 10 short papers presented in this double volume, were carefully revised and selected from 150 submissions. The papers of Part I (LNCS 10342) are organized in topical sections on public key encryption; attribute-based encryption; identity-based encryption; searchable encryption; cryptanalysis; digital signatures. The papers of Part II (LNCS 10343) are organized in topical sections on symmetric cryptography; software security; network security; malware detection; privacy; authentication; elliptic curve cryptography.

Nothing to Hide Daniel J. Solove, 2011-05-31 If you've got nothing to hide, many people say, you shouldn't worry about government surveillance. Others argue that we must sacrifice privacy for security. But as Daniel J. Solove argues in this important book, these arguments and many others are flawed. They are based on mistaken views about what it means to protect privacy and the costs and benefits of doing so. The debate between privacy and security has been framed incorrectly as a zero-sum game in which we are forced to choose between one value and the other. Why can't we have both? In this concise and accessible book, Solove exposes the fallacies of many pro-security arguments that have skewed law and policy to favor security at the expense of privacy. Protecting privacy isn't fatal to security measures; it merely involves adequate oversight and regulation. Solove traces the history of the privacy-security debate from the Revolution to the present day. He explains how the law protects privacy and examines concerns with new technologies. He then points out the failings of our current system and offers specific remedies. *Nothing to Hide* makes a powerful and compelling case for reaching a better balance between privacy and security and reveals why doing so is essential to protect our freedom and democracy--Jacket.

Structural Crisis and Institutional Change in Modern Capitalism Bruno Amable, 2017-03-16 This book analyses the evolution of the French model of capitalism in relation to the instability of socio-political compromises. In the 2010s, France was in a situation of systemic crisis, namely, the impossibility for political leadership to find a strategy of institutional change, or more generally a model of capitalism, that could gather sufficient social and political support. This book analyses the various attempts at reforming the French model since the 1980s, when the left tried briefly to orient the French political economy in a social-democratic/socialist direction before changing course and opting for a more orthodox macroeconomic and structural policy direction. The attempts of governments of the right to implement a radically neo-liberal structural policy also failed in the face of a significant social opposition. The enduring French systemic crisis is the expression of contradictions between the economic policies implemented by the successive left and right governments, and the existence of a dominant, social bloc, that is, a coalition of social groups that would politically support the dominant political strategy. Since 1978, both the right and the left have failed to find a solution to the contradictions between the policies they implemented and the expectations of their respective social bases, which are themselves inhabited by tensions and contradictions that evolve with the structural reforms that gradually transformed French capitalism.

Deadline Robert Samet, 2019-07-08 Since 2006, Venezuela has had the highest homicide rate in South America and one of the highest levels of gun violence in the world. Former president Hugo Chávez, who died in 2013, downplayed the extent of violent crime and instead emphasized rehabilitation. His successor, President Nicolás Maduro, took the opposite approach, declaring an all-

out war on crime (mano dura). What accounts for this drastic shift toward more punitive measures? In *Deadline*, anthropologist Robert Samet answers this question by focusing on the relationship between populism, the press, and what he calls “the will to security.” Drawing on nearly a decade of ethnographic research alongside journalists on the Caracas crime beat, he shows how the media shaped the politics of security from the ground up. Paradoxically, Venezuela’s punitive turn was not the product of dictatorship, but rather an outgrowth of practices and institutions normally associated with democracy. Samet reckons with this apparent contradiction by exploring the circulation of extralegal denuncias (accusations) by crime journalists, editors, sources, and audiences. Denuncias are a form of public shaming or exposé that channels popular anger against the powers that be. By showing how denuncias mobilize dissent, *Deadline* weaves a much larger tale about the relationship between the press, popular outrage, and the politics of security in the twenty-first century.

Public Opinion and Counter-Terrorism Michael Lister, 2023-05-12 This book examines the ways in which the views of the public inhabit the counter-terrorism policy space, with a focus on the UK case. Drawing insights from Critical Terrorism Studies, Critical Security Studies and studies of public opinion, the book develops an argument that the relationship between public opinion is complex, iterative and mutually instantiating. Rather than public opinion and counter-terrorism policy existing in a simple, uni-directional causal relationship, the book argues that whilst counter-terrorism policy actors are informed by public opinion, in important ways they also construct that very opinion. This argument is made through an empirical analysis of UK counter-terrorism policy. Drawing on primary research interviews with key counter-terrorism policy actors, and security professionals, as well as original analysis of parliamentary debates, the book demonstrates that rather than UK counter- terrorism politics being closed and elite-driven, there exists a complex, dialectical relationship between public opinion and both the making and the implementing of counter-terrorism policy. This book will be of much interest to students of critical terrorism studies, counter-terrorism, security studies, British politics and communication studies.

Terrorism, Risk and the City Jon Coaffee, 2017-10-24 The development of defensive strategies encompassing the fortification and privatization of the city has attracted significant attention during recent years, and has become particularly relevant in the aftermath of September 11th. Dealing with issues of risk, security and the spatial restructuring of contemporary western cities, this book examines how the perceived risk of terrorist attack led to changes in the physical form and institutional infrastructure of the city of London during the 1990s when the city was a prime terrorist target. The book analyses how the various formal and informal strategies adopted in the City attempted to reduce both the physical and financial risk of terrorism. This was undertaken through a series of place-specific security initiatives and risk management policies which led to increased fortification, a substantial rise in terrorism insurance premiums, and, changing institutional relations

at a variety of spatial scales. It also argues that the security measures deployed were developed not in terms of an anti-terrorist effort, but in relation to the unintended by-products of these approaches such as crime reduction and enhanced traffic management capabilities.

Terrorism, Risk and the Global City Jon Coaffee, 2016-03-16 First published in 2003, this account of the anti-terrorist measures of London's financial district and the changes in urban security after 9/11 has been revised to take into account developments in counter-terrorist security and management, particularly after the terrorist attack in London on July 7th 2005. It makes a valuable addition to the current debate on terrorism and the new security challenges facing Western nations. Drawing on the post-9/11 academic and policy literature on how terrorism is reshaping the contemporary city, this book explores the changing nature of the terrorist threat against global cities in terms of tactics and targeting, and the challenge of developing city-wide managerial measures and strategies. Also addressed is the way in which London is leading the way in developing best practice in counter-terrorist design and management, and how such practice is being internationalized.

The Battle for Eretz Yisrael Bernard J. Shapiro, 2011-10-14 From the sweet taste of victory to shattering betrayal, *The Battle for Eretz Yisrael* documents the years from 1992 to 2011 as Israel attempts to gain its identity. Rendering the full impact of the Israeli struggle, this analysis contains a collection of articles, political cartoons, maps, mementos, flyers, and poetry written and compiled by author Bernard J. Shapiro, the founder and chairman of the Freeman Center for Strategic Studies in Houston, Texas. The articles span nineteen years and include a wide range of topics related to the Israeli struggle. *The Battle for Eretz Yisrael* discusses Israeli, Jewish, and world history; Arab wars of extermination against Israel; military and strategic issues; Israeli political issues; US and Israeli relations; Islam; and Arab propaganda and media bias. A strong advocate for Israel for more than fifty years, Shapiro provides an insider's look at this historic and contemporary issue that affects people all over the world

Malware Data Science Joshua Saxe, Hillary Sanders, 2018-09-25 *Malware Data Science* explains how to identify, analyze, and classify large-scale malware using machine learning and data visualization. Security has become a big data problem. The growth rate of malware has accelerated to tens of millions of new files per year while our networks generate an ever-larger flood of security-relevant data each day. In order to defend against these advanced attacks, you'll need to know how to think like a data scientist. In *Malware Data Science*, security data scientist Joshua Saxe introduces machine learning, statistics, social network analysis, and data visualization, and shows you how to apply these methods to malware detection and analysis. You'll learn how to: - Analyze malware using

static analysis - Observe malware behavior using dynamic analysis - Identify adversary groups through shared code analysis - Catch 0-day vulnerabilities by building your own machine learning detector - Measure malware detector accuracy - Identify malware campaigns, trends, and relationships through data visualization Whether you're a malware analyst looking to add skills to your existing arsenal, or a data scientist interested in attack detection and threat intelligence, Malware Data Science will help you stay ahead of the curve.
