International Financial Statistics, June 2017 International Monetary Fund. Statistics Dept., 2017-05-31 This paper explores International Financial Statistics (IFS) that contains country tables for most IMF members, as well as for Anguilla, Aruba, the Central African Economic and Monetary Community (CEMAC), Curaçao, the currency union of Curaçao and Sint Maarten, the Eastern Caribbean Currency Union (ECCU), the euro area, Montserrat, the former Netherlands Antilles, Sint Maarten, the West African Economic Monetary Union (WAEMU), West Bank and Gaza, and some non-sovereign territorial entities for which statistics are provided internationally on a separate basis. All trade figures in IFS are converted from national currency values to US dollars and from US dollar values to national currency. The country tables, euro area tables, and world tables provide measures of effective exchange rates, compiled by the IMF's Research Department, Strategy, Policy, and Review Department, Statistics Department, and area departments. For manufactured goods, trade by type of good and market is distinguished in the database. So it is possible to allow at a disaggregated level for competition among various exporters in a foreign market (i.e., third-market competition) as well as that arising from bilateral trade links.
