- Take your virtualization skills to the next level thanks to Dell's hyper-converged infrastructure

Book Description

Virtualized systems are well established now, and their disparate components can be found bundled together in hyper-converged infrastructures, such as VxRail from Dell EMC. *Dell VxRail System Design and Best Practices* will take you, as a system architect or administrator, through the process of designing and protecting VxRail systems. While this book assumes a certain level of knowledge of VMware, vSphere 7.x, and vCenter Server, you'll get a thorough overview of VxRail's components, features, and architecture, as well as a breakdown of the benefits of this hyper-converged system. This guide will give you an in-depth understanding of VxRail, as well as plenty of practical examples and self-assessment questions along the way to help you plan and design every core component of a VxRail system – from vSAN storage policies to cluster expansion. It's no good having a great system if you lose everything when it breaks, so you'll spend some time examining advanced recovery options, such as VMware Site Recovery Manager and Veeam Backup and Replication. By the end of this book, you will have got to grips with Dell's hyper-converged VxRail offering, taking your virtualization proficiency to the next level. What you will learn

- Design vSAN storage policies
- Scale-out and expand clusters
- Design stretched clusters
- Protect your system with VMware Site Recovery Manager
- Discover how to configure EMC RecoverPoint for Virtual Machines
- Integrate Veeam Backup and Replication with VxRail
- Set up a vSAN 2-node cluster
- Who this

book is for This book is for system architects, system administrators, or consultants involved in planning and designing VxRail HCI. The reader is expected to have equivalent knowledge and administration experience with VMware vSphere 7. x and vCenter Server 7.x.

International Investment Protection of Global Banking and Finance Arif H. Ali, David L. Attanasio, 2021-09-14 Global banking and finance is a complex and specialized field with sector-specific investment forms, subject to distinctive legal and regulatory frameworks and unique types of political risk. This comprehensive guide to international investment protection in the finance and banking sector, written by acknowledged experts in the field of investor-State arbitration, provides the first in-depth discussion of how international investment law applies to investors and investments in the sector. Featuring expert guidance on the key legal protections for cross-border banking and finance investments, with complete and up-to-date coverage of investor-State cases, the analysis crystallizes a set of field-specific legal principles for the sector. In particular, the authors address the following practical aspects of investment protection in the banking and finance sector: how sector-specific forms of investment, such as loans and derivatives, impact the dispute resolution process; types of political risk that cross-border investments in the sector are likely to encounter; distinctive adverse sovereign measures that underlie disputes in the sector, including those from sovereign debt

defaults and banking sector bailouts; specific treaty provisions, such as jurisdictional carve-outs and targeted exclusions; remedies available for violations of international investment protections; how monetary damages may be assessed for injury to banking and finance sector investments; the scope of financial services chapters included in certain free trade agreements; the protections available under domestic foreign investment laws; and alternative sources of protection such as political risk insurance and investment contracts. International disputes practitioners and academics, in-house counsel in the finance and banking industries, and arbitrators addressing banking and finance disputes will welcome this book for its practical guidance. With strategies for investors as well as for sovereign States to navigate the intricacies of the investment protection system, the authors' comprehensive analysis will help ensure appropriate international protection for banking and finance sector investments, both when establishing investments and when resolving disputes. The book lays the groundwork for the future consolidation of international investment protection as a critical tool to manage the political risk confronting global banking and finance.

Enterprise Interoperability Matthieu Lauras, Martin Zelm, Bernard Archimède, Frédéric Benaben, Guy Doumeignats, 2015-01-20 Enterprises and organizations of any kind embedded in today's economic environment are deeply dependent on their ability to take part in collaborations. Consequently, it is strongly required for them to get actively involved for their own benefit in emerging, potentially opportunistic collaborative enterprise networks. The concept of "interoperability" has been defined by INTEROP-VLab as "The ability of an enterprise system or

application to interact with others at a low cost in a flexible approach". Consequently, interoperability of organizations appears as a major issue to succeed in building on the fly emerging enterprise networks. The International Conference on Interoperability for Enterprise Systems and Applications (I-ESA 2014) was held under the motto "interoperability for agility, resilience and plasticity of collaborations" on March 26-28, 2014 and organized by the Ecole des Mines d'Albi-Carmaux, France on behalf of the European Laboratory for Enterprise Interoperability (INTEROP-VLab). On March 24-25, co-located with the conference eight workshops and one doctoral symposium were held in four tracks complementing the program of the I-ESA'14 conference. The workshops and the doctoral symposium address areas of greatest current activity focusing on active discussions among the leading researchers in the area of Enterprise Interoperability. This part of the conference helps the community to operate effectively, building co-operative and supportive international links as well as providing new knowledge of on-going research to practitioners. The workshops and doctoral symposium aimed at exploiting new issues, challenges and solutions for Enterprise Interoperability (EI) and associated domains of innovation such as Smart Industry, Internet-Of-Things, Factories of the Future, EI Applications and Standardisation. These proceedings include the short papers from the I-ESA'14 workshops and the doctoral symposium. The book is split up into 9 sections, one for each workshop and one for the doctoral symposium. All sections were organized following four tracks: (1) EI and Future Internet / Factory of the Future; (2) EI Application Domains and IT; (3) EI Standards; (4) EI Doctoral Symposium. For each section, a workshop report is provided summarizing the content and the issues discussed during the sessions. The goal of the first track was to offer a discussion opportunity on interoperability issues regarding the use of Internet of Things on manufacturing environment (Workshops 1 and 3) on one hand, and regarding the potential of innovation derived

from the use of digital methods, architectures and services such as Smart Networks (Workshops 2 and 4) on the other hand. The second track focused on particular application domains that are looking for innovative solutions to support their strong collaborative needs. Thus, the track developed one workshop on the use of EI solution for Future City-Logistics (Workshop 5) and one on the use of EI solutions for Crisis / Disaster Management (Workshop 6). The third track studied the recent developments in EI standardization. Two workshops were dedicated to this issue. The first one has proposed to focus on the management of standardization (Workshop 8) and the second one has chosen to work on the new knowledge on standardization developments in the manufacturing service domain (Workshop 9). The last track, the doctoral symposium presented research results from selected dissertations. The session discussed EI knowledge issues, notably in terms of gathering through social networks or Internet of Things and of exploitation through innovative decision support systems.

Public/Private Interplay in Social Protection Martin Rein, Lee Rainwater, 2019-07-26 This accessible introductory text discusses how people in a pluralistic society such as ours can accept a common social ethic - a publicly justified morality. It presents analyses of the basic concepts, including justifications of liberty, harm to others, private property rights, distributive justice, environmental harms, help to others and offensive behaviour. Gaus acquaints the reader with the major figures in social philosophy - John Stuart Mill, Jeremy Bentham, Thomas Hobbes, John Locke, David Hume, John Rawls, David Gauthier, and Joel Feinberg - as well as recent communitarian philosophers. The basic technical aspects of social philosophy are also introduced: game theory, social choice theory, the ideas rational action, rational bargaining, and public goods. Throughout, helpful short examples and stories are used to illustrate the material.
