With boundless erudition and in delightfully clear prose, Surowiecki ranges across fields as diverse as popular culture, psychology, ant biology, behavioral economics, artificial intelligence, military history, and politics to show how this simple idea offers important lessons for how we live our lives, select our leaders, run our companies, and think about our world.

The Author Online Annik LaFarge, 2010-07-11 This brief manual, written by longtime publishing veteran Annik LaFarge, is designed to help you conceive, plan, and create your own unique presence online. It's not a technical book but instead focuses on the large questions that all writers must wrestle with as they plan their website: Who do you want to be online? What do you want to do there? And where do you start? A central premise of *The Author Online* is that anyone who can write a book is capable of building his own website. New technology and open source innovations make it easy, affordable, and even fun a creative act unto itself. But, like writing a book, it requires thoughtful and careful planning. Since leaving publishing LaFarge has helped many authors build successful websites, and this book is a brief primer on how any author -- fiction or non-fiction, adult or kids -- should begin the process of thinking about what to do online. *The Author Online* is filled with ideas, advice, and real-world examples. It also includes results from the first and only comprehensive survey of author websites and invaluable insights into:- the features readers look for on their favorite author websites- whether or not to blog or Twitter, and how to approach both in an authentic, effective way- when and how to work with designers and/or programmers- how to create a content plan for your site- how to use analytic data as an editorial tool
