Gawain, 2018-10-04 2100. The first interstellar journey to Alpha Centauri has been successful, and the next interstellar exploration wave is about to begin. While the UN and WARSEC (World's Agency for the Regulation of Space Exploration and Colonization) dispatch exploratory missions to Sirius, Tau Ceti, Epsilon Eridani and 61 Cygni, the space economy in Earth's orbit is booming. V-Space and V-Travel are getting their lion's share out of it and are planning their move to challenge WARSEC's current monopoly on interstellar travel. **EXPLORATION (2100-2106)** is the fourth book of the WARSEC Interstellar Series, a race to the stars between private corporations and the United Nations Organization. It is a grounded space odyssey for readers interested in geopolitics, science, and the future of mankind.

**Space Dog the Hero** Natalie Standiford, 1999 Space Dog, who is really an alien from the planet Queekrg, has a hard time pretending to be a watchdog when Roy's father goes away on a business trip.

*Ludwig the Space Dog*, 2018 Ludwig is a small dog who lives in a book with his friends. Everything in their world is made of paper.

Ludwig loves to read about different galaxies and planets, but how can he ever leave his book world to see the real universe? He tries everything he can think of to fly away and go exploring, but nothing works. And then something from another dimension crashes onto Ludwig's page . . . Put on your 3-D glasses and watch the world of Ludwig and his friends - both close to home and far away - come alive.

**Laika's Window** Kurt Caswell, 2018-09-18 Laika began her life as a stray dog on the streets of Moscow and died in 1957 aboard the Soviet satellite Sputnik II. Initially the USSR reported that Laika, the first animal to orbit the earth, had survived in space for seven days, providing valuable data that would make future manned space flight possible. People believed that Laika died a painless death as her oxygen ran out. Only in recent decades has the real story become public: Laika died after only a few hours in orbit when her capsule overheated. *Laika's Window* positions Laika as a long overdue hero for leading the way to human space exploration. Kurt Caswell examines Laika's life and death and the speculation surrounding both. Profiling the scientists behind Sputnik II, he studies the political climate driven by the Cold War and the Space Race that expedited the satellite's development. Through this intimate portrait of Laika, we begin to understand what the dog experienced in the days and hours before the launch, what she likely experienced during her last moments, and what her flight means to history and to humanity. While a few of the other space dog flights rival Laika's in endurance and technological advancements, Caswell argues that Laika's flight serves as a tipping point in space exploration "beyond which the dream of exploring nearby and distant planets opened into a kind of fever from which humanity has never recovered." Examining the depth of human empathy—what we are willing to risk and sacrifice in the name of scientific achievement and our exploration of the cosmos, and how politics and marketing can influence it—*Laika's Window* is also about our search to overcome loneliness

and the role animals play in our drive to look far beyond the earth for answers.

**Space Boy and His Dog** Dian Curtis Regan,2015-04-07 Niko may live on boring old Earth with his family, but he's always finding a new adventure. Using the spaceship that he built from a box in his backyard and a little imagination, he flies off into space with his robot, Radar, and his dog, Tag. The only one NOT invited is his sister Posh who keeps trying to insert herself into Niko's story. In this first mission, Niko and crew (and maybe also pesky Posh) fly to the moon in search of a lost cat. Illustrated in comic-book style and featuring easy-to-read text packed with humor, Space Boy and His Dog is Niko's first adventure, with two more books planned in the series.

**Animals in Space** Colin Burgess,Chris Dubbs,2007-01-24 This book is as a detailed, but highly readable and balanced account of the history of animal space flights carried out by all nations, but

principally the United States and the Soviet Union. It explores the ways in which animal high-altitude and space flight research impacted on space flight biomedicine and technology, and how the results - both successful and disappointing - allowed human beings to then undertake that same hazardous journey with far greater understanding and confidence. This complete and authoritative book will undoubtedly become the ultimate authority on animal space flights.

UNMADE Jerri O'Powell,2021-05-16 As the deep sea once gave rise to pirates, so also did deep space . The crew of The Twenty-Wun Stars is one such group of opportunistic souls. This exceptional group of serendipitous scoundrels find themselves under the leadership of Captain Jake Wade. The swaggering mojo at which this man moves thru life is literally infectious. Skirting the law where they can, looking for their next score to make payroll and trying to keep the ship online, is always the order of the day. UNMADE Many titles have laid out the lives of the past, present and future crew of the pirate ship The Twenty-Wun Stars. All of that has brought us here, where we get the formal introduction to Jake Jaimon Wade and his ascent to captain. In the middle of another firefight from a deal gone sideways, the crew of the Twenty-Wun Stars is aided by two ladies who are from 125 years in the future. In a mad scramble to escape a fight where they are outnumbered and outgunned the ship crashes out of hyperspace onto an undiscovered, isolated advanced steampunk planet. The two young ladies from the future are trying to find the woman who in their time has destroyed the CRW (Confederation of Republic

Worlds), killed or enslaved billions and driven humanity to the brink of destruction. It is their hope to find her before her march down the path of war ever begins. Having reason to believe at some point she was a member of the crew of the Twenty-Wun Stars, their trek thru time has brought them on board the ship the day it crashes onto a steampunk world deeply steeped in superhero/super-villain culture. As fate would have it, the crew of the Twenty-Wun Stars fits right in with their unique array of gifts and talents. While the ship is being repaired and the two ladies search for the woman who destroys the future, run-ins with the local super powered elite up the stakes that threaten the crew, the ship, this new world and ultimately the CRW. Over three thousand years after the final battle over the soul of mankind, between God, Satan, and Nefarious, destroys the earth, a new chapter begins. The resulting hyperspace blast from the earth's destruction flings the last of humanity into the furthest reaches of space on their surviving starships. Over 300 years passes before these star cast seeds of mankind reclaim the stars, and begin to find each other. The first of the new worlds to find each other and reconnect old humanity on new worlds, would eventually form The Confederation of Republic Worlds. This union would be marked with the erection of the Jara Timekeeping Tower on Jara Prime, broadcasting a synced time throughout the known universe. This is the Jara Era.

**Cosmonaut** Cathleen S. Lewis, 2023-08-08 How the public image of the Soviet cosmonaut was designed and reimagined over time In this book, Cathleen Lewis discusses how the public image of the Soviet cosmonaut developed beginning in the 1950s and the ways this icon has been reinterpreted throughout the years and in

contemporary Russia. Compiling material and cultural representations of the cosmonaut program, Lewis provides a new perspective on the story of Soviet spaceflight, highlighting how the government has celebrated figures such as Yuri Gagarin and Valentina Tereshkova through newspapers, radio, parades, monuments, museums, films, and even postage stamps and lapel pins. Lewis's analysis shows that during the Space Race, Nikita Khrushchev mobilized cosmonaut stories and images to symbolize the forward-looking Soviet state and distract from the costs of the Cold War. Public perceptions shifted after the first Soviet spaceflight fatality and failure to reach the Moon, yet cosmonaut imagery was still effective propaganda, evolving through the USSR's collapse in 1991 and seen today in Vladimir Putin's government cooperation for a film on the 1985 rescue of the Salyut 7 space station. Looking closely at the process through which Russians continue to reexamine their past, Lewis argues that the cultural memory of spaceflight remains especially potent among other collective Soviet memories.
