**Corpus-Based Approaches to English Language Teaching** Mari Carmen Campoy,Begona Belles-Fortuno,Maria Lluisa Gea-Valor,2010-06-07 Corpus-Based Approaches to ELT presents a compilation of research exploring different ways to apply corpus-based and corpus-informed approaches to English language teaching. Starting with an overview of research in the field of corpus linguistics and language teaching, various scenarios including academic and professional settings, as well as English as International Language, are described. Corpus-Based Approaches to ELT goes on to put forward several chapters focusing on error analysis using learner corpora and comparable native speaker corpora. Some of these chapters use translations and their original sources, while others compare the production of learners from different L1 in multilingual learner corpora. Also presented are new tools for corpus processing: a query program for parallel corpora, and the provision of tools to implement pedagogical annotation. The last section discuss the challenges and opportunities that multilayered and multimodal corpora may pose to corpus linguistic investigation. This book will be indispensable to those teaching in higher education and wishing to develop corpus-based approaches, as well as researchers in the field of English Language Teaching.

**Encyclopedia of Language Development** Patricia J. Brooks,Vera Kempe,2014-03-28 The progression from newborn to sophisticated language user in just a few short years is often described as wonderful and miraculous. What are the

biological, cognitive, and social underpinnings of this miracle? What major language development milestones occur in infancy? What methodologies do researchers employ in studying this progression? Why do some become adept at multiple languages while others face a lifelong struggle with just one? What accounts for declines in language proficiency, and how might such declines be moderated? Despite an abundance of textbooks, specialized monographs, and a couple of academic handbooks, there has been no encyclopedic reference work in this area--until now. The Encyclopedia of Language Development covers the breadth of theory and research on language development from birth through adulthood, as well as their practical application. Features: This affordable A-to-Z reference includes 200 articles that address such topic areas as theories and research tradition; biological perspectives; cognitive perspectives; family, peer, and social influences; bilingualism; special populations and disorders; and more. All articles (signed and authored by key figures in the field) conclude with cross reference links and suggestions for further reading. Appendices include a Resource Guide with annotated lists of classic books and articles, journals, associations, and web sites; a Glossary of specialized terms; and a Chronology offering an overview and history of the field. A thematic Reader's Guide groups related articles by broad topic areas as one handy search feature on the e-Reference platform, which includes a comprehensive index of search terms. Available in both print and electronic formats, Encyclopedia of Language Development is a must-have reference for researchers and is ideal for library reference or circulating collections.

Subject Indexing: Principles and Practices in the 90's Holley Robert P.,Dorothy McGarry,Donna Duncan,Elaine Svenonius,2017-07-24 As part of an effort to formulate a list of principles underlying subject heading languages used in various subject access systems throughout the world, IFLA's Lisbon Satellite Meeting reviewed a broad spectrum of national systems and considered current issues in their development. By examining programs developed in Brazil, Canada, Croatia, France, Germany, Poland, Portugal, Spain, the U.K., and the U.S., the papers help to identify which principles each system considers fundamental and implicit and which had to be stated explicitly in usage instructions or subject heading codes. More general topics such as International Tendencies in Terminology and Indexing were also addressed.

*Text and Wine* M. del Carmen Balbuena Torezano,Manuela Álvarez Jurado,2023-11-15 Text and Wine: Approaches from terminology and translation collects part of the results of the research project WeinApp: Multilingual System of Information and Winegrowing-Resources (MINECO, Ref. FFI2016-79785-R), carried out by researchers from the universities of Cordoba and Cadiz (Spain), on wine production, the wine sector, and its language and terminology in English, French, German and Spanish. The editors, principal investigators of the project, begin the volume, which contains works on phytopathology, lexical domains and subdomains, wine tourism, agro-legal texts, Indo-European languages, labelling, tasting metaphors, wine and literature, interpretation, wine and medicine, oenological websites, and lexical and morphosyntactic formation around the language of wine.

**Cross-Language Information Retrieval and Evaluation** Carol Peters,2003-06-29 The first evaluation campaign of the

Cross-Language Evaluation Forum (CLEF) for European languages was held from January to September 2000. The campaign culminated in a two-day workshop in Lisbon, Portugal, 21-22 September, immediately following the fourth European Conference on Digital Libraries (ECDL 2000). The first day of the workshop was open to anyone interested in the area of Cross-Language Information Retrieval (CLIR) and addressed the topic of CLIR system evaluation. The goal was to identify the actual contribution of evaluation to system development and to determine what could be done in the future to stimulate progress. The second day was restricted to participants in the CLEF 2000 evaluation campaign and to their experiments. This volume constitutes the proceedings of the workshop and provides a record of the campaign. CLEF is currently an activity of the DELOS Network of Excellence for Digital Libraries, funded by the EC Information Society Technologies to further research in digital library technologies. The activity is organized in collaboration with the US National Institute of Standards and Technology (NIST). The support of DELOS and NIST in the running of the evaluation campaign is gratefully acknowledged. I should also like to thank the other members of the Workshop Steering Committee for their assistance in the organization of this event.

Internet in the Post-Soviet Area Sergey Davydov, 2023-07-10 This book offers a comparative perspective on the technological, economic, and political aspects of Internet development in the post-Soviet countries. In doing so, international experts analyze similarities and differences in various countries throughout the chapters. The volume consists of two parts. The second part includes specific case studies on the development of the Internet, either in individual countries or in groups of countries. Countries analyzed are Estonia, Ukraine, Russia as well as three Central Asian countries: Kazakhstan, Uzbekistan and Tajikistan. Topics covered in the volume include, but are not limited to measurement, dynamics, and structure of each national Internet audience; the history of the Internet in the post-Soviet countries; development of infrastructure; Internet regulation and institutional aspects; online markets such as telecommunications, online advertising, e-commerce, and digital content; social and cultural aspects; as well as the transformation of the national media systems. This book is a must-read for students, researchers, and scholars of political science and economics, as well as policymakers and practitioners interested in a better understanding of Internet development in the post-Soviet area.

*Fuzzy Database Modeling* Adnan Yazici, Roy George, 1999-01-22 Some recent fuzzy database modeling advances for the non-traditional applications are introduced in this book. The focus is on database models for modeling complex information and uncertainty at the conceptual, logical, physical design levels and from integrity constraints defined on the fuzzy relations. The database models addressed here are; the conceptual data models, including the ExIFO and ExIFO2 data models, the logical database models, including the extended NF2 database model, fuzzy object-oriented database model, and the fuzzy deductive object-oriented database model. Integrity constraints are defined on the fuzzy relations are also addressed. A continuing reason for the limited adoption of fuzzy database systems has been performance. There have been few efforts at defining physical structures that accommodate fuzzy information. A new access structure and data organization for fuzzy information is introduced in this book.

**Cooperative Interfaces to Information Systems** Leonard Bolc, Matthias Jarke, 2012-12-06 Information systems are large repositories of factual and inferential knowledge intended to be queried and maintained by a wide variety of users with different backgrounds and work tasks. The community of potential information system users is growing rapidly with advances in hardware and software technology that permit computer/communications support for more and more application areas. Unfortunately, it is often felt that progress in user interface technology has not quite matched that of other areas. Technical solutions such as computer graphics, natural language processing, or man-machine-man communications in office systems are not enough by themselves. They should be complemented by system features that ensure cooperative behavior of the interfaces, thus reducing the training and usage effort required for successful interaction. In analogy to a human dialog partner, we call an interface cooperative if it does not just accept user requests passively or answer them literally, but actively attempts to understand the users' intentions and to help them solve their application problems. This leads to the central question addressed by this book: What makes an information systems interface cooperative, and how do we provide capabilities leading to cooperative interfaces? Many answers are possible. A first aspect concerns the formulation and acceptance of user requests. Many researchers assume that such requests should be formulated in natural language.

**Lateralization and cognitive systems** Sebastian Ocklenburg,Christian Beste,Onur Gunturkun, Marco Hirnstein,2015-02-24 Left-right asymmetries of structure and function are a common organization principle in the brains of humans and non-human vertebrates alike. While there are inherently asymmetric systems such as the human language system or the song system of songbirds, the impact of structural or functional asymmetries on perception, cognition and behavior is not necessarily limited to these systems. For example, performance in experimental paradigms that assess executive functions such as inhibition, planning or action monitoring is influenced by information processing in the bottom-up channel. Depending on the type of stimuli used, one hemisphere can be more efficient in processing than the other and these functional cerebral asymmetries have been shown to modulate the efficacy of executive functions via the bottom-up channel. We only begin to understand the complex neuronal mechanisms underlying this interaction between hemispheric asymmetries and cognitive systems. Therefore, it is the aim of this Research Topics to further elucidate how structural or functional hemispheric asymmetries modulate perception, cognition and behavior in the broadest sense.
