Speed William S. Burroughs,1984-03-09

Aram Bartholl Aram Bartholl,2012 This book features savvy experiments with transitions from the virtual to the physical: USB sticks embedded into walls, buildings, curbs; giant real-life versions of Google's red map markers positioned in public spaces; portraits generated from search results.

How Fast is It? Ben Hillman,2008 In this third book by Ben Hillman, young readers will learn and see just how fast something is. By comparing objects such as the Thrust SSC (that's a Thrust-powered Super Sonic Car), an ostrich (don't underestimate the ostrich, my friend!), the human brain, and bamboo,wildly different objects are taken out of normal context and placed next to one another to allow for new and exciting perspectives. So just how fast is an ostrich? An ostrich would beat a top-notch professional cyclist in a ten-mile (sixteen km) race, hands down! While the best cyclists can race at blistering speeds of twenty-five miles per hour, the ostrich can run at forty-five miles per hour! Other books in the series that kids will enjoy: *How Big Is It?* and *How Strong Is It?*

Speed and Acceleration Barbara A. Somervill,2010-07-01 This book explores the concepts of speed, velocity, and acceleration.

Zoom! Mark Andrew Weakland,2017-01-01 Wile E. Coyote really wants to catch Road Runner. Watch as he experiments with speed and velocity in different ways to try and capture that bird. Will Wile E. be speedy enough? Or will he fizzle and tire out? Read inside to find out!

Closing Speed Ted West,2019-02-08 1970 was the fastest, most fiercely competitive year in endurance-racing history—Porsche versus Ferrari -- in a duel to the death. Written by a journalist who covered the series in that fateful year, *Closing Speed* tells the dramatic story of the racers, the writers and the women who loved them. Monza, the Targa Florio, Monaco, Spa, the Nürburgring --

the greatest races come alive in a way you've never experienced. From triumph to crushing, heartbreaking loss, you will feel the emotions and fears of the complex players as if you were riding along at 200 miles per hour.

Speed Strength Joel Smith, 2018-12-06 In training speed, the most elusive athletic quality, what really works, and what doesn't? What are the components of sprinting itself that elites do, where amateurs falter? And how can we arrange all of this in a training medium that facilitates high performance? Speed Strength is the product of hundreds of athletes trained, thousands of hours of study, dozens of expert mentors, and an open mind. If you are interested in the answer to these questions, then Speed Strength is the book that holds the answers you are looking for, and much more. Joel Smith is the host of the Just Fly Performance Podcast and a track and strength coach of 13 years. As a track coach to national champions and Olympic champions as a strength coach, Joel has seen the elements of speed inside and out. Featuring the insight of over 25 field leaders, Speed Strength touches on the most important trainable elements of sprinting in a holistic and thorough manner.

China's High-Speed Rail Development Martha Lawrence, Richard Bullock, Ziming Liu, 2019-06-24 Over the past decade, China has built 25,000 km of dedicated highspeed railway—more than the rest of the world combined. What can we learn from this remarkable experience? China's High-Speed Rail Development examines the Chinese experience to draw lessons for countries considering investing in high-speed rail. The report scrutinizes the planning and

delivery mechanisms that enabled the rapid construction of the high-speed rail system. It highlights the role of long-term planning, consistent plan execution, and a joint venture structure that ensures active participation of provincial and local governments in project planning and financing. Traffic on China's high-speed trains has grown to 1.7 billion passengers a year. The study examines the characteristics of the markets for which high-speed rail is competitive in China. It discusses the pricing and service design considerations that go into making high-speed rail services competitive with other modes and factors such as good urban connectivity that make the service attractive to customers. One of the most remarkable aspects of the Chinese experience is the rapid pace of high-quality construction. The report looks at the role of strong capacity development within and cooperation among China Railway Corporation, rail manufacturers, universities, research institutions, laboratories, and engineering centers that allowed for rapid technological advancement and localization of technology. It describes the project delivery structures and incentives for delivering quality and timely results. Finally, the report analyzes the financial and economic sustainability of the investment in high-speed rail. It finds that a developing country can price high-speed rail services affordably and still achieve financial viability, but this requires very high passenger density. Economic viability similarly depends on high passenger density.

High-Speed Rail in Poland Andrzej Zurkowski, 2018-07-24 The Railway Research Institute (Instytut Kolejnictwa) in Warsaw was established in 1951 and was, until 2000, part of the Polish State Railways (PKP). At present, it serves as an independent entity, it is subordinated to the minister responsible for transport. Since its inception, the Institute has been the centre of competence for technology, technique and organization of operation and services in rail transport, particularly in respect to innovation. One of its fundamental tasks also includes activities connected with safety which are carried out in close cooperation with the National Safety Authority, i.e. the Office of Rail Transport. At the same time the Institute participated in the process of upgrading and modernization of the rail network in Poland. Experience in high speed rail, gained as a result of international cooperation and basing on the effort to increase speed on railway lines in Poland (so far 200 km/h), is included in the monograph "Koleje Dużych Prędkości w Polsce" (High Speed Rail in Poland) published in 2015 for the benefit of the Polish reader. This monograph aims at reaching an international audience of experts so as to present Polish determinants of HSR implementation. In order to elaborate this monograph, apart from specialists from the Railway Research Institute, experts from other research and academic centres were invited. Not only presenting a wide range of problems connected with future construction of High Speed Lines in Polish conditions, but also a

number of operational ones. The authors have created a reference work of universal character, solving problems in order to build and operate high speed rail systems in countries on a similar level of development as Poland. Features: providing requirements for design and upgrade of engineering works on High Speed Rail development information on restructuring and building railway lines for countries starting to develop a High Speed Rail system dealing with organizational, engineering, socioeconomic and economic demands for transport services and the formation of human resources for constructing and operating a High Speed Rail system. Presenting these problems on the international arena will facilitate future cooperation and application of world experience to create HSR in Poland and integrate the Polish HSR network into the international one.

The Culture of Speed John Tomlinson, 2007-09-27 John Tomlinson's book is an invitation to an adventure. It contains a precious key to unlock the doors into the unmapped and unexplored cultural and ethical condition of 'immediacy'. Without this key concept from now on it will not be possible to make sense of the social existence of our times and its ambivalences. - Ulrich Beck, University of Munich A most welcome, stimulating and challenging exploration of the cultural impact and

significance of speed in advanced modern societies. It successfully interweaves theoretical discourse, historical and contemporary analyses and imaginative use of literary sources, all of which are mobilised in order to provide an original, intellectually rewarding and critical account of the changing significance of speed in our everyday experience. - David Frisby, London School of Economics and Political Science

Is the pace of life accelerating? If so, what are the cultural, social, personal and economic consequences? This stimulating and accessible book examines how speed emerged as a cultural issue during industrial modernity. The rise of capitalist society and the shift to urban settings was rapid and tumultuous and was defined by the belief in 'progress'. The first obstacle faced by societies that were starting to 'speed up' was how to regulate and control the process. The attempt to regulate the acceleration of life created a new set of problems, namely the way in which speed escapes regulation and rebels against controls. This pattern of acceleration and control subsequently defined debates about the cultural effects of acceleration. However, in the 21st century 'immediacy', the combination of fast capitalism and the saturation of the everyday by media technologies, has emerged as the core feature of control. This coming of immediacy will inexorably change how we think about and experience media culture, consumption practices, and the core of our cultural and moral values. Incisive and richly illustrated, this eye-opening account of speed and culture provides an original guide to one of the central features of contemporary culture and everyday life.
