**Music Piracy and Crime Theory** Sameer Hinduja, 2006 Hinduja examines the social, psychological, criminological, and behavioral aspects of Internet crime. Guided by the most prominent general theories of criminal behavior, he explores music piracy - an all too-common form of cybercrime - by attempting to answer a number of questions. Does stress and strain play a role? What about low self-control? Is music piracy learned within intimate social groups? Do rationalizations and justifications contribute to participation? Is the behavior strengthened or weakened through rewards and punishments? Hinduja then proposes a model which integrates both social and technical factors to inform and guide strategies to combat music piracy, and potentially other variants of high-tech crime.
