Legends of Surfing Duke Boyd,2009-11-07 Surfing, Jack London remarked, is “a royal sport for the natural kings of earth.” The greatest of those natural kings grant readers an audience in this glorious celebration of the world’s best surfers. Part exquisite picture book and travelogue to the top of the world, part biography and reference guidebook, Legends of Surfing profiles one hundred great surfers, men and women, from throughout the world. In life stories, and in exclusive interviews--which only the surfing icon Duke Boyd could have pulled off--stellar surfers such as Wayne Bartholomew, Tom Curren, Andy and Bruce Irons, Duke Kahanamoku, Dave Kalama, Gerry Lopez, Rob Machado, Mark Occhilupo, and Kelly Slater give us a rare firsthand look at what it’s like, in this crowded world, to “seek and find the perfect day, the perfect wave, and be alone with the surf and his thoughts.” (John Severson, Surfer magazine, 1960)

The Relevance of Belief in Cancer Treatment Fernando Urioste,2019-04-06 Relevance offers help and provides hope to people that are overwhelmed by an “I have cancer awakening.” Fernando Urioste story shows that the medical sciences and technology play a significant role in the healing process but do not exist in a vacuum. They are part of a multidimensional belief consciousness that emerges, coalescing to help the afflicted individual’s fight for his or her life. Having experienced this in the flesh, Fernando hopes that his tale helps demonstrate to others the positive spirit needed for the healing process to succeed when fighting cancer. Relevance is not a technical book about cancer or a manual on cancer treatments available. Rather, it is a tale of the spiritual side on the difficult healing journey that an afflicted person undertakes when treating cancer, about the importance of the support provided by family and friends, about the belief that one’s future is not lost, faith in God’s Providence, and of most importance, one’s desire to live. All of this against the backdrop of the amazing medical science and technology administered by doctors, nurses, technicians and support staff of the institutions that provide cancer treatment.
