The Mechanic Marc 'Elvis' Priestley,2017-11-02 Meet Marc 'Elvis' Priestley: the former number-one McLaren mechanic, and the brains behind some of Formula One's greatest ever drivers. Revealing the most outrageous secrets and fiercest rivalries, The Mechanic follows Priestley as he travels the world working in the high-octane atmosphere of the F1 pit lane. While the spotlight is most often on the superstar drivers, the mechanics are the guys who make every World Champion, and any mistakes can have critical consequences. However, these highly skilled engineers don't just fine-tune machinery and crunch data through high-spec computers. These boys can seriously let their hair down. Whether it's partying on luxury yachts or gravity-defying photos aboard aeroplanes, this is a world which thrills on and off the track. This is Formula One, but not like you've seen it before.

The Billionaire and the Mechanic Julian Guthrie,2014-04-01 Expanded to include the behind-the-scenes story of the 34th America's Cup and Team USA's incredible comeback Down eight-to-one in the 34th America's Cup in September 2013, Oracle Team USA pulled off a comeback for the ages, with eight straight wins against Emirates Team New Zealand. Julian Guthrie's The Billionaire and the Mechanic tells the incredible story of how a car mechanic and one of the world's richest men teamed up to win the world's greatest race. With a lengthy new section on the 34th America's Cup, Guthrie also shows how they did it again. The America's Cup, first awarded in 1851, is the oldest trophy in international sports. In 2000, Larry Ellison, co-founder and billionaire CEO of Oracle Corporation, decided to run for the prize and found an unlikely partner in Norbert Bajurin, a car mechanic and Commodore of the blue-collar Golden Gate Yacht Club. After unsuccessful runs for the Cup in 2003 and 2007, they won for the first time in 2010. With unparalleled access to Ellison and his team, Guthrie takes readers inside the building process of these astonishing boats and the lives of the athletes who race them and throws readers into exhilarating races from Australia to Valencia.

Auto Mechanics Kevin L. Borg,2007-06 The history of automobiles is not just the story of invention, manufacturing, and marketing; it is also a story of repair. Auto Mechanics opens the repair shop to historical study—for the first time—by tracing the emergence of a dirty, difficult, and important profession. Kevin L. Borg's study spans a century of automotive technology—from the horseless carriage of the late nineteenth century to the check engine light of the late twentieth. Drawing from a diverse body of source material, Borg explores how the mechanic's occupation formed and evolved within the context of broad American fault lines of class, race, and gender and how vocational education entwined these tensions around the mechanic's unique expertise. He further shows how aspects of the consumer rights and environmental movements, as well as the design of automotive electronics, reflected and challenged the social identity and expertise of the mechanic. In the history of the American auto mechanic, Borg finds the origins of a persistent anxiety that even today accompanies the prospect of taking one's car in for repair.

The Mechanic's Tale Steve Matchett,2010-12-16 Essential reading for anyone interested in life behind-the-scenes at Formula One. Formula One Grand Prix mechanic Steve Matchett takes the reader on a compelling journey through his life in the pit-lane, from his beginnings as a young apprentice, through his time at Ferrari and BMW to his later success with Benetton. He gives eye-witness views of the great drivers, including Michael Schumacher, Nigel Mansell, Alain Prost and Ayrton Senna. He also talks of key Benetton personalities, and explains how the team was transformed into a strong, competitive organisation, winning three World Championships. His determination and frustration in trying - and eventually succeeding - to break into the high-pressure world of Formula One leaps off the page.
