Panic and Phobias Iver Hand, Hans-Ullrich

Wittchen, 2012-12-06 Isaac Marks, Institute of Psychiatry, London Human emotion seems to have changed Westphal's perceptive label. Many factor analytic studies in Europe and the USA since DSM-III burst on the world in 1980. The mere fear or anxiety that people used showed that fears of public places are salient in this problem, and that such agoraphobia to feel has been transformed into dramatic phobic panic and avoidance was also frequent panic attacks, and it has become vital to know whether 3 of these occurred over the week frequently accompanied by other nonphobic (nonsituational) features like tonic tension last 3 weeks. A rash of papers has appeared proving that 'panic disorder' is a disease and phobic panics independent of any with a specific genetic background, childhood special cue, depression and depersonalization antecedents, biological markers, and socialization. Unlike agoraphobia, panic is a pharmacological treatment. With alacrity rather nonspecific term. Spontaneous panic 'panic disorder' has been clutched to the chest is almost as frequent in anxious depression psychiatric nosology as proof of our medical model as in panic disorder, while phobic panic is a distinct identity. hallmark of nearly all severe phobias, but alas, we have been here before. Did not they specific, social or agoraphobias.

Making Time for Digital Lives Anne Kaun, 2020-09-09 It is said that the ontology of data resists slowness and also that the digital revolution promised a levelling of the playing field. Both theories are examined in this timely collection of chapters looking at time in the digital world. Since data has assumed such a paramount place in the modern neoliberal world, contemporary concepts of time have undergone radical transformation. By critically assessing the emerging initiatives of slowing down in the

digital age, this book investigates the role of the digital in ultimately reinforcing neo-liberal temporalities. It shows that both speed-up and slow down imperatives often function as a form of biopolitical social control necessary to contemporary global capitalism. Problematic paradoxes emerge where a successful slow down and digital detox ultimately are only successful if the individual returns to the world as a more productive, labouring neoliberal subject. Is there another way? The chapters in this collection, broken up into three parts, ask that question.

Widespread Panic in the Streets of Athens, Georgia

Gordon Lamb,2018-04-15 In April 1998, legendary southern jam band Widespread Panic held a free open-air record release show in downtown Athens, Georgia, its homebase. No one involved could have known that the predicted crowd of twenty thousand would prove to be nearly five times that size. The ultimately successful show, now known as “Panic in the Streets,” went on to become a cult favorite of Panic fans and a decisive moment in Athens music history. This event still holds the record for the world’s largest record release party, but the full story of how the event came to be has not been told until now. *Widespread Panic in the Streets of Athens, Georgia* places readers at the historic event, using in-depth investigation and interviews with the band, city officials, and “Spread Heads” who were there. Told as much as possible in real time, music journalist Gordon Lamb’s narrative takes the reader from conception to aftermath and uncovers the local controversies and efforts that nearly stopped the show from happening altogether. This deeply researched and richly sourced book follows every stage of the concert’s development from the spark of an idea to approximately one hundred thousand people from all over the world packing the streets of a legendary music town. Taking us back to 1990s Athens through vibrant, on-the-scene writing, Lamb gives us the story of a band on the verge of greatness and a town reckoning with its significant place in music history.

Panic Diaries Jackie Orr, 2006-03-01 Part cultural history, part sociological critique, and part literary performance, *Panic Diaries* explores the technological and social construction of individual and collective panic. Jackie Orr looks at instances of panic and its “cures” in the twentieth-century United States: from the mass hysteria following the 1938 radio broadcast of H. G. Wells’s *War of the Worlds* to an individual woman swallowing a pill to control the “panic disorder” officially recognized by the American Psychiatric Association in 1980. Against a backdrop of Cold War anxieties over atomic attack, Orr highlights the entanglements of knowledge and power in efforts to reconceive panic and its prevention as problems in communication and information feedback. Throughout, she reveals the shifting techniques of power and social engineering underlying the ways that scientific and social scientific discourses—including crowd psychology, Cold War cybernetics, and contemporary psychiatry—have rendered panic an object of technoscientific management. Orr, who has experienced panic attacks herself, kept a diary of her

participation as a research subject in clinical trials for the Upjohn Company's anti-anxiety drug Xanax. This "panic diary" grounds her study and suggests the complexity of her desire to track the diffusion and regulation of panic in U.S. society. Orr's historical research, theoretical reflections, and biographical narrative combine in this remarkable and compelling genealogy, which documents the manipulation of panic by the media, the social sciences and psychiatry, the U.S. military and government, and transnational drug companies.

Norma Jeane's Wishes in Time Stuart P.

Coates,2008-09-08 In the year 2040, the United States no longer exists. Instead, it's a province of the former Soviet Union, which has been restored to its past glory. And each newborn child is assigned a Designation Number instead of a name. Now, forty years later, a man known only as 77241 escapes into the past in an effort to discover where the world went wrong. When 77241 comes upon footage of Norma Jeane Baker, known throughout the world as Marilyn Monroe, he becomes haunted by her face, so much so that he seeks out her gravesite and begins speaking to her hologram. As oxygen bombs fall upon the former United States in a final act of destruction, 77241 escapes in a time bubble traveling back to June 1960. Once there, he seeks out Norma Jeane at a movie set. Through her, he attempts to save John F. Kennedy from his all-too-early demise hoping to alter enough of the past to change the world's future destruction. Join 77241 and Norma Jeane as they interact with a cast of historical characters, including Kennedy, Mark Twain and Abraham Lincoln, as they seek to change the course of history in *Norma Jeane's Wishes in Time*.
