Time Clock Cafe Frank Berlinger, 2018-08-18 Imagine having the opportunity to go back in time and question the one person you believe impacted your life more than any other. You know who I mean. The one you think broke your heart and left a black hole where your heart should be. The one that got away. In The Time Clock Café, Salvatore Schiavo finds himself presented with the opportunity to do just that. After forty-five years of silence and an unspectacular life buried in a small town outside San Francisco, Sal is enticed to make the three-thousand-mile journey back to suburban New Jersey by an unexpected call and invitation from the illusive Roxanne. As he waits, seated in the same well-worn, red vinyl booth he once shared with his high school sweetheart, Sal is prepared to confront the woman he holds responsible for the less than stellar outcome of his life, a transient existence crowded with countless careers, failed relationships, and unfulfilled potential. Instead, Sal finds himself face-to-face with age-old demons and, in a single afternoon at The Time Clock Café, unwittingly stumbles upon his own redemption.

About Time David Rooney, 2021-08-17 One of Smithsonian Magazine's Ten Best History Books of 2021 A captivating, surprising history of timekeeping and how it has shaped our world. For thousands of years, people of all cultures have made and used clocks, from the city sundials of ancient Rome to the medieval water clocks of imperial China, hourglasses fomenting revolution in the Middle Ages, the Stock Exchange clock of Amsterdam in 1611, Enlightenment observatories in India, and the high-precision clocks circling the Earth on a fleet of GPS satellites that have been launched since 1978. Clocks have helped us navigate the world and build empires, and have even taken us to the brink of destruction. Elites have used them to wield power, make money, govern citizens, and control lives—and sometimes the people have used them to fight back. Through the stories of twelve clocks, About Time brings pivotal moments from the past vividly to life. Historian and lifelong clock enthusiast David Rooney takes us from the unveiling of al-Jazari's castle clock in 1206, in present-day Turkey; to the Cape of Good Hope observatory at the southern tip of Africa, where nineteenth-century British government astronomers moved the gears of empire with a time ball and a gun; to the burial of a plutonium clock now sealed beneath a public park in Osaka, where it will keep time for 5,000 years. Rooney shows, through these artifacts, how time has been imagined, politicized, and weaponized over the centuries—and how it might bring peace. Ultimately, he writes, the technical history of horology is only the start of the story. A history of clocks is a history of civilization.
