The Third Industrial Revolution Jeremy Rifkin,2011-10-04 The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful Third Industrial Revolution. He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an energy internet, just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Post-Postmodernism Jeffrey Nealon,2012-08-01 Post-Postmodernism begins with a simple premise: we no longer live in the world of postmodernism, famously dubbed the cultural logic of late capitalism by Fredric Jameson in 1984. Far from charting any simple move beyond postmodernism since the 1980s, though, this book argues that we've experienced an intensification of postmodern capitalism over the past decades, an increasing saturation of the economic sphere into formerly independent segments of everyday cultural life. If fragmentation was the preferred watchword of postmodern America, intensification is the dominant cultural logic of our contemporary era. Post-Postmodernism surveys a wide variety of cultural texts in pursuing its analyses—everything from the classic rock of Black Sabbath to the post-Marxism of Antonio Negri, from considerations of the corporate university to the fare at the cineplex, from reading experimental literature to gambling in Las Vegas, from Badiou to the undergraduate classroom. Insofar as cultural realms of all kinds have increasingly been overcoded by the languages and practices of economics, Nealon aims to construct a genealogy of the American present, and to build a vocabulary for understanding the relations between economic production and cultural production today—when American-style capitalism, despite its recent battering, seems nowhere near the point of obsolescence. Post-postmodern capitalism is seldom late but always just in time. As such, it requires an updated conceptual vocabulary for diagnosing and responding to our changed situation.

Symbolic Economies Jean-Joseph Goux,1990 A major participant in the influential Tel Quel group in France, Jean-Joseph Goux here offers a bold reevaluation of both the Marxist economic model and the Freudian concept of the unconscious. Symbolic Economies makes available for the first time in English generous selections from Goux's Freud, Marx: Economie et symbolique (1973) and Les iconoclastes (1978). Goux brings the theories of historical materialism and of psychoanalysis into play to illuminate and enrich each other, and undertakes a compelling integration of the contributions of structuralism and post-structuralism. Looking closely at the work of such major figures as Lacan, Derrida, and Nietzsche, Goux extends the implications of Marxism and Freudianism to an interdisciplinary semiotics of value and proposes a radical concept of exchange. Literary theorists, philosophers, social scientists, cultural historians, and feminist critics alike will welcome this important and provocative work.

Banking on Words Arjun Appadurai,2016 In this short but ambitious book, Arjun Appadurai argues that the failure of the financial system in 2007-08 in the United States was primarily a failure of language. This argument does not deny that greed, ignorance, weak regulation, and irresponsible risk-taking were important factors in the collapse. But the new role of language in the marketplace, for Appadurai, is the condition of possibility for all these more easily identifiable flaws. Attempts to rectify the social pathologies of contemporary finance must address that failure of language. Banking on Words focuses on derivatives as the distinctive innovation of our financial era. Derivatives are written promises concerning the uncertain future prices of financial assets and the substance of these contracts is expressed in terms of money. The recent failure of derivatives markets was systematic and should be understood as failed promises. While it is well-known that derivatives pile risk on risk with little basis in real production and trade, Appadurai reveals this process in a fresh light from which some policy conclusions may be drawn. While critical of derivative finance's present social infrastructure and supporting ideology, Appadurai acknowledges its capacity for creating vast new forms of wealth and asks the crucial question: if we want access to that wealth, what kind of social arrangements would we need to make sure that it benefits all of society rather than reinforcing a system that benefits the few who are already well off? His bold answer involves not the repair of the force of promises but rather the repair and reconstruction of the idea of the individual to enable new sorts of solidarity between individuals, agents whose

very partiality may allow for new aggregations of aspiration, interest and affiliation. This amounts to nothing less than a new ideology of sociality.

Code Monkey Save World Greg Pak,Jonathan Coulton,2014-02-15 A put-upon coding monkey teams up with a seething, lovelorn super-villain to fight robots, office worker zombies, and maybe even each other as they struggle to impress the amazing women for whom they fruitlessly long. Based on the songs of internet superstar musician Jonathan Coulton.

The Decisive Moment Jonah Lehrer,2010 Since Plato, philosophers have described the decision-making process as either rational or emotional: we carefully deliberate or we 'blink' and go with our gut. But as scientists break open the mind's black box with the latest tools of neuroscience, they're discovering this is not how the mind works. Our best decisions are a finely tuned blend of both feeling and reason - and the precise mix depends on the situation. When buying a house, for example, it's best to let our unconscious mull over the many variables. But when we're picking stocks and shares, intuition often leads us astray. The trick is to determine when to lean on which part of the brain, and to do this, we need to think harder (and smarter) about how we think.
