**Turtle Dove** Jack M. Thompson, 2008-07 WoodenBoat Magazine called it fulfillment of a unique vision. **TURTLE DOVE** is a true story of a 20-year journey of love. Based on a newsman's vivid recollections and his detailed ship's log entries, the book tells how a mild-mannered reporter for a great metropolitan newspaper undertook an enormous part-time backyard project -- the 12-year construction of a big ocean-going wooden sailboat, its triumphant launching, and then a voyage around the world with a colorful collection of volunteer crew members (33 in all), some of whom had never set foot on a boat before. The trip took eight years, involved stops in 40 different countries and included several romances, two near-disasters, nude volleyball in the Caribbean, two trips through the Panama

Canal, pool games with tattooed Maori tribesmen in New Zealand, solo trombone serenades in mid-ocean, all-night musicales with native pearl divers in the Tuamotus, and water tag with playful porpoises in the Red Seas.

Sixteen Modern American Authors Jackson R. Bryer, 1990 Praise for the earlier edition: Students of modern American literature have for some years turned to *Fifteen Modern American Authors* (1969) as an indispensable guide to significant scholarship and criticism about twentieth-century American writers. In its new form--*Sixteenth Modern American Authors*--it will continue to be indispensable. If it is not a desk-book for all Americanists, it is a book to be kept in the forefront of the bibliographical compartment of their brains.--*American Studies*

Most Dope Paul Cantor, 2022-01-18 The first biography of rapper Mac Miller, the Pittsburgh cult favorite--turned--rap superstar who touched the lives of millions before tragically passing away at the age of 26--now in paperback Malcolm James McCormick was born on January 19, 1992. He began making music at a young age and by 15 was already releasing mixtapes. One of the first true viral superstars, his early records earned him a rabid legion of die-hard fans--as well as a few noteworthy detractors. But despite his undeniable success, Miller was plagued by struggles with substance abuse and depression, both of which fueled his raw and genre-defying music, yet ultimately led to his demise. Through detailed reporting and interviews with dozens of Miller's confidants, Paul Cantor brings you to leafy Pittsburgh, seductive Los Angeles, and frenzied New York, where you will meet Miller's collaborators, producers, business partners, best friends, and even his roommates. Traveling deep into Miller's inner circle, behind the curtain, the velvet ropes, and studio doors, *Most Dope* tells the story of a passionate, gifted young man who achieved his life's ambition, only to be undone by his personal demons. *Most Dope* is part love letter, part cautionary tale, never shying away from the raw, visceral way Mac Miller lived his life. Praise for *Most Dope* A tender, studious remembrance. --*The New York Times Book Review* An insightful exploration of his life . . . painstakingly reported by Cantor, who interviewed more than 100 people during a three-year process. --*USA Today* An inside look at Miller's life through the eyes of his friends and industry peers, tracking the musician's life journey as he quickly ascended the ranks. --*Daily Beast*

*A Companion to Spanish Environmental Cultural Studies* Luis I. Prádanos, 2023-01-17 An exploration of how writers, artists, and filmmakers expose the costs and contest the assumptions of the Capitalocene era that guides readers through the rapidly developing field of Spanish environmental

cultural studies. From the scars left by Franco's dams and mines to the toxic waste dumped in Equatorial Guinea, from the cruelty of the modern pork industry to the ravages of mass tourism in the Balearic Islands, this book delves into the power relations, material practices and social imaginaries underpinning the global economic system to uncover its unaffordable human and non-human costs. Guiding the reader through the rapidly emerging field of Spanish environmental cultural studies, with chapters on such topics as extractivism, animal studies, food studies, ecofeminism, decoloniality, critical race studies, tourism, and waste studies, an international team of US and European scholars show how Spanish writers, artists, and filmmakers have illuminated and contested the growth-oriented and neo-colonialist assumptions of the current Capitalocene era. Focussed on Spain, the volume also provides models for exploring the socioecological implications of cultural manifestations in other parts of the world.

**Intimate Politics** Bettina Aptheker, 2011-10-11 At eight years old, Bettina Aptheker watched her family's politics play out in countless living rooms across the country when her father, historian and U.S. Communist Party leader Herbert Aptheker, testified on television in front of the House on Un-American Activities Committee in 1953. Born into one of the most influential U.S. Communist families whose friends included W. E. B. Du Bois, Paul Robeson, and Elizabeth Gurley Flynn, Bettina lived her parents' politics witnessing first-hand one of the most dramatic upheavals in American history. She also lived with a terrible secret: incest at the hands of her famous father and a frightening and lonely life lived inside a home wrought with family tensions. A gripping and beautifully rendered memoir, *Intimate Politics* is at its core the story of one woman's struggle to still the demons of her personal world while becoming a controversial public figure herself. This is the story of childhood sexual abuse, abortion, sexual violence, activism, and the triumph over one's past. It's about FBI harassment and persecution, Jewish heritage, and lesbian identity. It is, finally, about the courage to speak one's truth despite the consequences and to break the sacred silence of family secrets.

**Marine Conservation** P. Keith Probert, 2017-07-06 Providing a comprehensive account of marine conservation, this book examines human use and abuse of the world's seas and oceans and their marine life, and the various approaches to management and conservation. Healthy marine ecosystems - the goods and services that they provide - are of vital importance to human wellbeing. There is a pressing need for a global synthesis of marine conservation issues and approaches. This book covers conservation issues pertinent to major groups of marine organisms, such as sharks, marine turtles, seabirds and marine mammals; key habitats, from estuaries, wetlands and coral reefs to the deep sea;

and from local and regional to international initiatives in marine conservation. An ideal resource for students, researchers and conservation professionals, the book pays appropriate attention to the underlying marine biology and oceanography and how human activities impact marine ecosystems, enabling the reader to fully understand the context of conservation action and its rationale.

**Game Usability** Katherine Isbister, Noah Schaffer, 2008-08-12 Computers used to be for geeks. And geeks were fine with dealing with a difficult and finicky interface--they liked this--it was even a sort of badge of honor (e.g. the Unix geeks). But making the interface really intuitive and useful--think about the first Macintosh computers--took computers far far beyond the geek crowd. The Mac made HCI (human c
