Christianity Today George D. Chryssides, 2010-06-01 A series of case studies illustrate the contemporary issues facing Christianity in contemporary society. This new introduction aims to present Christianity through the lens of contemporary issues. Illustrated throughout with examples and case studies taken from lived religion, each chapter looks at Christianity in a modern context, and modern issues relevant to the religion. After an initial chapter providing an overview of the faith, its history and basic theological tenets, George Chryssides moves through key contemporary themes: sources of authority in Christianity, science and Christianity, fundamentalism, mission and ecumenism, ethics, and women and Christianity. This title concludes with a final section looking at the future for Christianity in the face of secularism, secularisation and materialism, and its relative growth and decline worldwide. These useful guides aim to introduce religions through the lens of contemporary issues, illustrated throughout with examples and case studies taken from lived religion. The perfect companion for the student of religion, each guide interprets the teachings of the religion in question in a modern context and applies them to modern day scenarios.

Great Shakespeareans Set III Adrian Poole, Peter Holland, 2014-09-11 *Great Shakespeareans* presents a systematic account of those figures who have had the greatest influence on the interpretation, understanding and cultural

reception of Shakespeare, both nationally and internationally. This major project offers an unprecedented scholarly analysis of the contribution made by the most important Shakespearean critics, editors, actors and directors as well as novelists, poets, composers, and thinkers from the seventeenth to the twentieth century. An essential resource for students and scholars in Shakespeare studies.

From Wounded Knee to Checkpoint Charlie György Ferenc Tóth, 2016-04-22 A historical analysis of the transatlantic relations of the American Indian radical sovereignty movement of the late Cold War. *From Wounded Knee to Checkpoint Charlie* examines the history of the transatlantic alliance between American Indian sovereignty activists and Central European solidarity groups, and their entry into the United Nations in the 1970s and 1980s. In the late Cold War, Native American activists engaged in transnational diplomacy for nation building by putting outside pressure on the US government for a more progressive Indian policy that reached for the full decolonization of Native American communities into independence. By using extensive multinational archival research complemented by interviews, György Ferenc Tóth investigates how older transatlantic images of American Indians influenced the alliance between Native activists and Central European groups, how this coalition developed and functioned, and how the US government and the regimes of the Eastern Bloc responded to this transatlantic alliance. This book not only places the American Indian radical sovereignty movement in an international context, but also recasts it as a transnational struggle, thus connecting domestic US social and political history to the history of Cold War transatlantic relations and global movements.

Memory in Transatlantic Relations Kryštof Kozák, György Tóth, Paul Bauer, Allison Wanger, 2019-02-13 This volume focuses on the uses of collective memory in transatlantic relations between the United States, and Western and Central European nations in the period from the Cold War to the present day. Sitting at the intersection of international relations, history, memory studies and various area studies, *Memory in Transatlantic Relations* examines the role of memory in an international context, including the ways in which policy and decision makers utilize memory; the relationship between trauma, memory and international politics; the multiplicity of actors who shape memory; and the role of memory in the conflicts in post-Cold War Europe. Thematically organized and presenting studies centered on the U.S., Hungary, France, the Czech Republic and Slovakia, the authors explore the built environment (memorials) and performances of memory (commemorations), shedding

light on the ways in which memories are mobilized to frame relations between the U.S. and nations in Western and Central Europe. As such, it will appeal to scholars across the social sciences and historians with interests in memory studies, foreign policy and international relations.

A nomenclator of extant and fossil taxa of the Valvatidae (Gastropoda, Ectobranchia) Gerhard Haszprunar, 2014-02-05 The present catalog provides a compilation of all supra- and (infra-) specific taxa of extant and fossil Valvatidae (Ectobranchia), a group of freshwater operculate snails (Gastropoda, Heterobranchia). Taxa initially described in this family and subsequently classified in other families (in particular Hydrobiidae and Planorbidae, but among others also larval shells of trichopteran insects) as well as names due to errors or misspellings are likewise included. For each taxon the full original reference and the type locality (and type horizon in fossils) is provided. Remarks on nomenclatorial problems and possible solutions are added if necessary. As a novelty the extensive reference list is as far as possible directly linked to the internet source (digital view or pdf-download) of the respective papers to facilitate future taxonomic research.

What is e-book? Nicolae Sfetcu, 2014-05-10 The e-book guide for publishers: how to publish, EPUB format, ebook readers and suppliers. An electronic book (also e-book, ebook, electronic book, digital book) is a book-length publication in digital form, consisting of text, images, or both, and produced on, published through, and readable on computers or other electronic devices. An e-book can be purchased/borrowed, downloaded, and used immediately, whereas when one buys or borrows a book, one must go to a bookshop, a home library, or public library during limited hours, or wait for a delivery. Electronic publishing or ePublishing includes the digital publication of e-books and electronic articles, and the development of digital libraries and catalogues. EPUB (short for electronic publication; alternatively capitalized as ePub, ePUB, EPub, or epub, with EPUB preferred by the vendor) is a free and open e-book standard by the International Digital Publishing Forum (IDPF). Self-publishing is the publication of any book or other media by the author of the work, without the involvement of an established third-party publisher. One of the greatest benefits brought about by ebooks software is the ability for anyone to create professional ebooks without having to fork out thousands of dollars to design and publish a book. People can easily become authors overnight and earn income from selling online ebooks.

The Healing Enigma Robert Jaggs-Fowler, 2018-11-20 The concept of the physician-priest is an ancient one existing pre-Christianity, and historic references to the role can be found within the majority of religions and across all continents. However, despite a growing body of scientific evidence indicating the value of spirituality, the 20th century medical profession within the Western world has placed religion at arm's length, effectively excluding such discussion from the medical consultation. Referring to both primary and secondary sources within theological, medical, legal, historic and philosophical literature, Robert puts forward an argument in support of a 21st century role for the physician-priest. He argues that if the physician can exercise the role of priest in addition to their medical role, they can thereby truly minister to the whole person in terms of mind, body and soul.

With consideration of modern NHS funding streams, Robert suggests a radical proposal whereby the Church of England and medical educational institutions might combine to offer dual theological and medical training. The result would establish a new breed of professional person ideally positioned in respect to the care of the elderly and those with terminal illness. The Healing Enigma suggests that this not only assists with the provision of 'whole-person' care, but also allows the Church to firmly re-establish itself in the 21st century within its Christian healing tradition.

Doing Kyd Nicoleta Cinpoes, 2018-07-30 *Doing Kyd* reads Thomas Kyd's *The Spanish Tragedy*, the box-office and print success of its time, as the play that established the revenge genre in England and served as a 'pattern and precedent' for the golden generation of early modern playwrights, from Marlowe and Shakespeare to Middleton, Webster and Ford. Interdisciplinary in approach and accessible in style, this collection is crucial in two respects: firstly, it has a wide spectrum, addressing readers with interests in the play from its early impact as the first sixteenth-century revenge tragedy, to its afterlife in print, on the stage, in screen adaptation and bibliographical studies. Secondly, the collection appears at a time when Kyd and his play are back in the spotlight, through renewed critical interest, several new stage productions between 2009 and 2013, and its firm presence in higher-education curriculum for English and drama.

Data Compression David Salomon, 2006-05-09 A comprehensive reference for the many different types and methods of compression, including a detailed and helpful taxonomy, an analysis of the most common methods, and discussions on their use and comparative benefits. The presentation is organized into the main branches of the field: run length encoding, statistical methods, dictionary-based methods, image compression, audio compression, and video compression. Detailed descriptions and explanations of the most well-known and frequently used methods are covered in a self-contained fashion, with an accessible style and technical level for specialists and nonspecialists. In short, the book provides an invaluable reference and guide for all computer scientists, computer engineers, electrical engineers, signal/image processing engineers and other scientists needing a comprehensive compilation for a broad range of compression methods.

Cursing the Christians? Ruth Langer, 2011-11-01 Ruth Langer offers an in-depth study of the *birkat hamanim*, a Jewish prayer for the removal of those categories of human being who prevent the messianic redemption and the society envisioned for it. In its earliest form, the prayer cursed Christians, apostates to Christianity, sectarians, and enemies of Israel. Drawing on the shifting liturgical texts, polemics, and apologetics concerning the prayer, Langer traces the transformation of the *birkat hamanim* from what functioned without question in the medieval world as a Jewish curse of Christians, through its early modern censorship by Christians, to its modern transformation within the Jewish world into a general petition that God remove evil from the world. Christian censorship played a crucial role in this transformation of the prayer; however, Langer argues that the truest transformation in meaning resulted from Jewish integration into Western culture. Eventually, the prayer shed its references to any specific category of human being and lost its function as a curse. Reconciliation between Jews and Christians today requires both communities to confront a long history of

prejudice. Ruth Langer shows through the birkat haminim how the history of one liturgical text chronicled Jewish thinking about Christians over hundreds of years.

Document Analysis Systems V Daniel Lopresti, Jianying Hu, Ramanujan Kashi, 2003-08-02 This book constitutes the refereed proceedings of the 5th International Workshop on Document Analysis Systems, DAS 2002, held in Princeton, NJ, USA in August 2002 with sponsorship from IAPR. The 44 revised full papers presented together with 14 short papers were carefully reviewed and selected for inclusion in the book. All current issues in document analysis systems are addressed. The papers are organized in topical sections on OCR features and systems, handwriting recognition, layout analysis, classifiers and learning, tables and forms, text extraction, indexing and retrieval, document engineering, and new applications.
