Artificial Intelligence and Heuristics for Smart Energy Efficiency in Smart Cities Mustapha Hatti, 2021-11-24 This book emphasizes the role of micro-grid systems and connected networks for the strategic storage of energy through the use of information and communication techniques, big data, the cloud, and meta-heuristics to support the greed for artificial intelligence techniques in data and the implementation of global strategies to meet the challenges of the city in the broad sense. The intelligent management of renewable energy in the context of the energy transition requires the use of techniques and tools based on artificial intelligence (AI) to overcome the challenges of the intermittence of resources and the cost of energy. The advent of the smart city makes an increased call for the integration of artificial intelligence and heuristics to meet the challenge of the increasing migration of populations to the city, in order to ensure food, energy, and environmental security of the citizen of the city and his well-being. This book is intended for policymakers, academics, practitioners, and students. Several real cases are exposed throughout the book to illustrate the concepts and methods of the networks and systems presented. This book proposes the development of new technological innovations—mainly ICT—the concept of “Smart City” appears as a means of achieving more efficient and sustainable cities. The overall goal of the book is to develop a comprehensive framework to help public and private stakeholders make informed decisions on smart city investment strategies and develop skills for assessment and prioritization, including resolution of difficulties with deployment and reproducibility.

Take Control of Audio Hijack, 2nd Edition Kirk McElhearn, 2022-03-31 Find sound advice for recording anything on your Mac! Version 2.0, updated March 31, 2022 Most of this book discusses Audio Hijack, a handy utility from Rogue Amoeba that can record and enhance any sound your Mac can play. There's also a chapter about using Fission, also from Rogue Amoeba, to edit sound recordings. Learn how to use Rogue Amoeba's Audio Hijack version 4 to capture and enhance any audio playing on a Mac. Audio expert Kirk McElhearn provides instructions for setting up common scenarios—recording audio playing in Safari, capturing Zoom and FaceTime calls, digitizing your old LPs, extracting audio from concert DVDs, and working with mics and mixers, and much more. Kirk also helps you edit recordings in Rogue Amoeba's Fission audio editor. You'll learn how to pipe sound through Audio Hijack to enhance its quality without recording. For example, by boosting the volume or tweaking the bass—movies on Netflix never sounded better! You'll also discover special features such as reusable sessions, recording to more than one file (and format) at once, scheduling recordings, time shifting during live playback, effects like ducking and panning, adding automatic metadata before recording, and more. And you'll learn how to use Audio Hijack as a powerful tool for live streaming or broadcasting. The Fission chapter has directions for trimming, cropping, adding, replacing, splitting, and fading audio. It also explains how to turn an audio file into a ringtone and—podcasters and educators take note!—how to make a chapterized AAC file. As far as recording goes, you'll find help with: • Recording literally any audio played on your Mac. • Setting up reusable sessions with Audio Hijack's Audio Grid interface. • Scheduling when your Mac should record something automatically. • Recording from a mic. Or two mics. Or a mixer. Or a food

processor. • Capturing a chat from Zoom, FaceTime, and other voice-over-IP apps. • Checking volume levels before you record. • Ducking one audio source when a second source kicks in. • Digitizing an LP or cassette, while reducing hiss and noise. • Breaking a digitized album into separate songs. • Recording to multiple files and formats. • Using Audio Hijack to live stream to Twitch or YouTube Live, or to broadcast a streaming radio station. • Finding your recordings in Audio Hijack and the Finder. • Use Audio Hijack's new scripting feature to add automations to your sessions, and even integrate them with Apple's Shortcuts app. If you're interested in enhancing your aural experience, you'll find help with: • Enhancing audio while you listen to it. For example, your little laptop's speakers might not provide enough oomph for an action thriller's soundtrack, but with Audio Hijack you can boost that sound and enjoy the flick. • Time-shifting live audio while you listen. You can pause and resume live audio you're listening to, or go back a few seconds or jump ahead (if there's anything to jump ahead to). Lastly, you'll learn how to use Fission to polish your recordings. You can: • Trim unwanted bits. • Insert one audio file into another. • Fade in or out from silence. • Adjust a recording's volume. • Create a ringtone or alert tone. • Make a chapterized AAC file. • Convert nearly any audio file to MP3, AAC, Apple Lossless, FLAC, AIFF, or WAV format.

Alexander of Aphrodisias: On Aristotle Prior Analytics 1.14-22 Ian Mueller, 2014-04-22 The commentary of Alexander of Aphrodisias on Aristotle's Prior Analytics 1.8-22 is a very important text, being the main ancient commentary with chapters in which Aristotle invented modal logic - the logic of propositions about what is necessary or contingent (possible). The first volume of Ian Mueller's translation covered chapters 1.8-13, and reached as far as the chapter in which Aristotle discussed the notion of contingency. In this, the second volume, the 'greatest' commentator, Alexander, concludes his discussion of Aristotle's modal logic. Aristotle also invented the syllogism, a style of argument involving two premises and a conclusion. Modal propositions can be deployed in syllogisms, and in the chapters included in this volume Aristotle discusses all the syllogisms containing at least one contingent premiss. In each volume, Ian Mueller provides a comprehensive explanation of Alexander's commentary on modal logic as a whole.

Take Control of macOS Media Apps Kirk McElhearn, 2024-04-12 Discover Apple's Music, TV, Podcasts, and Books apps Version 1.9, updated April 12, 2024 Are you bewildered with the apps that replaced iTunes in macOS? Befuddled by Apple Music? Do you want to customize the Music app sidebar? Wish you could organize your podcasts? Wondering what the difference is between loves and stars? In this book, Kirk McElhearn (author of three previous Take Control titles on iTunes, going back to 2010) explains not only how Apple's media apps work, but also how normal people can make the Music, TV, Podcasts, and Books apps do what they want. Starting in macOS 10.15 Catalina, Apple finally did away with iTunes. In its place are three new apps—Music, TV, and Podcasts—with audiobooks now handled by the Books app and syncing of mobile devices handled by the Finder. Where once iTunes was an all-purpose media hub, now you may use up to five apps to accomplish the same things. The new apps also add more features (while, sadly, removing a few things too). Take Control of macOS Media Apps is your guide to the post-iTunes world. Kirk McElhearn, whose earlier books on iTunes 10, 11, and 12 collectively sold nearly 14,000 copies, is back with a new book that shows you how to manage your music, videos, podcasts, and audiobooks in Catalina and later. Whether you just want to play your media, or you want to go deeper with special features like Genius, Shuffle, Playing Next, Apple Music, and iTunes Match, this comprehensive guide has the answers you need. Kirk also looks at various ways of bringing audio and video into Apple's media apps, tagging songs and videos so you can find them more easily later, creating playlists, sharing your library over a home network, and syncing media with your iPhone, iPad, or iPod. The book covers how to: • Play Music: Learn the basics of playing audio (and even music videos) in the Music app. You'll also find tips on

making quick playlists with Genius and Playing Next, learn the best ways to search for the music you want to hear, stream music to other devices in your home, and view lyrics while tunes play. • Stream Music: Use Apple Music, a paid service, to listen to any of 100 million tracks. Or listen to live broadcasts from Apple Music Radio (including Apple Music 1). • View Your Music and Other Content: Learn how to use the sidebar, view your music library, and work with contextual menus in the Music app. • Store Your Music Library in the Cloud: What are the pros and cons of using the Sync Library setting to store your music in the cloud? How do Music and iTunes Match figure out whether to upload your music when that setting is enabled? You'll get answers to these questions and more. • Use the iTunes Store: iTunes may be gone, but the iTunes Store is still open for business! Find tips on shopping in the iTunes Store, and get advice on sharing your purchases with family members and among your various Apple devices. • Tag Your Music: Tags are bits of information (also known as "metadata") that can describe your media. Learn which tags to bother changing, the best ways to add lyrics and album art, how to rate songs with stars, loves, or both, and more. • Organize Your Music: Make a simple playlist of romantic songs, workout songs, or whatever theme you like. You'll learn how to create smart playlists that, for example, comprise only your 5-star faves or only tunes you haven't heard recently, and how to transfer playlists to the Apple Watch. You'll also find help with operational issues like eliminating duplicates from your music library. • Manage and Share Media Files: Whether you want to casually share a playlist from your laptop when visiting a friend or you want to make all your media available on all your home's computers, you'll find out how Media Sharing and Home Sharing make sharing possible. You'll also learn how to manage massive media libraries and store media files on external drives. • Listen to Audiobooks: Discover how to download and play audiobooks in the Books app, and how to manage your audiobook library. • View Movies and TV Shows: Use the TV app (with or without the forthcoming Apple TV+ service) to watch videos, including those purchased or rented from the iTunes Store and those you add yourself. • Listen to and Watch Podcasts: You'll be sampling and subscribing to podcasts in no time with Kirk's advice, plus you'll pick a method of syncing podcast episodes to your iPhone or iPad and even learn about creating your own podcast station. • Sync Media: You've put all your media on your Mac...now, how do you transfer it to a mobile Apple device such as an iPhone, an iPad, an old-school iPod, or an Apple Watch? And how do you use an Apple TV to enjoy the media on your Mac? Learn the best approach for your situation. • Rip, Burn, and Print: Add content to your media apps with Kirk's detailed steps for "ripping" music CDs and audiobooks. Also learn how to burn music from Music onto a CD, and get directions for printing a song list—for example, to include in the jewel case of said CD. • Extend with AppleScript: Mac users can make the Music and TV apps do more with AppleScript. Learn about key AppleScripts that you can download to make your media apps jump through even more hoops.
