Brand Personality Iva Rakocevic,2011-10 Bachelor Thesis from the year 2011 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1, University of Vienna, language: English, abstract: This bachelor thesis should give an overview of brand personality, as an important part of branding. Going through historical periods before the 20th century up to present day, I will try to present the development of brand personality through different phases. The main focus of this bachelor thesis will be on Aakers model of brand personality, as she was the first author who developed brand personality scales.

Sport Entrepreneurship and Public Policy Vanessa Ratten,2019-10-25 This book revisits the traditional general approach to sport policy by adopting an entrepreneurial perspective. The respective chapters, all written by recognized experts, link a fragmented collection of treatises on entrepreneurship, public policy and sport entrepreneurship to develop a coherent, unified perspective on policy-making. The book's central argument is that, while in the past, sport policy focused more on governance and political elements, these aspects can also be embedded into a 'policy entrepreneurship' perspective. To date, most sport policy research has also tended to pursue an organizational behavior or political science approach. Breaking with that trend, the book incorporates the nascent sport entrepreneurship literature into this approach. The new strategies proposed here offer valuable resources for public policy planners and sports managers alike, two groups who need to work together to build better policy initiatives.

Dimensions of Brand Personality Jennifer Aaker,2006 Although a considerable amount of research in personality psychology has been done to conceptualize human personality, identify the Big Five dimensions, and explore the meaning of each dimension, no parallel research has been conducted in consumer behavior on brand personality. Consequently, an understanding of the symbolic use of brands has been limited in the consumer behavior literature. In this research, the author develops a theoretical framework of the the brand personality construct by determining the number and nature of dimensions of brand personality (Sincerity, Excitement, Competence, Sophistication, and Ruggedness). To measure the five brand personality dimensions, a reliable, valid, and generalizable measurement scale is created. Finally, theoretical and practical implications regarding the symbolic use of brands are discussed.

Online Place Branding Phoenix Lam,2020-12-28 Through an interdisciplinary approach combining the concepts, methods and tools in language and discourse studies and insights from marketing and tourism research, this book examines the online place branding of Hong Kong, one of the most visited cities and well-known spots in the world. The book compares how the place brand is officially constructed and conveyed by the institutional bodies, as realised on the Brand Hong Kong website online, with how the place brand is publicly experienced and perceived by individuals around the world, as realised on the TripAdvisor Hong Kong travel forum online. The book also includes comparative analysis between Singapore and Hong Kong to provide better understanding of online place branding and findings from the comparative study identify interesting similarities and differences between the official portrayal of the place brand of Hong Kong and its public perception in the digital realm, as well as between Hong Kong and Singapore in online place branding. The book also offers evidence-based suggestions on how we can bridge the gap between the online representation and perception of a place brand and how to enhance online place branding in general.

Brands & Advertising Giep Franzen,1999 A comprehensive examination of the research methods now available to help agencies and advertisers develop more effective advertising.

Brand Attachment C. Whan Park,Deborah J. MacInnis,Joseph Priester,2008 The purpose of this review is to provide an overview of various literatures related to consumer search for information, and its effect on markets. Normative models of consumer search prior to purchase, and of consumer search through experience, are reviewed first. Models of consumer consideration set formation are also outlined. These models are generally based on consumers balancing the costs and benefits of search, which implies that search should be limited if it is costly. The extensive empirical literature on consumer search, which is reviewed next, does indicate that search is limited. The third major section of this review discusses the effect of search on market equilibrium, and market forces related to the supply of information. These include models of how advertising, retailing, and the Internet become organized to facilitate consumer search. The review concludes with a discussion of overall findings and suggestions for further research.

Positioning for Advantage Kimberly A. Whitler,2021-09-07 Most of us have an intuitive sense of superior branding. We prefer to purchase brands we find distinctive—that deliver on some important, relevant dimension better than other brands. These brands have typically achieved positional advantage. Yet few professionals have had the formal training that goes beyond marketing theory to bridge the “theory-doing gap”—understanding the specific techniques and strategies that can be used to create brands that attain positional advantage in the marketplace. Positioning for Advantage is a comprehensive how-to guide for creating, building, and executing effective brand strategies. Kimberly A. Whitler identifies essential marketing strategy techniques and moves through the major stages of positioning a brand to achieve in-market advantage. Introducing seven tools—from strategic positioning concepts to strategy mapping to influencer maps—Whitler provides templates, frameworks, and step-by-step processes to build and manage growth brands that achieve positional advantage. This book presents real-world scenarios, helping readers activate tools to increase skill in creating brands that achieve positional advantage. Brimming with insights for students and professionals alike, Positioning for Advantage helps aspiring C-level leaders understand not only what superior branding looks like but also how to make it come to life.

Destination Branding Nigel Morgan,Annette Pritchard,Roger Pride,2007-06-07 In today's highly competitive market, many destinations - from individual resorts to countries - are adopting branding techniques similar to those used by 'Coca Cola', 'Nike' and 'Sony' in an effort to differentiate their identities and to emphasize the uniqueness of their product. By focusing on a range of global case studies, Destination Branding demonstrates that the adoption of a highly targeted, consumer research-based, multi-agency 'mood branding' initiative leads to success every time.

Brand Equity & Advertising David A. Aaker,Alexander L. Biel,2013-10-31 The tenth annual Advertising and Consumer Psychology Conference held in San Francisco focused on branding -- a subject

generating intense interest both in academia and in the real world. The principle theory behind these conferences is that much can be gained by joining advertising and marketing professionals with academic researchers in advertising. Professionals can gain insight into the new theories, measurement tools and empirical findings that are emerging, while academics are stimulated by the insights and experience that professionals describe and the research questions that they pose. This book consists of papers delivered by experts from academia and industry discussing issues regarding the role of advertising in the establishment and maintenance of brand equity -- making this volume of interest to advertising and marketing specialists, as well as consumer and social psychologists.

The Human Brand Chris Malone,Susan T. Fiske,2013-10-07 Why we choose companies and brands in the same way that we unconsciously perceive, judge, and behave toward one another People everywhere describe their relationships with brands in a deeply personal way—we hate our banks, love our smartphones, and think the cable company is out to get us. What's actually going on in our brains when we make these judgments? Through original research, customer loyalty expert Chris Malone and top social psychologist Susan Fiske discovered that our perceptions arise from spontaneous judgments on warmth and competence, the same two factors that also determine our impressions of people. We see companies and brands the same way we automatically perceive, judge, and behave toward one another. As a result, to achieve sustained success, companies must forge genuine relationships with customers. And as customers, we have a right to expect relational accountability from the companies and brands we support. Applies the social psychology concepts of warmth (what intentions others have toward us) and competence (how capable they are of carrying out those intentions) to the way we perceive and relate to companies and brands Features in-depth analyses of companies such as Hershey's, Domino's, Lululemon, Zappos, Amazon, Chobani, Sprint, and more Draws from original research, evaluating over 45 companies over the course of 10 separate studies The Human Brand is essential reading for understanding how and why we make the choices we do, as well as what it takes for companies and brands to earn and keep our loyalty in the digital age.

Nation Branding Keith Dinnie,2015-08-27 Nation Branding: Concepts, Issues, Practice was the ground-breaking first textbook to provide an overview of this recently established but fast-growing practice, in which the principles of brand management are applied to countries rather than companies. Many governments have invested in nation branding in order to strengthen their country's influence, improve its reputation, or boost tourism, trade and investment. This new edition has been comprehensively revised and its influential original framework modified to reflect the very latest changes to this still-developing field. It remains an accessible blend of theory and practice rich with international examples and contributions. Updates to this edition: New international cases of countries as diverse as China, United Arab Emirates, Ghana, Cuba, India, Great Britain and many more; New contributions from distinguished scholars, diplomats and businesspeople providing a range of case studies, practitioner insights and academic perspectives; New Companion Website to support the book featuring instructor aids such as PowerPoint presentations for each chapter and an instructor manual; This much-anticipated update to an influential book is an essential introduction to nation branding for students and policy makers.

Brands Adam Arvidsson,2006-04-19 Drawing on rich empirical material, this revealing book builds up a critical theory, arguing that brands have become an important tool for transforming everyday life into economic value. When branding lifestyles or value complexes onto their products, companies assume that consumers desire products for their ability to give meaning to their lives. Yet, brands also have a key function within managerial strategy. Examining the history of audience and market research, marketing thought and advertising strategy; the first part of this book traces the historical development of branding, whilst the second part evaluates new media, contemporary management and overall media economics to present the first systematic theory of brands: the brand as a key institution in information capitalism. It includes chapters on: consumption marketing brand management online branding the brand as informational capital. Richly illustrated with case studies from market research, advertising, shop displays, mobile phones, the internet and virtual companies, this outstanding book is essential reading for students and researchers of the sociology of media, cultural studies, advertising and consumer studies and marketing.

This is THE key scholarly text in this crucial topic, an already hugely respected title and big seller in the field. It follows on from the introductory textbook Creating Powerful Brands, and comes highly illustrated with real examples of influential marketing campaigns. This is the book that will take students to the next level with the skills to develop and implement their own branding strategy.
