Virtual-Office Tools for a High-Margin Practice David J.

Drucker, Joel P. Bruckenstein, 2010-05-21 Tired of spending more time with filing cabinets than with clients? Is overhead eating up margins? Now, two leading financial planners and columnists deliver the help advisers have been begging for. *Virtual-Office Tools for a High-Margin Practice* is a nontechnical trove of technology, clever workarounds, and procedural efficiencies tailored to help financial advisers move toward a paperless office, while still complying with SEC record-keeping requirements. The authors show planners how to reduce the amount of paperwork in their offices by 99 percent, slash overhead, and find anything they need in one minute or less by adapting innovative software tools and shifting from on-site employees to remote assistants and virtual work partners. Until now, creative ways of working this smart were hard to come by. With this book, they are available, ready to go, and easy to implement.

Take Control of DEVONthink 3 Joe Kissell, 2023-12-29 Manage your information with the powerful tools in DEVONthink 3 Version 1.15, updated December 29, 2023 This book teaches you the basics of DEVONthink 3 and DEVONthink To Go for iOS/iPadOS. You'll learn how to find your way around, get information into and out of DEVONthink, and make the most of the app's key features. With the information-management app DEVONthink 3, you no longer have to swim in a sea of web bookmarks, email receipts, RSS feeds, scanned memos, and downloaded bank statements. DEVONthink

stores your digital documents and clippings, helps you scan and store paper documents, and serves as home base for organizing and viewing all your information. But mastering all that power can take effort, and this book—created in partnership with DEVONtechnologies—has the real-world advice you need to understand how DEVONthink can bring order to your information. You'll also learn how to extend your DEVONthink experience beyond your main Mac with detailed coverage of the many ways you can sync DEVONthink databases to other Macs and to iOS/iPadOS devices using the DEVONthink To Go app. After covering essential DEVONthink vocabulary and concepts, including the completely reworked user interface of DEVONthink 3, Joe helps you start using DEVONthink effectively. You'll learn how to:

- Decide how many databases you need and set them up
- Determine whether to input or index data
- Configure where incoming data will go
- Import data from many different apps
- Import data from a scanner, including OCR options
- Use grouping and tagging to organize data
- Add and work with DEVONthink 3's expanded metadata capabilities
- Use simple (and sophisticated) techniques for searching
- Create smart groups that automatically gather newly imported data
- Use smart rules and AppleScript to automate countless activities within DEVONthink
- Create documents in plain text, HTML, Markdown, and more
- Edit documents in DEVONthink (or externally)
- Find the best way to sync DEVONthink data with other devices
- Work with reminders, smart templates, and other sophisticated tools
- Convert documents between formats
- Effectively use the DEVONthink To Go iOS/iPadOS app
- Share DEVONthink documents with other people
- Export documents from DEVONthink
- Back up and maintain healthy databases

Questions answered in the book include:

- What is DEVONthink good

for, and what should be left to other apps? • What kinds of data can I import? (Short answer: Nearly everything!) • How can I display my data in a way that works well for me? • When I import documents from different sources, where do they end up, and why? • Is it better to sort imported documents right away, or leave them for later? • Should I group my data, tag it, or both? • What are duplicates and replicants, and how can I tell them apart? • Which types of data can be created or edited within DEVONthink? • How do I make my DEVONthink database accessible via the web using DEVONthink Server? • How do I move documents out of DEVONthink using the Share feature? • How do I use DEVONthink To Go on my iOS/iPadOS device? Plus, we now plan to update this free book approximately four times per year for the foreseeable future to cover ongoing changes in DEVONthink and add new tips and advice!

Open Access and Digital Libraries Lynne M. Rudasill, Maria Elena Dorta-Duque, 2013-04-30 The social sciences have made fundamental contributions to the understanding of the economic, political and social life of nations in the past century. Social science libraries now have an important role to play in the context of the information society as significant sources of academic and social knowledge. This work provides information on the development and use of digital resources in the social sciences emphasizing best practices; an articulation of some of the problems presented to providing these resources; and a view to the use of these resources to support sustainable development.

Genre Analysis and Corpus Design Ulrike Henny-Krahmer, 2024-01-22 This work in the field of digital literary stylistics and computational literary studies is concerned with theoretical concerns of literary genre, with the design of a corpus of nineteenth-century Spanish-American novels, and with its empirical analysis in terms of subgenres of the novel. The digital text corpus consists of 256 Argentine, Cuban, and Mexican novels from the period between 1830 and 1910. It has been created with the goal to analyze thematic subgenres and literary currents that were represented in numerous novels in the nineteenth century by means of computational text categorization methods. To categorize the texts, statistical classification and a family resemblance analysis relying on network analysis are

used with the aim to examine how the subgenres, which are understood as communicative, conventional phenomena, can be captured on the stylistic, textual level of the novels that participate in them.

Teaching Strategies for Health Education and Health Promotion

Arlene Lowenstein,Lynn Foord-May,Jane Romano,2009-10-07

Intended for a multidisciplinary team of providers, Teaching Strategies for Health Care and Health establishes a foundation of how, why, what, and when people of all ages learn and how learning can positively affect a patient, a family, and a diverse community's ability to understand, manage, prevent and live well with their illness. Designed to give health professionals the tools they need to provide total patient care, this unique resource presents a foundation as well as a selection of tools and teaching methodologies to promote health and prevention of illness. Unique to this resource are experience driven case studies demonstrating both successful and unsuccessful cases, helping health care professionals identify best practices to preserve and repeat, as well as analyze why unsuccessful efforts might have failed and how those cases could be handled differently.

Computational social science (CSS) is the science that investigates social and behavioral dynamics through social simulation, social network analysis, and social media analysis. The CSSSA is a professional society that aims to advance the field of computational social science in all areas, including basic and applied orientations, by holding conferences and workshops, promoting standards of scientific excellence in research and teaching, and publishing research findings and results.

Text Mining for Information Professionals Manika Lamba, Margam Madhusudhan, 2022-04-21 This book focuses on a basic theoretical framework dealing with the problems, solutions, and applications of text mining and its various facets in a very practical form of case studies, use cases, and stories. The book contains 11 chapters with 14 case studies showing 8 different text mining and visualization approaches, and 17 stories. In addition, both a website and a Github account are also maintained for the book. They contain the code, data, and notebooks for the case studies; a summary of all the stories shared

by the librarians/faculty; and hyperlinks to open an interactive virtual RStudio/Jupyter Notebook environment. The interactive virtual environment runs case studies based on the R programming language for hands-on practice in the cloud without installing any software. From understanding different types and forms of data to case studies showing the application of each text mining approaches on data retrieved from various resources, this book is a must-read for all library professionals interested in text mining and its application in libraries. Additionally, this book will also be helpful to archivists, digital curators, or any other humanities and social science professionals who want to understand the basic theory behind text data, text mining, and various tools and techniques available to solve and visualize their research problems.
