Looking for Love in the Legal Discourse of Marriage Renata Grossi,2014-09-01 This book examines the (in)visibility of romantic love in the legal discourse surrounding modern Australian marriage. It looks at how romantic love has become a core part of modernity, and a dominant part of the Western marriage discourse, and considers how the ideologies of romantic love are (or are not) replicated in the legal meaning of marriage. This examination raises two key issues. If love has become central to people's understanding of marriage, then it is important for the legitimacy of law that love is reflected in both the content and application of the law. More fundamentally, it requires us to reconsider how we understand law, and to ask whether it is engaged with emotions, or separate from them. Along the way this book also considers the meaning of love itself in contemporary society, and asks whether love is a radical force capable of breaking down conservative meanings embedded in institutions like marriage, or whether it simply mirrors them. This book will be of interest to everyone working on love, marriage and sexuality in the disciplines of law, sociology and philosophy.

Blind Conscience Margot O'Neill, 2008 Mandatory detention of asylum-seekers has been a prominent public issue for almost a decade. It has created an industry, provoked shame and anger across society, been manipulated politically by all sides and has prompted many to become actively involved in campaigns in support of asylum-seekers. The government's recent response to the crisis precipitated by the arrivial of the West Papuans and the widespread protest that followed show that the refugee crisis is not over. Nevertheless the prospects for incarcerated asylum-seekers have improved markedly since the intervention of Petro Georgeiou and other federal Liberal backbenchers. This shift and the time that has passed since the Tampa incident, children overboard and near saturation coverage of individual asylum-seekers provide the opportunity for some reflection. Margot O'Neill has covered many angles of the story herself, but writes now about the way Australian society at large was affected. She uses individuals - activists, psychiatrists, lawyers, politicians, prison guards - with direct experience to tell the broader story. This gives the book a strong narrative drive and a powerful emotional charge.--Provided by publisher.

Minority Policy Brenton Prosser, Richard Denniss, 2015-03-02 Topical and up to the minute, Minority Policy: Rethinking governance when parliament matters explores the influence of marginal parliamentarians both within the major parties and on the cross benches in the formations of contemporary public policy. Despite Australia having minority government in some form for almost three decades, in theoretical and popular terms it seems that this nation has not yet come to terms with minority as the new norm. Further, prominent policy cycle theory overlooks the subtle but significant influence of marginal parliamentarians on public policy. This book argues that these influences not only have important implications for the outcomes of public policy, but also the work of policy scholars, departmental policy makers and policy advocates. Drawing on the experiences of two former policy advisers who have worked at the coalface of policy-making, as well as on examples from the last two parliaments, Minority Policy takes the discussion up to and beyond the introduction of the new Senate in July 2014 to take in the significant impact of this much more complex Upper House.

Before and Beyond the 'Big Society' Joseph Forde,2022-05-26 John Milbank's theology has shaped much modern political thinking both within and without the Church. In Before and Beyond the 'Big Society', Joseph Forde presents the first study devoted exclusively to John Milbank's theology of welfare, and how it has influenced policy in the Church of England since 2008. By examining the favourable response the Church gave to the 'Big Society' project in 2010-12, Forde shows that Milbank's Blue Socialist fingerprint increasingly dominates. However, this theology has not evolved in a vacuum and Forde expertly places it in its historical and theoretical context. He offers a detailed critical discussion of Milbank's own critique of what has been the mainstream (Temple) Anglican theology of welfare in the Church of England since the 1940s, and a fresh contribution to the assessment of Anglican social theology. Finally, he demonstrates how Milbank's ideas have been furthered by other influential Anglicans. It is this influence that will carry the greatest implications for the Church of England's policy on welfare going forward, making this study relevant to all who care about its contribution to the provision of welfare.

Remote Freedoms Sarah E. Holcombe, 2018-07-10 What does it mean to be a rights-holder and how does it come about? Remote Freedoms explores the contradictions and tensions of localized human rights work in very remote Indigenous communities. Based on field research with Anangu of Central Australia, this book investigates how universal human rights are understood, practiced, negotiated, and challenged in concert and in conflict with Indigenous rights. Moving between communities, government, regional NGOs, and international UN forums, Sarah E. Holcombe addresses how the notion of rights plays out within the distinctive and ambivalent sociopolitical context of Australia, and focusing specifically on Indigenous women and their experiences of violence. Can the secular modern rights-bearer accommodate the ideals of the relational, spiritual Anangu person? Engaging in a translation of the Universal Declaration of Human Rights into the local Pintupi-Luritja vernacular and observing various Indigenous interactions with law enforcement and domestic violence outreach programs, Holcombe offers new insights into our understanding of how the global rights discourse is circulated and understood within Indigenous cultures. She reveals how, in the postcolonial Australian context, human rights are double-edged: they enforce assimilation to a neoliberal social order at the same time that they empower and enfranchise the Indigenous citizen as a political actor. Remote Freedoms writes Australia's Indigenous peoples into the international debate on localizing rights in multicultural terms.

An Introduction to Australian Public Policy Sarah Maddison, Richard Denniss, 2013-02-13 Examines the models, influences and players that shape public policy in Australia, addressing both theory and real-world challenges. Strategic Information Systems: Concepts, Methodologies, Tools, and Applications Hunter, M. Gordon, 2009-08-31 This 4-volume set provides a compendium of comprehensive advanced research articles written by an international collaboration of experts involved with the strategic use of information systems--Provided by publisher.

International Students in the Asia Pacific Peter Kell, Gillian Vogl, 2012-02-27 This book documents the growing mobility of international students in the Asia Pacific. International students comprise over 2.7m students and it is estimated by the OECD that this will top 8 million in 2020. The great majority of them are students from the Asian countries who study in the Europe, North America and Asia. In addition countries such as Singapore, Malaysia and Hong Kong are becoming "education hubs" and are proposing to attract international students. Over 42% of international students come from Asia and this is predicted to continue with the strong presence of students from China, India, Korea and Japan continuing. A younger population, a growing middle class and shortages of quality education providers in the Asia Pacific region means that this mobility will be a feature of the future. This book

explores questions around the mobility of international students in the context of the global economy and an increasingly competitive trans-national education market. It also explores questions about the experience of international students principally from the Asia Pacific region at a time of increased global insecurity and growing hostile reactions to foreigners in the post September 11th era. This book emerges from empirical work from several research projects funded by the World Bank and several community projects to support international students. The focus is also on the way in which student mobility promotes growing connection within the Asia Pacific, as well as other regions, and provides the foundations for new notions of global citizenships.

Restart. Sport After the Covid-19 Time Out Jörg Krieger, April Henning, Lindsay Parks Pieper, 2022-11-11 In the edited collection Restart: Sport After the Covid-19 Time Out, practitioners and international scholars explore the "restart" of sport and fitness following the initial period of lockdowns during spring 2020. The chapters provide insight into the sport and fitness landscape following the initial wave of the pandemic. The book focuses on challenges for sport providers, consequences for sporting participants, and opportunities for new ways of practicing sports. It contributes contemporaneous data, analyses, and insights into the global sport landscape that has been impacted by the Covid-19 pandemic. This book presents a variety of interdisciplinary perspectives in a total of nineteen individual chapters, organized around five main themes. The first four chapters deal with the restart of sporting events in four countries. This section is followed by an assessment of the Olympic Movement's challenges after its postponement of the 2020 Summer Olympic Games to 2021. Chapters in the next theme provide analyses of how national governments handled restarting sport and fitness in different geographical locations. Finally, the last three chapters look at the role of the media during the restart phase, both in reporting sport and with regards to innovations and the implementation of new technology in staging and broadcasting elite sport.

The Routledge Handbook of Environment and Communication Anders Hansen, Robert Cox, 2015-03-05 This Handbook provides a comprehensive statement and reference point for theory, research and practice with regard to environment and communication, and it does this from a perspective which is both international and multidisciplinary in scope. Offering comprehensive critical reviews of the history and state of the art of research into the key dimensions of environmental communication, the chapters of this handbook together demonstrate the strengths of multi-disciplinary and cross-disciplinary approaches to understanding the centrality of communication to how the environment is constructed, and indeed contested, socially, politically and culturally. Organised in five thematic sections, The Routledge Handbook of Environment and Communication includes contributions from internationally recognised leaders in the field. The first section looks at the history and development of the discipline from a range of theoretical perspectives. Section two considers the sources, communicators and media professionals involved in producing environmental communication. Section three examines research on news, entertainment media and cultural representations of the environment. The fourth section looks at the social and political implications of environmental communication, with the final section discussing likely future trajectories for the field. The first reference Handbook to offer a state of the art comprehensive overview of the emerging field of environmental communication research, this authoritative text is a must for scholars of environmental communication across a range of disciplines, including environmental studies, media and communication studies, cultural studies and related disciplines.

Warning Sophie Cunningham, 2014-07-23 Warning is the definitive account of one of the most frightening extreme weather events our country has ever seen. When Cyclone Tracy swept down on Darwin at Christmas 1974, the weather became not just a living thing but a killer. Tracy destroyed an entire city, left seventy-one people dead and ripped the heart out of Australia's season of goodwill. For the fortieth anniversary of the nation's most iconic natural disaster, Sophie Cunningham has gone back to the eyewitness accounts of those who lived through the devastation, and those who faced the heartbreaking clean-up and the back-breaking rebuilding. From the quiet stirring of the service-station bunting that heralded the catastrophe to the wholesale slaughter of the dogs that followed it, Cunningham brings to the tale a novelist's eye for detail and an exhilarating narrative drive. And a sober appraisal of what Tracy means to us now, as we face more - and more destructive - extreme weather with every year that passes. Compulsively readable and undeniably moving, Warning is the essential non-fiction book of 2014. Sophie Cunningham is the author of two novels, Geography (2004) and Bird (2008) and the non-fiction Melbourne (UNSW Press, 2011). She is a former editor of Meanjin and was until recently the chair of the Australia Council's Literature Board. 'The strength and beauty of this book is the way it delves into the lives of the people affected and tries to understand their responses, their courage and their failings. Cunningham argues that these kinds of natural disasters are going to become more prevalent as the effects of climate change make extreme weather conditions more likely. This book is no polemic: it's a gripping and visceral tale.' Mark Rubbo, Readings 'Highly accomplished...compelling.' Age/SMH 'Cunningham has pieced together a pacey and energetic insight into the build up, experience and aftermath of the cyclone...It's a great read and, given the subject, it is strangely hopeful.' Big Issue 'Along with an eye for good stories and a knack for telling them, Sophie Cunningham brings a contextualising political intelligence. What she is interested in is how natural disasters are also social and political events, and the period details amount to more than the sideburns and lairy shirts...What happens in natural disasters depends on how communities work; the effects and aftermaths of those disasters are in fact manmade. As the future promises more and more extreme weather events whose causes as well as effects are anthropogenic, Cunningham's gripping book contributes to new ways of thinking about them.' Sunday Age/Sun Herald 'Sophie Cunningham has done a tremendous job in gathering the voices - from then and now - of those who were there and during the clean-up [of Cyclone Tracy]. The result is vivid storytelling, gripping from beginning to end.' Townsville Bulletin/Cairns Post 'Warning: The Story of Cyclone Tracy is a brilliant book and on the anniversary of such devastation, it is a timely reminder to cherish everything you have in your life because in one night it could all be blown away.' On Doubt Leigh Sales,2020-02-25 Acclaimed journalist Leigh Sales has her doubts, and thinks you should, too. Her classic personal essay carries a message of truth, scrutiny and accountability-a much-needed pocket-sized antidote to fake news. Donald Trump, the post-truth world and the instability of Australian politics are all examined in this fresh take on her prescient essay on the media and political trends that define our times.

Offshore Madeline Gleeson, 2016-05-01 What has happened on Nauru and Manus since Australia began its most recent offshore processing regime in 2012? This essential book provides a comprehensive and uncompromising overview of the first three years of offshore processing since it recommenced in 2012. It explains why offshore processing was re-established, what life is like for asylum seekers and refugees on Nauru and Manus, what asylum seekers, refugees and staff in the offshore detention centres have to say about what goes on there, and why the truth has

been so hard to find. In doing so, it goes behind the rumours and allegations to reveal what is known — and what still is not known — about Australia's offshore detention centres.

Natural Resources and Environmental Justice Sonia Graham, Anna Lukasiewicz, Stephen Dovers, Libby Robin, Jennifer McKay, Steven Schilizzi, 2017-03-01 Environmental management involves making decisions about the governance of natural resources such as water, minerals or land, which are inherently decisions about what is just or fair. Yet, there is little emphasis on justice in environmental management research or practical guidance on how to achieve fairness and equity in environmental governance and public policy. This results in social dilemmas that are significant issues for government, business and community agendas, causing conflict between different community interests. Natural Resources and Environmental Justice provides the first comprehensive, interdisciplinary examination of justice research in Australian environmental management, identifying best practice and current knowledge gaps. With chapters written by experts in environmental and social sciences, law and economics, this book covers topical issues, including coal seam gas, desalination plants, community relations in mining, forestry negotiations, sea-level rise and animal rights. It also proposes a social justice framework and an agenda for future justice research in environmental management. These important environmental issues are covered from an Australian perspective and the book will be of broad use to policy makers, researchers and managers in natural resource management and governance, environmental law, social impact and related fields both in Australia and abroad.

On Aunty Jonathan Holmes, 2020-03-31 Australia's public broadcaster, 'Aunty', is about to turn 90, yet your ABC has seldom been in this much trouble: budget cuts, ferocious political pressure, sagging staff morale, leadership chaos and hostile commercial rivals. Meanwhile audiences are deserting broadcast TV and radio. What is the ABC's place in this era of media disruption? Can it reach a younger audience on new platforms while still satisfying its loyal fans?

Global China Tarun Chhabra, Rush Doshi, Ryan Hass, Emilie Kimball, 2021-06-22 The global implications of China's rise as a global actor In 2005, a senior official in the George W. Bush administration expressed the hope that China would emerge as a "responsible stakeholder" on the world stage. A dozen years later, the Trump administration dramatically shifted course, instead calling China a "strategic competitor" whose actions routinely threaten U.S. interests. Both assessments reflected an underlying truth: China is no longer just a "rising" power. It has emerged as a truly global actor, both economically and militarily. Every day its actions affect nearly every region and every major issue, from climate change to trade, from conflict in troubled lands to competition over rules that will govern the uses of emerging technologies. To better address the implications of China's new status, both for American policy and for the broader international order, Brookings scholars conducted research over the past two years, culminating in a project: Global China: Assessing China's Growing Role in the World. The project is intended to furnish policy makers and the public with hard facts and deep insights for understanding China's regional and global ambitions. The initiative draws not only on Brookings's deep bench of China and East Asia experts, but also on the tremendous breadth of the institution's security, strategy, regional studies, technological, and economic development experts. Areas of focus include the evolution of China's domestic institutions; great power relations; the emergence of critical technologies; Asian security; China's influence in key regions beyond Asia; and China's impact on global governance and norms. Global China: Assessing China's Growing Role in the World provides the most current, broad-scope, and fact-based assessment of the implications of China's rise for the United States and the rest of the world.

Beyond the Hijab Debates Tanja Dreher, Christina Ho, 2009-03-26 Headscarves in schools. Ethnic gang rapists. Domestic violence in Indigenous communities. Polygamy. Sharia law. It seems that in public debates around the world, concerns about marginalised communities often revolve around issues of gender and women's rights. Yet all too often, discussions about complex matters are reduced to simplistic debates such as "hijab: to ban or not to ban?" or "Muslim women: oppressed or liberated?". This collection provides a space for in-depth analyses on the politics of gender, race and religion. As well as critical reflections on images and experiences of Muslim women, chapters also explore the relationships between gender, violence and protection, and offer innovative possibilities for intellectual and practical understandings at the intersection of gender, race and religion. Essential reading for scholars and students of gender and women's studies, cultural studies, racial and ethnic studies, religious studies and an educated public interested in understanding the challenges and possibilities of tackling both racism and the oppression of women.

Community, Economy and COVID-19 Clifford J. Shultz, II, Don R. Rahtz, M. Joseph Sirgy, 2022-08-23 This volume explores the impact of the COVID-19 pandemic on the health, safety, and socioeconomic well-being of community residents of selected countries around the world. It is built on an overarching framework of studying community well-being, applied here to the analyses of one of the most significant crises of our time. Most important are the lessons learned from the experiences in these countries — including insights and recommendations on how to mitigate future pandemics. Building on years of research, each chapter is written by an accomplished scholar with interests and expertise on various assessments of community well-being development in the country of study. The authors share cases and analyses, and highlight failures and successes; they offer sound policy recommendations on how to restore the health, safety, and multidimensional wellness of community residents, and how to decrease the likelihood and impact of future crises. Some of the policy recommendations in this multi-country compendium can be used to assist crisis prevention and recovery, beyond pandemics. The volume shows how the lessons learned and shared from community responses to the pandemic can provide critical and useful policy insights to shape best practices in mitigating other disasters like hurricanes, floods, earthquakes, tornadoes, wars, riots, acts of domestic and international terrorism, weapons of mass destruction and industrial accidents. This is a must-read for researchers across the social sciences, health sciences, and management studies, and for government and nongovernment professionals involved in community health and well-being.

Border Security Peter Chambers, 2017-09-27 What kind of a world is one in which border security is understood as necessary? How is this transforming the shores of politics? And why does this seem to preclude a horizon of political justice for those affected? Border Security responds to these questions through an interdisciplinary exploration of border security, politics and justice. Drawing empirically on the now notorious case of Australia, the book pursues a range of theoretical perspectives — including Foucault's work on power, the systems theory of Niklas Luhmann and the cybernetic ethics of Heinz Von Foerster — in order to formulate an account of the thoroughly constructed and political nature of border security. Through this detailed and critical engagement, the

book's analysis elicits a political alternative to border security from within its own logic: thus signaling at least the beginnings of a way out of the cost, cruelty and devaluation of life that characterises the enforced reality of the world of border security.
