Anthropometry and Biomechanics Ronald Easterby, 2012-12-06 Assessment of the physical dimensions of the human body and application of this knowledge to the design of tools, equipment, and work are certainly among the oldest arts and sciences. It would be an easy task if all anthropometric dimensions, of all people, would follow a general rule. Thus, philosophers and artists embedded their ideas about the most aesthetic proportions into ideal schemes of perfect proportions. Golden sections were developed in ancient India, China, Egypt, and Greece, and more recently by Leonardo DaVinci, or Albrecht Durer. However, such canons are fictive since actual human dimensions and proportions vary greatly among individuals. The different physical appearances often have been associated with mental, physiological and behavioral characteristics of the individuals. Hypocrates (about 460-377 BC) taught that there are four temperaments (actually, body fluids) represented by four body types. The psychiatrist Ernst Kretschmer (1888-1964) proposed that three typical somatypes (pyknic, athletic, asthenic) could reflect human character traits. Since the 1940's, W. H. Sheldon and his coworkers devised a system of three body physiques (endo-, meso-, ectomorphic). The classification was originally qualitative, and only recently has been developed to include actual measurements.

Citizen-Protectors Jennifer Carlson, 2015-04-01 From gang- and drug-related shootings to mass shootings in schools, shopping centers, and movie theatres, reports of gun crimes fill the headlines of newspapers and nightly news programs. At the same time, a different kind of headline has captured public attention: a steady surge in pro-gun sentiment among Americans. In *Citizen-Protectors*, Jennifer Carlson offers a compelling portrait of gun carriers, shedding light on Americans' complex relationship with guns. Delving headlong into the world of guns, Carlson participated in firearms training classes, attending pro-gun events, and carried a firearm herself. Through these experiences, she explores the role guns play in the lives of Americans who carry them and shows how, against a backdrop of economic insecurity and social instability, gun carrying becomes a means of being a good citizen. A much-needed counterpoint to the rhetorical battles over gun control, *Citizen-Protectors* is a captivating and revealing look at gun culture in America, and a must-read for anyone with a stake in this heated debate.

Halfway Home Reuben Jonathan Miller, 2021-02-02 A persuasive and essential (Matthew Desmond) work that will forever change how we look at life after prison in America through Miller's stunning, and deeply painful reckoning with our nation's carceral system (Heather Ann Thompson). Each year, more than half a million Americans are released from prison and join a population of twenty million people who live with a felony record. Reuben Miller, a chaplain at the Cook County Jail in Chicago and now a sociologist studying mass incarceration, spent years alongside prisoners, ex-prisoners, their friends, and their families to understand the lifelong burden that even a single arrest can entail. What his work revealed is a simple, if overlooked truth: life after incarceration is its own form of prison. The idea that one can serve their debt and return to life as a full-fledge member of society is one of America's most nefarious myths. Recently released individuals are faced with jobs that are off-limits, apartments that cannot be occupied and votes that cannot be cast. As

The Color of Law exposed about our understanding of housing segregation, Halfway Home shows that the American justice system was not created to rehabilitate. Parole is structured to keep classes of Americans impoverished, unstable, and disenfranchised long after they've paid their debt to society. Informed by Miller's experience as the son and brother of incarcerated men, captures the stories of the men, women, and communities fighting against a system that is designed for them to fail. It is a poignant and eye-opening call to arms that reveals how laws, rules, and regulations extract a tangible cost not only from those working to rebuild their lives, but also our democracy. As Miller searchingly explores, America must acknowledge and value the lives of its formerly imprisoned citizens. Guilty People Abbe Smith, 2020-01-17 Criminal defense attorneys protect the innocent and guilty alike, but, the majority of criminal defendants are guilty. This is as it should be in a free society. Yet there are many different types of crime and degrees of guilt, and the defense must navigate through a complex criminal justice system that is not always equipped to recognize nuances. In *Guilty People*, law professor and longtime criminal defense attorney Abbe Smith gives us a thoughtful and honest look at guilty individuals on trial. Each chapter tells compelling stories about real cases she handled; some of her clients were guilty of only petty crimes and misdemeanors, while others committed offenses as grave as rape and murder. In the process, she answers the question that every defense attorney is routinely asked: How can you represent these people? Smith's answer also tackles seldom-addressed but equally important questions such as: Who are the people filling our nation's jails and prisons? Are they as dangerous and depraved as they are usually portrayed? How did they get caught up in the system? And what happens to them there? This book challenges the assumption that the guilty are a separate species, unworthy of humane treatment. It is dedicated to guilty people—every single one of us.

Semiconductor Packaging Andrea Chen, Randy Hsiao-Yu Lo, 2016-04-19 In semiconductor manufacturing, understanding how various materials behave and interact is critical to making a reliable and robust semiconductor package. *Semiconductor Packaging: Materials Interaction and Reliability* provides a fundamental understanding of the underlying physical properties of the materials used in a semiconductor package. By tying together the disparate elements essential to a semiconductor package, the authors show how all the parts fit and work together to provide durable protection for the integrated circuit chip within as well as a means for the chip to communicate with the outside world. The text also covers packaging materials for MEMS, solar technology, and LEDs and explores future trends in semiconductor packages.

Chicago Sociology Jean-Michel Chapoulie,2020-09-01 Known for its pioneering studies of urban life, immigration, and criminality using the "city as laboratory," the so-called Chicago school of sociology has been a dominant presence in American social science since it emerged around the University of Chicago in the early decades of the twentieth century. Canonical figures such as Robert Park, Everett Hughes, Howard S. Becker, and Erving Goffman established foundational principles of how to conduct social research. This groundbreaking book on the development and influence of the Chicago tradition, first published in 2001, became an immediate classic in France, where Chicago sociology has exerted significant appeal. Drawing on deep archival research and interviews with members of the tradition, Jean-Michel Chapoulie interrogates evidence with a historian's eye and recognizes the profound effects that culture, society, and the economy have on individuals and institutions. His study is a fine-grained and panoramic portrait of the complex and interlocking factors that gave rise to the research interests and methodologies that characterized the Chicago tradition in the 1920s and that contributed to rises and falls in its predominance in American sociology over the following decades. Now revised and available for the first time in English, Chicago Sociology provides a unique perspective on the history of social science in the twentieth century. A foreword by William Kornblum places Chapoulie's work in context and addresses recent critical challenges to the Chicago school and its origins.

Unequal Profession Meera E Deo, 2019-02-05 A study of the experiences of women of color law school faculty and the effect of race and gender on legal education. This book is the first formal, empirical investigation into the law faculty experience using a distinctly intersectional lens, examining both the personal and professional lives of law faculty members. Comparing the professional and personal experiences of women of color professors with white women, white men, and men of color faculty from assistant professor through dean emeritus, *Unequal Profession* explores how the race and gender of individual legal academics affects not only their individual and collective experience, but also legal education as a whole. Drawing on quantitative and qualitative empirical data, Meera E. Deo reveals how race and gender intersect to create profound implications for women of color law faculty members, presenting unique challenges as well as opportunities to improve educational and professional outcomes in legal education. Deo shares the powerful stories of law faculty who find themselves confronting intersectional discrimination and implicit bias in the form of silencing, mansplaining, and the presumption of incompetence, to name a few. Through hiring, teaching, colleague interaction, and tenure and promotion, Deo brings the experiences of diverse faculty to life and proposes several mechanisms to increase diversity within legal academia and to improve the experience of all faculty members. Praise for *Unequal Profession* “Fascinating, shocking, and infuriating, Meera Deo’s careful qualitative research exposes the institutional practices and cultural norms that maintain a separate and unequal race-gender order even within the privileged ranks of tenure-track law professors. With riveting quotes from faculty across a range of institutional and social positions, *Unequal Profession* powerfully reminds us that we must do better. I saw my own career in this book—and you might, too.” —Angela P. Harris, University of California, Davis “A powerful account of inequality in legal academia. Quantitative data and compelling narratives bring to life the challenges and roadblocks in gaining not just entry and tenure but also respect for the voices of minority women within the academy. There are no easy remedies, but reading this book is a good place to start for lawyers and law professors to understand what minority women face and which practices can increase the odds of success.” —Bryant G. Garth, University of California, Irvine “*Unequal Profession* should be mandatory reading for everyone in legal academia . . . By providing concrete evidence of systemic discrimination, Meera Deo illuminates a long-standing problem needing to be remedied.” —Sarah Deer, University of Kansas
