Oncologic Therapies Everett E. Vokes, Harvey M. Golomb, 2002-11-21 This second edition has been updated in a user-friendly layout that makes its comprehensive information extremely accessible. The handbook, written for all physicians who treat cancer patients, provides a survey of current therapeutic concepts of solid tumors and hematologic malignancies in internal oncology. Each individual chapter of this shortened new edition is structured in the same way and features a brief outline or tabular summary of the main aspects of epidemiology, pathology, staging, and diagnosis. The main focus is on the therapeutic strategy, i.e., an interdisciplinary approach to systemic drug therapy. Surgical and radiological concepts of treatment are also covered, as are supportive care, pain relief methods and ethical problems. This title is a must for clinicians and practitioners as well as interns, residents and postgraduate students.

Clinical Nuclear Medicine Hans-Jürgen Biersack, Leonard M. Freeman, 2008-01-03 This work has true international scope, being a unique European/American joint venture that focuses on the state of the art in both diagnostic and therapeutic radionuclide methodology. Crusoe's Books Bill Bell,2022-01-13 This is a book about readers on the move in the age of Victorian empire. It examines the libraries and reading habits of five reading constituencies from the long nineteenth century: shipboard emigrants, Australian convicts, Scottish settlers, polar explorers, and troops in the First World War. What was the role of reading in extreme circumstances? How were new meanings made under strange skies? How was reading connected with mobile communities in an age of expansion? Uncovering a vast range of sources from the period, from diaries, periodicals, and literary culture, Bill Bell reveals some remarkable and unanticipated insights into the way that reading operated within and upon the British Empire for over a century.
