

About Alcohol Deaths 10

Victor R. Preedy,Ronald Ross Watson

Global Status Report on Alcohol and Health 2018 World Health Organization,2019-02-14 The report provides an overview of alcohol consumption and harms in relation to the UN Sustainable Development Goals (Chapter 1) presents global strategies action plans and monitoring frameworks (Chapter 2) gives detailed information on: the consumption of alcohol in populations (Chapter 3); the health consequences of alcohol consumption (Chapter 4); and policy responses at national level (Chapter 5). In its final chapter 6 the imperative for reducing harmful use of alcohol in a public health perspective is presented. In addition the report contains country profiles for WHO Member States and appendices with statistical annexes a description of the data sources and methods used to produce the estimates and references.

Measuring Alcohol Consumption Raye Z. Litten,John P. Allen,2012-12-06 The Importance of Measuring Alcohol Consumption To date, alcohol studies have attended far more to issues of alcohol dependence and the harmful consequences of drinking than to the level of alcohol consumption itself. This is, perhaps, not surprising since dependence on alcohol is believed to constitute a meaningful and distinct medical syndrome, regardless of the level of alcohol consumption associated with it (Edwards and Gross, 1976). Also, of society is generally more concerned with the adverse consequences drinking (e. g. , traffic fatalities, homelessness, health care and legal expenses, and academic/behavioral problems in young drinkers), than with the quantity of alcohol actually consumed. Nevertheless, accurate assessment of alcohol usage is important in its own right in at least four contexts: 1. Evaluating the effectiveness of alcoholism and alcohol abuse treatment and prevention efforts. Such efforts include both applied evaluations of existing programs and formal, well-controlled efficacy studies on experimental interventions. These investigations require rigorous methodologies to assess outcomes precisely and contrast what may be quite subtle differences between programs and between pre treatment and posttreatment outcomes. Although these studies are usually characterized by the employment of multiple measures of success-including general improvements in social and physical functioning, reduction in degree of dependence, and resolution of problems directly resultant from drinking-it is by their assessment of changes in drinking behavior that they are potentially able to achieve the highest level of objectivity and exactitude.

Reducing Underage Drinking Institute of Medicine,National Research Council,Division of Behavioral and Social Sciences and Education,Board on Children, Youth, and Families,Committee on Developing a Strategy to Reduce and Prevent Underage Drinking,2004-03-26 Alcohol use by young people is extremely dangerous - both to themselves and society at large. Underage alcohol use is associated with traffic fatalities, violence, unsafe sex, suicide, educational failure, and other problem behaviors that diminish the prospects of future success, as well as health risks - and the earlier teens start drinking, the greater the danger. Despite these serious concerns, the media continues to make drinking look attractive to youth, and it remains possible and even easy for teenagers to get access to alcohol. Why is this dangerous behavior so pervasive? What can be done to prevent it? What will work and who is responsible for making sure it happens? Reducing Underage Drinking addresses these questions and proposes a new way to combat underage alcohol use. It explores the ways in which may different individuals and groups contribute to the problem and how they can be enlisted to prevent it. Reducing Underage Drinking will serve as both a game plan and a call to arms for anyone with an investment in youth health and safety.

Alcohol in America United States Department of Transportation,National Research Council,Division of Behavioral and Social Sciences and Education,Commission on Behavioral and Social Sciences and Education,Elizabeth Hanford Dole,Dean R. Gerstein,Steve Olson,1985-02-01 Alcohol is a killer-1 of every 13 deaths in the United States is alcohol-related. In addition, 5 percent of the population consumes 50 percent of the alcohol. The authors take a close look at the problem in a classy little study, as The Washington Post called this book. The Library Journal states, ...[T]his is one book that addresses solutions....And it's enjoyably readable....This is an excellent review for anyone in the alcoholism prevention business, and good background reading for the interested layperson. The Washington Post agrees: the book ...likely will wind up on the bookshelves of counselors, politicians, judges, medical professionals, and law enforcement officials throughout the country.

Alcohol and Public Policy National Research Council,Division of Behavioral and Social Sciences and Education,Commission on Behavioral and Social Sciences and Education,Assembly of Behavioral and Social Sciences,Committee on Substance Abuse and Habitual Behavior,Panel on Alternative Policies Affecting the Prevention of Alcohol Abuse and Alcoholism,1981-02-01

Global Status Report on Alcohol and Health, 2014 World Health Organization,2014-04-30 This publication presents a comprehensive perspective on the worldwide, regional and country consumption of alcohol, patterns of drinking, health consequences and policy responses in member states. It represents a continuing effort by WHO to support member states with global information in their efforts to reduce the harmful use of alcohol and its health and social consequences.--Publisher's description.

Alcohol Research & Health ,2002

Global Strategy to Reduce the Harmful Use of Alcohol World Health Organization,2010 Every year, the harmful use of alcohol kills 2.5 million people, including 320,000 young people between 15 and 29 years of age. It is the eighth leading risk factor for deaths globally, and harmful use of alcohol was responsible for almost 4% of all deaths in the world, according to the estimates for 2004. In addition to the resolution, a global strategy developed by WHO in close collaboration with Member States provides a portfolio of policy options and interventions for implementation at the national level with the goal to reduce the harmful use of alcohol worldwide. Ten recommended target areas for policy options include health services' responses, community action, pricing policies and reducing the public health impact of illicit alcohol and informally produced alcohol. WHO was also requested to support countries in implementing the strategy and monitor progress at global, regional and national levels.

Heavy Drinking Herbert Fingarette,1989-06-21 Heavy Drinking informs the general public for the first time how recent research has discredited almost every widely held belief about alcoholism, including the very concept of alcoholism as a single disease with a unique cause. Herbert Fingarette presents constructive approaches to heavy drinking, including new methods of helping heavy drinkers and social policies for preventing heavy drinking and the harms associated with it.

Paying the Tab Philip J. Cook,2011-06-27 What drug provides Americans with the greatest pleasure and the greatest pain? The answer, hands down, is alcohol. The pain comes not only from drunk driving and lost lives but also addiction, family strife, crime, violence, poor health, and squandered human potential. Young and old, drinkers and abstainers alike, all are affected. Every American is paying for alcohol abuse. Paying the Tab, the first comprehensive analysis of this complex policy issue, calls for broadening our approach to curbing destructive drinking. Over the last few decades, efforts to reduce the societal costs--curbing youth drinking and cracking down on drunk driving--have been somewhat effective, but woefully incomplete. In fact, American policymakers have ignored the influence of the supply side of the equation. Beer and liquor are far cheaper and more readily available today than in the 1950s and 1960s. Philip Cook's well-researched and engaging account chronicles the history of our attempts to legislate morality, the overlooked lessons from Prohibition, and the rise of Alcoholics Anonymous. He provides a thorough account of the scientific evidence that has accumulated over the last twenty-five years of economic and public-health research, which demonstrates that higher alcohol excise taxes and other supply restrictions are effective and underutilized policy tools that can cut abuse while preserving the pleasures of moderate consumption. Paying the Tab makes a powerful case for a policy course correction. Alcohol is too cheap, and it's costing all of us.

Alcohol: No Ordinary Commodity Thomas F. Babor,Thomas Babor,2010-02-25 From a public health perspective, alcohol is a major contributor to morbidity and mortality, and impacts on many aspects of social life. This text describes advances in alcohol research with direct relevance to the development of effective policies at local, national and international level.

Deaths of Despair and the Future of Capitalism Anne Case,Angus Deaton,2021-03-02 A New York Times Bestseller A Wall Street Journal Bestseller A New York Times Notable Book of 2020 A New York Times Book Review Editors' Choice Shortlisted for the Financial Times and McKinsey Business Book of the Year A New Statesman Book to Read From economist Anne Case and Nobel Prize winner Angus Deaton, a groundbreaking account of how the flaws in capitalism are fatal for America's working class Deaths of despair from suicide, drug overdose, and alcoholism are rising dramatically in the United States, claiming hundreds of thousands of American lives. Anne Case and Angus Deaton explain the overwhelming surge in these deaths and shed light on the social and economic forces that are making life harder for the working class. As the college educated become healthier and wealthier, adults without a degree are literally dying from pain and despair. Case and Deaton tie the crisis to the weakening position of labor, the growing power of corporations, and a rapacious health-care sector that redistributes working-class wages into the pockets of the wealthy. This critically important book paints a troubling portrait of the American dream in decline, and provides solutions that can rein in capitalism's excesses and make it work for everyone.

The American Psychiatric Association Practice Guideline for the Pharmacological Treatment of Patients With Alcohol Use Disorder American Psychiatric Association,2018-01-11 The guideline focuses specifically on evidence-based pharmacological treatments for AUD in outpatient settings and includes additional information on assessment and treatment planning, which are an integral part of using pharmacotherapy to treat AUD.

Premature Death in the New Independent States National Research Council,Division of Behavioral and Social Sciences and Education,Commission on Behavioral and Social Sciences and Education,Committee on Population,1997-05-27 In recent years there have been alarming reports of rapid decreases in life expectancy in the New Independent States (former members of the Soviet Union). To help assess priorities for health policy, the Committee on Population organized two workshops--the first on adult mortality and disability, the second on adult health priorities and policies. Participants included demographers, epidemiologists, public health specialists, economists, and policymakers from the NIS countries, the United States, and Western Europe. This volume consists of selected papers presented at the workshops. They assess the reliability of data on mortality, morbidity, and disability; analyze regional patterns and trends in mortality rates and causes of death; review evidence about major determinants of adult mortality; and discuss implications for health policy.

Supporting People Bereaved through a Drug- or Alcohol-Related Death Peter Cartwright,2020-09-21 This pioneering book provides guidance for those helping bereaved adults through the process of grieving loved ones who died as a result of substance use. People bereaved in this manner require very specific support through these unique circumstances, and this book contains contributions from a range of leading experts in the field on how to help people bereaved in this way, with examples of good practice. It combines theory, research and practice in a straightforward and untechnical way, clearly describing the complex, severe nature of these bereavements and how to support bereaved people through this complex grieving process. The book also explains bereavement, substance use and how addictive substance use can affect a family, and provides comprehensive case studies that illustrate how to support and counsel. Rooted in specialist professional experience, this is the indispensable guide for all those whose work involves supporting these bereaved people, as well as being of interest to those bereaved this way and their family, friends and

colleagues who may be supporting them.
