Handbook of Open, Distance and Digital Education Olaf Zawacki-Richter,Insung Jung,2023-01-01 This open access handbook offers a one-stop-shop for both new and established researchers, educators, policy makers and administrators in the field of open, distance and digital education (ODDE) to gain a comprehensive overview of the history, theory and practice at all levels of ODDE, and at the same time stimulates in-depth discussions on various themes and issues of ODDE for today and future. Researchers, scholars and students in the field of ODDE can use this handbook as a major reference to conduct their own research and learning agendas. To cover the field comprehensively, the handbook is structured following the 3M framework developed by one of the chief editors Zawacki-Richter. The 3M framework categorizes the major research areas and issues in ODDE on three levels. Accordingly, the handbook is divided into six sections in total, two section at each of the three levels: 1) Macro Level - ODDE Systems and Theories, 2) Meso Level - Institutional Perspectives, Management and Organization, and 3) Micro Level - Learning and Teaching in ODDE. This is an open access book.

Technology-Enhanced Learning and the Virtual University Michael David Sankey,Henk Huijser,Rachel Fitzgerald,2023-10-22 Since the first works on Higher Education Administration in the 1970s no comprehensive work in terms of purpose and scope of Higher Education has been published. There have been important changes in people's aspirations vis-à-vis higher education globally. In parallel, the higher education systems, worldwide, have been undergoing constant transformation in response to these aspirations. From governments, employers and prospective students and their parents, the stakeholders in higher education system are now extremely varied paying close attention to the various aspects of higher education - from infrastructure, on-campus safety and security to administration, faculty and curricula. The present series attempts to take into account the issues of importance to all the stakeholders. Hence the series not only pays attention to the purpose and outcomes of higher education but also the economics surrounding higher education vis a vis marketization. The nitty gritty of running and maintaining a university infrastructure,

impact of globalization and internationalization on delivery and demand of higher education, the commoditization of research, and changing paradigms of teaching and learning fall within the purview of the series. The increasing competition from other entities to provide degrees, certificates or other forms of credentials makes it important to have a work that brings all of the elements together to see how they actually interact and inter-relate from a systems perspective. The present series attempts to comprehensively attend to these issues and provide a complete reference resource to all those involved and interested in setting up of a Higher Education institution and its administration.
