Hereditary Hearing Loss and Its Syndromes Helga V. Toriello, Shelley D. Smith, 2013-06-20 This is the third edition of the foremost medical reference on hereditary hearing loss. Chapters on epidemiology, embryology, non-syndromic hearing loss, and syndromic forms of hearing loss have all been updated with particular attention to the vast amount of new information on molecular mechanisms, and chapters on clinical and molecular diagnosis and on genetic susceptibility to ototoxic factors have been added. As in previous editions, the syndromes are grouped by system (visual, metabolic, cardiologic, neurologic, musculoskeletal, endocrine, etc.), with each chapter written by a recognized expert in the field. Written for practicing clinicians, this volume is an excellent reference for physicians, audiologists, and other professionals working with individuals with hearing loss and their families, and can also serve as a text for clinical training programs and for researchers in the hearing sciences.

*Women of the Mediterranean* Monique Gadant, 1986

*Illinois Forms for Common Law and Chancery Pleading, Practice and Procedure in County and Probate Courts and in Criminal Cases* Edward Regnier Branson, 1914

*Alternative Splicing and Disease* Philippe Jeanteur, 2006-10-04 Splicing of primary RNA transcript is a quasi-systematic step of gene expression in higher organisms. This is the first book to highlight the medical implications, i.e. diseases, caused by alternative splicing. Alternative splicing not only vastly increases protein diversity but also offers numerous opportunities for aberrant splicing events with pathological consequences. The book also outlines possible targets for therapy.

*Protestant and Irish* Ida Milne, Ian D'Alton, 2019 In 1989 Edna Longley remarked that if Catholics were born Irish, Protestants had to 'work their passage to Irishness'. With eighteen essays by scholars with individual perspectives on Irish Protestant history, this book explores a number of those passages. Some were dead ends. Some led nowhere in particular. But others allowed southern Irish Protestants - those living in the Irish Free State and Republic - to make meaningful journeys through their own sense of Irishness. Through the lives and work, rest and play of Protestant participants in the new Ireland - sportsmen, academics, students, working class Protestants, revolutionaries, rural women, landlords, clerics - these essays offer refreshing interpretations as to what it meant to be Protestant and Irish in the changed political dispensation after Irish independence in 1922. While acknowledging that Protestant reactions were complex, ranging from 'keeping the head down' in a ghetto, through a sort of low-level loyalism, to out-and-out active republicanism, this book takes a fresh look at the positive contribution that many Protestants made to an Ireland that was their home and where they wanted to live. It wasn't always easy, and the very Catholic ethos of the State was often jarring and uncomfortable - but by and large Protestants reached an equitable accommodation with independent Ireland. The proof of that lies in a continued community vibrancy - in Bishop Hodges of Limerick's words in 1944, more than ever able 'to express a method of living valuable to the State'.
