Leaving Academia Christopher L. Catherine, 2020-09-15 A guide for grad students and academics who want to find fulfilling careers outside higher education. With the academic job market in crisis, 'Leaving Academia' helps grad students and academics in any scholarly field find satisfying careers beyond higher education. The book offers invaluable advice to visiting and adjunct instructors ready to seek new opportunities, to scholars caught in tenure-trap jobs, to grad students interested in nonacademic work, and to committed academics who want to support their students and contingent colleagues more effectively. Providing clear, concrete ways to move forward at each stage of your career change, even when the going gets tough, 'Leaving Academia' is both realistic and hopeful.

Dark Academia Peter Fleming, 2021-05-20 The unspoken, private and emotional underbelly of the neoliberal university

Academia's Golden Age Richard M. Freeland, 1992-04-23 This book examines the evolution of American universities during the years following World War II. Emphasizing the importance of change at the campus level, the book combines a general consideration of national trends with a close study of eight diverse

universities in Massachusetts. The eight are Harvard, M.I.T., Tufts, Brandeis, Boston University, Boston College, Northeastern and the University of Massachusetts. Broad analytic chapters examine major developments like expansion, the rise of graduate education and research, the professionalization of the faculty, and the decline of general education. These chapters also review criticisms of academia that arose in the late 1960s and the fate of various reform proposals during the 1970s. Additional chapters focus on the eight campuses to illustrate the forces that drove different kinds of institutions--research universities, college-centered universities, urban private universities and public universities--in responding to the circumstances of the postwar years.

Good Work If You Can Get It Jason Brennan, 2020-05-05 What does it really take to get a job in academia? Do you want to go to graduate school? Then you're in good company: nearly 80,000 students will begin pursuing a PhD this year alone. But while almost all new PhD students say they want to work in academia, most are destined for something else. The hard truth is that half will quit or fail to get their degree, and most graduates will never find a full-time academic job. In Good Work If You Can Get It, Jason Brennan combines personal experience with the latest

higher education research to help you understand what graduate school and the academy are really like. This candid, pull-no-punches book answers questions big and small, including • Should I go to graduate school—and what will I do once I get there? • How much does a PhD cost—and should I pay for one? • What does it take to succeed in graduate school? • What kinds of jobs are there after grad school—and who gets them? • What happens to the people who never get full-time professorships? • What does it take to be productive, to publish continually at a high level? • What does it take to teach many classes at once? • How does publish or perish work? • How much do professors get paid? • What do search committees look for, and what turns them off? • How do I know which journals and book publishers matter? • How do I balance work and life? This realistic, data-driven look at university teaching and research will help make your graduate and postgraduate experience a success. *Good Work If You Can Get It* is the guidebook that anyone considering graduate school, already in grad school, starting as a new professor, or advising graduate students needs. Read it, and you will come away ready to hit the ground running.

Mothers in Academia Maria Castaneda, Kirsten

Isgro,2013-06-18 Featuring forthright testimonials by women who are or have been mothers as undergraduates, graduate students, academic staff, administrators, and professors, *Mothers in Academia* intimately portrays the experiences of women at various stages of motherhood while theoretically and empirically considering the conditions of working motherhood as academic life has become more laborious. As higher learning institutions have moved toward more corporate-based models of teaching, immense structural and cultural changes have transformed women's academic lives and, by extension, their families. Hoping to push reform as well as build recognition and a sense of community, this collection offers several potential solutions for integrating female scholars more wholly into academic life. Essays also reveal the often stark differences between women's encounters with the academy and the disparities among various ranks of women working in academia. Contributors—including many women of color—call attention to tokenism, scarce valuable networks, and the persistent burden to prove academic credentials. They also explore gendered parenting within the contexts of colonialism, racism, sexism, ethnocentrism, ageism, and heterosexism.

Academia Next Bryan Alexander,2020-01-14 An unusually

multifaceted approach to American higher education that views institutions as complex organisms, *Academia Next* offers a fresh perspective on the emerging colleges and universities of today and tomorrow.

Governing Academia Ronald G. Ehrenberg, 2016-10-01 Public concern over sharp increases in undergraduate tuition has led many to question why colleges and universities cannot behave more like businesses and cut their costs to hold tuition down. Ronald G. Ehrenberg and his coauthors assert that understanding how academic institutions are governed provides part of the answer. Factors that influence the governance of academic institutions include how states regulate higher education and govern their public institutions; the size and method of selection of boards of trustees; the roles of trustees, administrators, and faculty in shared governance at campuses; how universities are organized for fiscal and academic purposes; the presence or absence of collective bargaining for faculty, staff, and graduate student assistants; pressures from government regulations, donors, insurance carriers, athletic conferences, and accreditation agencies; and competition from for-profit providers. *Governing Academia*, which covers all these aspects of governance, is

enlightening and accessible for anyone interested in higher education. The authors are leading academic administrators and scholars from a wide range of fields including economics, education, law, political science, and public policy.

Being Well in Academia Petra Boynton, 2020-08-25 The 'Insider Guides to Success in Academia' offers support and practical advice to doctoral students and early-career researchers. Covering the topics that really matter, but which often get overlooked, this indispensable series provides practical and realistic guidance to address many of the needs and challenges of trying to operate, and remain, in academia. These neat pocket guides fill specific and significant gaps in current literature. Each book offers insider perspectives on the often implicit rules of the game -- the things you need to know but usually aren't told by institutional postgraduate support, researcher development units, or supervisors -- and will address a practical topic that is key to career progression. They are essential reading for doctoral students, early-career researchers, supervisors, mentors, or anyone looking to launch or maintain their career in academia. Are you studying or working in academia and in need of support? Perhaps you're finding your work, study or personal life challenging or

overwhelming; are experiencing bullying, harassment or abuse; or find your progress is being blocked by unfair, exploitative or precarious systems? Or perhaps you want to support a friend or colleague who's struggling? Whether your problems are big or small, Being Well in Academia provides a wealth of practical and workable solutions to help you feel stronger, safer and more connected in what has become an increasingly competitive and stressful environment. This volume uses a realistic, pragmatic and – above all – understanding approach to offer support to a diverse audience. Covering a range of issues, it includes advice on: Ways to increase your support network, so you're not alone. Reflections and actions that encourage you to evaluate your position.

Guidance if you are in a stressful, precarious, dangerous or exploitative situation. Checklists and agreements to help you identify your specific needs and accommodations. Signposting to books, websites, networks and organisations that provide additional support. Ways to build your confidence and connections, particularly for Black, Indigenous or People of Colour; LGBTQ+; disabled or chronically sick; or other marginalised groups.

Reflections on your rights and the responsibilities academia should be meeting. Tips for being an active bystander and helping others

in need of assistance. Ideas for resisting, challenging and coping with unfair or exploitative environments. Suggestions for bringing you happiness, inspiration, motivation, courage and hope. This book is a must-read for anyone who wants to address the need to stay well in academia, and will be particularly useful to those in diverse or disadvantaged positions who currently lack institutional support or feel at risk from academia.

Questing Excellence in Academia Knut H. Sørensen, Sharon Traweek, 2022-01-29 Unlike almost most other studies of neoliberal universities and academic capitalism this book ethnographically explores and interprets those transformations and their contradictions empirically in the everyday practices of students, faculty members, and administrators at two public universities: NTNU in Norway and UCLA in California. Differently situated in global political economies, both are ambitious, prosperous campuses. The book reflexively examines their disturbing disputes about quality, competition, and innovation. It argues that some academic, bureaucratic, and corporate university governance practices are both unsustainable and undermining what some university students and faculty already do well: circulate interdisciplinary knowledge and its making globally across the

diasporic domains of academia, society, industry, and government while addressing the world's immediate challenges: power, inequities, and sustainability. It shows the important, strategic work of domesticating, co- morphing, and meshworking at the faultlines of emerging knowledge. This book is for students, faculty, society members, and policy makers who want to engage more effectively with contemporary universities that increasingly serve as busy crossroads for sharing ideas and how to make them. It will be of interest to workers and scholars in the interdisciplinary fields of higher education studies, critical university studies, and critical public infrastructure studies, plus science, technology, and society studies. A New Paradigm in Marketing – The Service Dominant Logic: Academia's Reactions to the Theory of Vargo and Lusch Christina Weißenfels, 2014-04 For virtually all of the 20th century, the paradigm in marketing was founded on early economic thoughts, making goods and exchanges the focal point of economic research and practice. In the 1980s and 1990s, scholars called for a paradigm shift, but did not deliver clear directives on how to move forward. It was not before 2004 when Stephen L. Vargo and Robert F. Lusch published their award-winning article *Evolving to a New Dominant Logic for Marketing* in the *Journal of Marketing*, dealing with a potentially new paradigm for marketing. The publication has

caused a lot of discussions, crowned by a collection of essays from more than 50 scholars in 2006. This book aims at looking into the reactions and discussions regarding the proposed service-dominant logic in more detail. So far, no comprehensive overview of the existing literature has yet been made. This book will introduce the basic ideas of the service-dominant logic, followed by a detailed state-of-literature. The last part of the book will examine whether the concepts of a service-dominant logic display similarities with concepts of B2B marketing and whether they could successfully be adopted in B2B markets.

Women Thriving in Academia Marian Mahat, 2021-04-26 In a male-dominated higher education sector characterised by overt and subtle adversities for women, the path for women in academia is rarely a simple and easy one. This book sets out to empower women in academia to unite in sharing their stories, inspiring and encouraging one another.

Academia Obscura Glen Wright, 2017-10-19 If you think the groves of academe are all stuffiness, elbow patches and greying old men... think again. Academia Obscura is an irreverent glimpse inside the ivory tower, exposing the eccentric and slightly unhinged world of university life. Take a trip through the spectrum of

academic oddities and unearth the Easter eggs buried in peer reviewed papers, the weird and wonderful world of scholarly social media, and rats in underpants. Procrastinating PhD student Glen Wright invites you to peruse his cabinet of curiosities and discover what academics get up to when no one's looking. Welcome to the hidden silly side of higher education.

Universities as Complex Enterprises William B.

Rouse,2016-05-31 Explores the nature of academic enterprises, including why they work the way they do and where such enterprises are headed, with the goal of gaining insights into where change can and will happen This book looks at universities from a whole-enterprise perspective. It explores the steady escalation of the costs of higher education and uses a computational economic model of complex academic enterprises. This model includes component models of research, teaching, administration, and brand value. Understanding the relationships among practices, processes, structure, and ecosystem provides the basis for transforming academia, leveraging its strengths and overcoming its limitations. More specifically, this architecture helps the reader understand how various elements of the enterprise system either enable or hinder

other elements of the system, all of which are embedded in a complex behavioral and social ecosystem. Each topic is explored in terms of the levels of the architecture at which it primarily functions. Levers of change within each area are discussed, using many experiences of pursuing such issues in a range of academic enterprises. • Provides a new methodology by taking a more systems-oriented approach to education systems as a whole • Shows how various elements of the enterprise system either enable or hinder other elements of the system • Offers alternative strategies for transformation of academic enterprises Universities as Complex Enterprises: How Academia Works, Why It Works These Ways, and Where the University Enterprise Is Headed is a reference for systems scientists and engineers, economists, social scientists, and decision makers. William B. Rouse is the Alexander Crombie Humphreys Chair within the School of Systems & Enterprises and Director of the Center for Complex Systems and Enterprises at Stevens Institute of Technology, Hoboken, New Jersey. He is also Professor Emeritus, and former Chair, of the School of Industrial and Systems Engineering at the Georgia Institute of Technology, Atlanta, Georgia. Rouse has written hundreds of articles and book chapters, and has authored many

books, including most recently *Modeling and Visualization of Complex Systems and Enterprises* (Wiley, 2015).

Women Leading Change in Academia Callie Rennison, Amy Bonomi, 2019-10-15 In *Women Leading Change in Academia: Breaking the Glass Ceiling*, Cliff, and Slipper, a groundbreaking collection, Callie Rennison and Amy Bonomi convene the perspectives of diverse women academic leaders who discuss their rise to key leadership positions and effective change-making in higher education, despite underlying structural barriers and bias that disadvantage women. Contributors underscore the revolutionary power and innovation that women leaders bring

Thinking Confederates Dan R. Frost, 2000 Dan Frost shows how, inspired by the idea of progress, these men set about transforming Southern higher education. Recognizing the north's superiority in industry and technology, they turned their own schools from a classical orientation to a new emphasis on science and engineering. These educators came to define the Southern idea of progress and passed it on to their students, thus helping to create and perpetuate an expectation for the arrival of the New South.--BOOK JACKET.

Theatricalising Narrative Research on Women Casual

Academics Gail Crimmins, 2017-12-01 This book presents the research journey involved in sensitively unearthing and re-presenting the lived experience of women casual academics. The author weaves the as yet unvoiced stories of women casual academics with a reflective account of a narrative inquiry process. In doing so, she both critiques and offers an alternative to masculine and traditional academic discourse, and demonstrates the power of imagistic and theatrical communication. The book situates the felt human and post-human experience/s of narrative research alongside the philosophical and theoretical research practices encountered in an arts-informed narrative research project. Thus, the author establishes valuable frameworks for planning, undertaking and evaluating arts-informed narrative research; a growing and vibrant area of education research. This innovative work will be of interest to feminist researchers, teachers and supervisors, as well as students and scholars of women casual academics.

Generation X Professors Speak Elwood Watson, 2013-03-22

With Baby Boomers now moving into retirement, members of Generation X have come to the forefront of American society. Consequently, understanding Generation X—and the potential

impact of the independent, sometimes rebellious spirit that characterizes it—is critical. In *Generation X Professors Speak: Voices from Academia*, Elwood Watson has assembled a unique collection of thematically arranged essays by academics that offers insights into the issues, conflicts, and triumphs that epitomize this often overlooked generation. The essays cover topics ranging from career, class, family life, health, music, and physical disabilities to race, religion, and sexuality. Together, the essays define the characteristics and demonstrate the diversity of Generation X, and will appeal to scholars, students, and others interested in social history, psychology, gender studies, and popular culture.

How Professors Think Michèle Lamont, 2009-07-31 Excellence. Originality. Intelligence. Everyone in academia stresses quality. But what exactly is it, and how do professors identify it? In the academic evaluation system known as “peer review,” highly respected professors pass judgment, usually confidentially, on the work of others. But only those present in the deliberative chambers know exactly what is said. Michèle Lamont observed deliberations for fellowships and research grants, and interviewed panel members at length. In *How Professors Think*, she reveals what she discovered about this secretive, powerful, peculiar world.

Anthropologists, political scientists, literary scholars, economists, historians, and philosophers don't share the same standards. Economists prefer mathematical models, historians favor different kinds of evidence, and philosophers don't care much if only other philosophers understand them. But when they come together for peer assessment, academics are expected to explain their criteria, respect each other's expertise, and guard against admiring only work that resembles their own. They must decide: Is the research original and important? Brave, or glib? Timely, or merely trendy? Pro-diversity or interdisciplinary enough? Judging quality isn't robotically rational; it's emotional, cognitive, and social, too. Yet most academics' self-respect is rooted in their ability to analyze complexity and recognize quality, in order to come to the fairest decisions about that elusive god, "excellence." In *How Professors Think*, Lamont aims to illuminate the confidential process of evaluation and to push the gatekeepers to both better understand and perform their role.
