Sustaining our Environment for Better Future Abdelnaser Omran, Odile Schwarz-Herion, 2019-08-05 This book covers a variety of topics regarding environmental practices in our day-to-day lives, as well as topics concerning sustainable development as a broader concept embracing ecological, social, and economic aspects to improve the quality of life for people around the world. Starting with the traditional controversy between the neoclassical economy and sustainable economy, which may be overcome by scientific progress due to more intensive scientific studies of the sustainability paradigm, the book proceeds to discuss various problems and challenges regarding environmental protection and sustainable development in different countries and on different continents. This includes analyses of recent, sometimes fatal mining disasters in South and North America, challenges and opportunities for rural development in Africa and Australia, an exploration of the role of women for sustainable development in Palestine, water safety and water security issues in Asia and Australia, the environmental exploitation of popular tourism destinations like Acapulco, and deforestation in Malaysia, suggesting innovative approaches to turn challenges into opportunities to effectively tackle these problems. Other topics addressed involve sustainable energy creation for future generations, a research survey among Romanian students on sustainable consumption behavior, validity testing for a heat transfer model in a greenhouse, and a case study on sustainability risk management practices at Malaysia's environmentally sensitive companies. The book closes with an examination of highly digitalized Smart Cities as a potentially valuable complement to conventional urban and rural lifestyles in connection with achieving the UN Sustainable Development Goals (SDGs).

Information Technology Governance and Service Management: Frameworks and Adaptations Cater-Steel, Aileen, 2008-08-31 Increasingly, information technology governance is being considered an integral part of corporate governance. There has been a rapid increase in awareness and adoption of IT governance as well as the desire to conform to national governance requirements to ensure that IT is aligned with the objectives of the organization. *Information Technology Governance and Service Management: Frameworks and Adaptations* provides an in-depth view into the critical contribution of IT service management to IT governance, and the strategic and tactical value provided by effective service management. A must-have

resource for academics, students, and practitioners in fields affected by IT in organizations, this work gathers authoritative perspectives on the state of research on organizational challenges and benefits in current IT governance frameworks, adoption, and incorporation.

Tourism and Politics Peter M. Burns, Marina Novelli, 2007-03-14 *Tourism and Politics* aims to disseminate ideas on the critical discourse of tourism and tourists as they relate to politics, through a series of case studies from around the world written by specialists with an emphasis on linking theory to practice. That tourism is a profoundly important economic sector for most countries and regions of the world is widely accepted, even if some of the detail remains controversial. However, as tourism matures as a subject, the theories underpinning it necessarily need to be more sophisticated; tourism cannot be simply 'read' as a business proposition with a series of impacts. Wider questions of politics, power and identity need to be articulated, investigated and answered. While the making and consuming of tourism takes place within complex political milieux with multiple stakeholders competing for benefit, the implications are not fully understood. Literature on tourism and politics is surprisingly limited. This book will make a substantial contribution to the theoretical framework of tourism.

Cross-cultural Behaviour in Tourism Yvette Reisinger, Lindsay W. Turner, 2003 Reisinger and Turner illustrate the importance of cultural background in the tourist experience in this in-depth study. The authors cover the concepts, definitions and measures of these cultural components and the tools used to analyse them.

Mexican Aquatic Environments Ana Laura Ibáñez, 2019-03-29 Pursuing a multidisciplinary approach, this book highlights current challenges in, and potential solutions to, environmental water management in Mexico. It includes an essential review of current literature and state of the art research, providing a one-stop resource for researchers, graduate students and environmental water managers alike. The result of a cooperation between 35

researchers from seven Mexican academic institutions, two Federal Commissions and one international organization, the book links science to practice for living organisms and their environment, while also addressing anthropogenic effects on our water ecosystems. Particularly the book addresses the following subjects: Biodiversity in inland waters, physical and chemical characterization of inland waters, physico-chemical characterization of Mexican coastal lagoons, microbiota in brackish ecosystems, diversity associated with southern Mexico's pacific coral reefs, fry fish stockings in aquatic epicontinental systems, a review of tuna fisheries in Mexico, fishery resource management challenges stemming from climate change, aquatic invasive alien species, harmful algal blooms, and aquatic protected areas, related ecological and social problems and the importance for fisheries' yield.

Software Engineering Research, Management and Applications 2012 Roger Lee, 2012-05-24 The series Studies in Computational Intelligence (SCI) publishes new developments and advances in the various areas of computational intelligence-quickly and with a high quality. The intent is to cover the theory, applications, and design methods of computational intelligence, as embedded in the fields of engineering, computer science, physics and life science, as well as the methodologies behind them. The series contains monographs, lecture notes and edited volumes in computational intelligence spanning the areas of neural networks, connectionist systems, genetic algorithms, evolutionary computation, artificial intelligence, cellular automata, self-organizing systems, soft computing, fuzzy systems and hybrid intelligent systems. Critical to both contributors and readers are the short publication time and world-wide distribution-this permits a rapid and broad dissemination of research results. The purpose of the 10th International Conference on Software Engineering Research, Management and Applications (SERA 2012) held on May 3- June 1, 2012 in Shanghai, China was to bring together scientists, engineers, computer users, and students to share their experiences and exchange new ideas and research results about all aspects (theory, applications and tools) of Software Engineering Research, Management and Applications, and to discuss the practical challenges encountered along the way and the solutions adopted to solve them. The conference organizers selected 12 outstanding papers from those papers accepted for presentation at the conference in order to publish them in this volume. The papers were chosen based on review scores submitted by members of the program committee, and further rigorous rounds of review.

Handbook on Crisis and Disaster Management in Tourism Bruce Prideaux, David Beirman, 2024-04-12 Recent global crises such as the COVID-19 pandemic have further emphasised the need for improved disaster management within the tourism industry, and with this in mind, the Handbook on Crisis and Disaster Management in Tourism fully addresses the importance of crisis and disaster readiness. This erudite Handbook brings together contributions from both leading tourism practitioners and scholars of a variety of disciplinary backgrounds, ranging from economics to hospitality, to showcase collaborative approaches to destination and business recovery.

Data Mining with Ontologies: Implementations, Findings, and Frameworks Nigro, Hector Oscar, Gonzalez Cisaro, Sandra Elizabeth, Xodo, Daniel Hugo, 2007-07-31 Prior knowledge in data mining is helpful for selecting suitable data and mining techniques, pruning the space of hypothesis, representing the output in a comprehensible way, and improving the overall method. This book examines methodologies and research for the development of ontological foundations for data mining to enhance the ability of ontology utilization and design--Provided by publisher.

Integrating Sustainable Development Into National Frameworks Janet R. Strachan, Constance Vigilance, 2011 This book brings policy-making for sustainable development into the mainstream of decision-making at all levels of governance and in all sectors. It builds on the 2005 internationally agreed 'Mauritius Strategy' which aims to implement the integration of sustainable development by small island developing states. Designed as a handbook for policy-makers and planners in government, as well as business and civil society leaders, it covers seven of the twenty issues that have been outlined in the Mauritius Strategy as being important for the sustainable development of SIDS - disaster management; marine resources; freshwater resources; land resources; energy resources; tourism resources and trade. It brings together best practices, policy options and development prospects that small states can pursue in order to achieve real progress in these fields. It covers the progress and experiences of countries in the Caribbean region, the Pacific region, and the Atlantic, Indian Ocean and Mediterranean region in their implementation of sustainable development in these areas. It also provides a useful point of reference and stimulus to policy-makers and their supporting colleagues from all sectors.

Rebuilding Higher Education Systems Impacted by Crises: Navigating Traumatic Events, Disasters, and More Kayyali, Mustafa, 2024-04-05 The resilience and adaptability of higher education systems are under unprecedented strain. From natural disasters to pandemics, and economic crises to political turmoil, universities and colleges worldwide have grappled with a myriad of crises that disrupt their core missions of teaching, research, and

community engagement. As we find ourselves at the crossroads of these tumultuous times, the imperative to reconstruct and revitalize higher education systems becomes increasingly evident. *Rebuilding Higher Education Systems Impacted by Crises: Navigating Traumatic Events, Disasters, and More* is a pioneering work that addresses the critical issues surrounding the restoration of higher education systems in the wake of various crises. This book serves as a roadmap for educators, administrators, policymakers, and stakeholders who share a commitment to preserving and advancing higher education, even in the face of adversity. The 21st century has witnessed a rapid escalation in the frequency and severity of crises affecting higher education institutions. These crises span from the abrupt shift to online learning necessitated by the COVID-19 pandemic to the enduring ramifications of climate change on campus infrastructure. Additional factors such as financial pressures, evolving demographics, and the ever-changing technological landscape further complicate the challenge. This book embarks on a deep exploration of these challenges and offers practical solutions, making it an indispensable resource for anyone vested in the future of higher education.

Jesuits at the Margins Alexandre Coello de la Rosa, 2015-12-07 In the past decades historians have interpreted early modern Christian missions not simply as an adjunct to Western imperialism, but a privileged field for cross-cultural encounters. Placing the Jesuit missions into a global phenomenon that emphasizes economic and cultural relations between Europe and the East, this book analyzes the possibilities and limitations of the religious conversion in the Micronesian islands of Guåhan (or Guam) and the Northern Marianas. Frontiers are not rigid spatial lines separating culturally different groups of people, but rather active agents in the transformation of cultures. By bringing this local dimension to the fore, the book adheres to a process of missionary “glocalization” which allowed Chamorros to enter the international community as members of Spain’s regional empire and the global communion of the Roman Catholic Church.

Cities and Partnerships for Sustainable Urban Development Peter Karl Kresl, 2015-07-31 Over the past two decades, sustainability has become a principal concern for city administrators. tan now suppose we know the hypotenuse and one side but have to find the other for example if 119 and 169 then $119^2 + 28561 = 14161$ 14400 and the square root of 14400 is 120 so 120 we might only know one side but we also know an
