Strategies for Improving Homeless People's Access to Mainstream Benefits and Services Martha R. Burt,2010 In 2000, HUD, in recognition that any solution to homelessness must emphasize housing, targeted its McKinney-Vento Act homeless competitive programs towards housing activities. This policy decision presumed that programs such as Medicaid, TANF and General Assistance could pick up the slack produced by the change. This study examines how 7 communities sought to improve homeless people's access to mainstream services following this shift away from funding services through the Supportive Housing Program. Provides communities with models and strategies that they can use. Highlights the limits of what even the most resourceful of communities can do to enhance service and benefit access by homeless families and individuals.

Measuring Success in Substance Use Grant Programs National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Committee on the Review of Specific Programs in the Comprehensive Addiction and Recovery Act,2021-01-15 The opioid epidemic, now several decades in the making, continues to cause pain and suffering for millions of Americans. Each year, thousands of individuals die from overdose, and thousands more grieve from these losses. Opioid use disorder (OUD) can lead to a complete interruption of day-to-day activities, including caring for one's family, maintaining a job or career, or keeping track of basic necessities, such as health care and finances. This report, the first in a series of three, examines four of the Substance Abuse and Mental Health Services Administration (SAMHSA)'s grant programs that help alleviate suffering due to opioids and improve treatment quality and access. It offers recommendations about the existing reporting tools used by these programs and and proposes additional metrics and outcomes that should be considered.

Facing Addiction in America Office of the Surgeon General,U.s. Department of Health and Human Services,2017-08-15 All across the United States, individuals, families, communities, and health care systems are struggling to cope with substance use, misuse, and substance use disorders. Substance misuse and substance use disorders have devastating effects, disrupt the future plans of too many young people, and all too often, end lives prematurely and tragically. Substance misuse is a major public health challenge and a priority for our nation to address. The effects of substance use are cumulative and costly for our society, placing burdens on workplaces, the health care system, families, states, and communities. The Report discusses opportunities to bring substance use disorder treatment and mainstream health care systems into alignment so that they can address a person's overall health, rather than a substance misuse or a physical health condition alone or in isolation. It also provides suggestions and recommendations for action that everyone-individuals, families, community leaders, law enforcement, health care professionals, policymakers, and researchers-can take to prevent substance misuse and reduce its consequences.
