Veterans¿ Disability Benefits Daniel Bertoni,2009-06-01 Recent

military conflicts have increased interest in federal efforts to support servicemembers preparing to leave military service. Through the Benefits Delivery at Discharge (BDD) program, the VA, in collaboration with the DoD, has made efforts to streamline access to veterans' disability benefits by allowing some servicemembers to file a claim and obtain a single exam prior to discharge. This report examines VA's efforts to manage the BDD program and how VA and DoD are addressing challenges servicemembers face in accessing BDD. To address these objectives, the auditor analyzed relevant documents and data, interviewed officials, and conducted site visits and interviews at selected military bases. Includes recommendations. Illus.

Veterans' Disability Benefits: Opportunities Remain for Improving Accountability for and Access to Benefits Delivery at Discharge Program Daniel Bertoni,2011-01 This is a print on demand edition of a hard to find publication. Through the Benefits Delivery at Discharge (BDD) program, the VA collaborates with DoD to streamline access to vets' disability benefits by allowing some servicemembers to file a claim and undergo a single exam process prior to discharge. BDD is designed for servicemembers with conditions that, while disabling, do not generally prevent them from performing their military duties. This program can shorten the time it takes for vets to receive benefits by several months. This statement identifies ways VA and DoD could improve these programs for transitioning servicemembers. It examined: (1) VA efforts to manage the BDD program; and (2) how VA and DoD are addressing challenges servicemembers face in accessing the BDD program. Illus.

Beyond the Open Door Nancy Berla,Susan Hlesciak Hall,1989 BEYOND THE OPEN DOOR: A CITIZENS GUIDE TO INCREASING PUBLIC ACCESS TO LOCAL SCHOOL BOARDS is the only comprehensive, up-to-date source of information on open meetings laws in the 50 states & the District of Columbia as they affect local boards of education. Based on nation-wide research &

analysis conducted through the summer of 1989, this monograph explains what boards must do to comply with the law, & what citizens can do to assure that compliance. Beyond that, this volume provides a tool for citizens & board members to evaluate local performance, & offers a model policy to help improve public access & board openness. Included are easy-to-read charts comparing the major provisions of the law in each state & defining the precise grounds for legally-held closed sessions (by far the most common vehicle by which boards circumvent the law), a glossary of school district terminology, a one-page summary of each law (including a contact person for citizens who need more information or wish to file a complaint against their local board), & a directory of state boards of education.

The EU Leniency Policy Baskaran Balasingham,2016-04-24 The European Union (EU) leniency programme is a key weapon in

the Commission's fight against hard-core cartels. Much of the success of EU cartel enforcement depends on the continued effectiveness of the leniency policy and is especially critical in response to the growth of private enforcement. This book offers a comprehensive description of the development of the policy, along with a normative framework that promises to ensure the full legitimacy of the leniency programme: the Commission's policy should pursue not only effectiveness but also fairness. It is the first work to extensively analyse the effectiveness and fairness in the EU leniency policy. Proceeding systematically from clarifying the concepts of 'effectiveness' and 'fairness' to addressing the tension between leniency and private actions for damages, the author discusses the nature of, and interrelations among, such aspects as the following: – the theoretical model of the EU fining policy; – the compatibility of the EU enforcement system with fundamental rights protection; – the gathering and evaluation of evidence at the preliminary investigation stage; – the severity and foreseeability of the EU cartel fines; – judicial review by the EU Courts in competition matters; – to what extent the current policy is effective and fair; and – reforms brought about by the 2002 and 2006 Leniency Notices and the leniency-related amendments by the 2014 Antitrust Damages Directive. A key feature is the author's presentation of a normative framework to test the effectiveness (deterrence) and substantive fairness (retribution) of the EU leniency policy. As a clear demonstration of how to forestall the danger of focusing on effectiveness of leniency at the expense of fairness, both in a substantive and in a procedural sense, this book is a major contribution to the literature of competition law. It will prove to be of great value to competition authorities, antitrust practitioners and interested academics not only in Europe but also throughout the world.

If you are brand new to MODX, some parts of the book may go over your head the first time you read them. Over time, however, you will grow more familiar with how MODX works, and they will gradually begin to make sense to you.

  Participation in EU Rule-making Joana Mendes,2011-04-07 The limited scope of participation in the making of EU law remains a continued source of controversy, featuring prominently in recent institutional and political developments that have been shaping the EU's constitutional framework - most intensely in the follow up of the Commission's White Paper on Governance. Yet little attention has been paid to participation rights as a means of ensuring the procedural protection of persons affected by EU regulation in its diverse forms. This is a dimension of the rule of law that has been largely ignored by EU legislative and judicial bodies. Not only the legislator, but also the Court of Justice and the Court of First Instance tend to adhere to excessively formal conceptions of participation rights that are premised on the right to be heard in individual procedures, as well as to a restrictive view regarding the relationships between the citizens and the administration. This book shows why, in the face of new regulatory developments, these conceptions are currently inadequate to ensure the legal protection of rights and interests affected by EU regulation. Combining a conceptual analysis with thorough empirical scrutiny, this book assesses the scope of participation rights in EU law against their rationales and underlying legal values. It makes a case for the extension of participation rights to

new situations and new types of procedures, in particular those that would generally fall within the category of rulemaking. It brings distinct normative insights into a crucial theme of EU administrative law, and makes a topical and timely contribution to the increasingly notable theme of public participation in EU regulation. Joanna Mendes' 2009 thesis upon which Participation in EU Rule-Making is based was awarded the the European University Institute (Florence) Mauro Cappelletti Prize for the best doctoral thesis using a methodology of comparative law

Safeguarding Companies' Rights in Competition and Anti-dumping/anti-subsidies Proceedings Themistoklis K. Giannakopoulos,2011-01-01 Focusing on the rules safeguarding

procedural due process in the administrative procedures of the Commission, this fully updated edition of a widely used handbook covers the four principal fields that entail enforcement of substantive competition rules: antitrust, merger, anti-dumping/antisubsidies, and State aid. Among the many practical issues raised are the following: the right of directly involved parties to bring an action before the European Courts in merger, anti-dumping/anti-subsidies, and State-aid cases; the rights of complainants in antitrust cases; the rights and obligations of beneficiaries in State-aid cases; the extent to which the right to confidential communication between lawyer and client in thesecases is recognised by the European Commission and the European Courts; the right to silence to avoid self-incrimination in antitrust cases; the right to respect for confidentiality and the right to be heard during the preliminary factfinding procedure of the Commission; the obligations of an undertaking during the fact-finding procedure of the Commission; the right of access to the Commission's file; the right to a fair hearing of all the parties concerned by the Commission proceedings; and the applicability of Article 6 of the European Convention of Human Rights (ECHR) to EU antitrust procedures. Three tables consolidate briefly and comparatively the rights and the obligations of the private parties in the four proceedings, as well as their right to bring an action before the European Courts. These tables give the reader the opportunity to easily check out what is the situation in the four proceedings regarding a specific right or obligation. The author's analysis draws on all the relevant judgments of the European Courts, and the book comes with a wealth of reference material, including detailed footnotes, lists of legislation and cases in both chronological and alphabetical order, and an extensive bibliography.

Competition Law of the European Union Van Bael & Bellis,2021-03-01 This new Sixth Edition of a major work by the well-known competition law team at Van Bael & Bellis in Brussels

brings the book up to date to take account of the many developments in the case law and relevant legislation that have occurred since the Fifth Edition in 2010. The authors have also taken the opportunity to write a much-extended chapter on private enforcement and a dedicated section on competition law in the pharmaceutical sector. As one would expect, the new edition continues to meet the challenge for businesses and their counsel, providing a thoroughly practical guide to the application of the EU competition rules. The critical commentary cuts through the theoretical underpinnings of EU competition law to expose its actual impact on business. In this comprehensive new edition, the authors examine such notable developments as the following: important rulings concerning the concept of a restriction by object under Article 101; the extensive case law in the field of cartels, including in relation to cartel facilitation and price signalling; important Article 102 rulings concerning pricing and exclusivity, including the Post Danmark and Intel judgments, as well as standard essential patents; the current block exemption and guidelines applicable to vertical agreements, including those applicable to the motor vehicle sector; developments concerning online distribution, including the Pierre Fabre and Coty rulings; the current guidelines and block exemptions in the field of horizontal cooperation, including the treatment of information exchange; the evolution of EU merger control, including court defeats suffered by the Commission and the case law on procedural infringements; the burgeoning case law related to pharmaceuticals, including concerning reverse payment settlements; the current technology transfer guidelines and block exemption; procedural developments, including in relation to the right to privacy, access to file, parental liability, fining methodology, inability to pay and hybrid settlements; the implementation of the Damages Directive and the first interpretative rulings. As a comprehensive, up-to-date and above all practical analysis of the EU competition rules as developed by the Commission and EU Courts, this authoritative

new edition of a classic work stands alone. Like its predecessors, it will be of immeasurable value to both business persons and their legal advisers.
