**Achtung-Panzer!** Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

*Mediterranean Climate Variability* P. Lionello,Paola Malanotte-Rizzoli,R. Boscolo,2006-08-22 This multi-authored book provides an updated description of climate variability in the Mediterranean basin, focusing on decadal and centennial time scales and on the results available on the impact of future emission scenarios at regional scale. The authors describes both local physical processes responsible for these variability - such as changes in the surface properties and land use- and global processes - such as changes in the large scale atmospheric circulation associated to global warming, NAO, tropical monsoon and ENSO. Regional climate change issues are also addressed. Mediterranean Climate Variability aims to review the research on this region and to provide at the same time both an introduction and a reference for researchers. It covers topics typical of Climatology, Climate history, Meteorology, Oceanography, Environmental Science but the information here provided would also be useful for research in agriculture, social and economic studies. It is addressed to scientists and students interested in the Mediterranean climate and environment. Some topics have interesting connections to nearby regions: Northern Atlantic, West Africa, central and Eastern Europe. Each chapter will contain a summary meant to provide information to policy makers, researchers from other fields, and in general to a wide audience without a technical expertise on climate. \* Provides an

updated analysis of the Mediterranean climate features and guidelines for future research \* Considers both oceanographic and atmospheric aspects \* Analyzes the Mediterranean climate in a global perspective

Handbook of Adolescent Development Sandy Jackson, Luc Goossens, 2020-01-29 Handbook of Adolescent Development fills a gap in the literature on adolescent development and behaviour: all of the authors of the various chapters were invited to include as many findings on European adolescents as possible. Through this specific emphasis, the handbook provides a complement to other reviews of the literature that are mostly based on North American samples. The contributors are all eminent researchers in the field and the individual chapters cover their specific areas of expertise. Theories of adolescence, along with emotional, physical and cognitive issues, are explored. Topics covered include families, peer relations, school and leisure time, as well as problem areas such as depression, drug consumption and delinquency. Handbook of Adolescent Development also incorporates a comprehensive review of the literature in the area and considers avenues for future research. This multidisciplinary text will be of interest to those studying and researching in the fields of developmental psychology, sociology, demography, epidemiology and criminology.

**The Politics of Post-Industrial Welfare States** Klaus Armingeon, Giuliano Bonoli, 2007-01-24 This new study assesses the welfare state to ask key questions and draw new conclusions about its place in modern society. It shows how the welfare states that we have inherited from the early post-war years had one main objective: to protect the income of the male breadwinner. Today, however, massive social change, in particular the shift from industrial to post-industrial societies and economies, have resulted in new demands being put on welfare states. These demands originate from situations that are typical of the new family and labour market structures that have become widespread in western countries since the 1970s and 1980s, characterised by the clear prevalence of service employment and by the massive entry of women in the labour market. Against this background, this book: \* presents a precise and clear definition of 'new social risks'. A concept being increasingly used in welfare state literature. \* focuses on the groups that are mostly exposed to new social risks (women, the young, the low-skilled) in order to study their political behaviour. \* assesses policymaking processes that can lead to successful adaptation. It covers key areas such as child care, care for elderly people, adapting pensions to atypical career patterns, active labour market policies, and policy making at the EU level. This book will be of great interest for all students and scholars of politics, sociology and the welfare state in particular.
