Perspectives on Economic Development Ryan Merlin Yonk,Vito Bobek,2020-06-03 Among the most discussed and contested areas of policy are those that surround economic development. Among the wide universe that is public policy, those policies that claim to enhance economic development have long been viewed as particularly important, and discussions over what the best approaches are have been varied, heated, and often at the core of the success or failure of governments. This volume explores how different policy environments impact economic development in light of the interplay with other factors. From discussion of tax policy in the Russian Federation, to the interplay of economic development and culture in Namibia, to the complex interplay between tourism and extractive industries in the United States, this volume explores a range of policy realities.

Lessons in Corporate Finance Paul Asquith, Lawrence A. Weiss,2016-03-16 A discussion-based learning approach to corporate finance fundamentals Lessons in Corporate Finance explains the fundamentals of the field in an intuitive way, using a unique Socratic question and answer approach. Written by award-winning professors at M.I.T. and Tufts, this book draws on years of research and teaching to deliver a truly interactive learning experience. Each case study is designed to facilitate class discussion, based on a series of increasingly detailed questions and answers that reinforce conceptual insights with numerical examples. Complete coverage of all areas of corporate finance includes capital structure and financing needs along with project and company valuation, with specific guidance on vital topics such as ratios and pro formas, dividends, debt maturity, asymmetric information, and more. Corporate finance is a complex field composed of a broad variety of sub-disciplines, each involving a specific skill set and nuanced body of knowledge. This text is designed to give you an intuitive understanding of the fundamentals to provide a solid foundation for more advanced study. Identify sources of funding and corporate capital structure Learn how managers increase the firm's value to shareholders Understand the tools and analysis methods used for allocation Explore the five methods of valuation with free cash flow to firm and equity Navigating the intricate operations of corporate finance requires a deep and instinctual understanding of the broad

concepts and practical methods used every day. Interactive, discussion-based learning forces you to go beyond memorization and actually apply what you know, simultaneously developing your knowledge, skills, and instincts. Lessons in Corporate Finance provides a unique opportunity to go beyond traditional textbook study and gain skills that are useful in the field.

The Demographic Cliff Deluxe Harry S. Dent Jr.,2014-01-07 The Deluxe Edition of The Demographic Cliff includes over 50 minutes of exclusive video of Harry S. Dent, Jr. discussing each chapter in-depth with his trademark insight, knowledge, and passion. Bestselling author and financial guru Harry Dent shows why we're facing a decade-long "great deflation"—and what to do about it. Throughout his long career as an economic forecaster, Harry Dent has relied on demographics—the ultimate tool for predicting both big and small trends, decades in advance. Now he explains what's going to happen to our economy with the accelerating retirements of the Baby Boomers. Inflation rises when a larger than usual block of younger people enter the workforce, and it wanes when large numbers of older people retire, downsize their homes, and cut their spending. The mass retirement of the Boomers won't just hold back inflation, it will actually cause deflation—with a downturn and periodic crises from 2014 until about 2023. Dent explores the implications of his controversial predictions for retirement planning, healthcare, real estate, education, investing, and business strategies. His advice will help readers survive and prosper during the challenging years ahead.

The Demographic Cliff Harry S. Dent Jr.,2014-01-07 Bestselling author and financial guru Harry Dent shows why we're facing a "great deflation" after five years of desperate stimulus — and what to do about it now Throughout his long career as an economic forecaster, Harry Dent has relied on a not-so-secret weapon: demographics. Studying the predictable things people do as they age is the ultimate tool for understanding trends. For instance, Dent can tell a client exactly when people will spend the most on potato chips. And he can explain why our economy has risen and fallen with the peak spending of generations, and why we now face a growing demographic cliff with the accelerating retirement of the Baby Boomers around the world. Dent predicted the impact of the Boomers hitting their highest growth in spending in the 1990s, when most economists saw the United States declining. And he anticipated the decline of Japan in the 1990s, when economists were proclaiming it would overtake the U.S. economy. But now, Dent argues, the fundamental demographics have turned against the United States and will hit more countries ahead. Inflation rises when a larger than usual block of younger people enter the workforce, and it wanes when large numbers of older people retire, downsize their homes, and cut their spending. The mass retirement of the Boomers won't just hold back inflation; it and massive debt deleveraging will actually cause deflation—weakening the economy the most from 2014 into 2019. Dent explores the implications of his controversial predictions. He offers advice on retirement planning, health care, real estate, education, investing, and business strategies. For instance . . . BUSINESSES should get lean and mean now. Identify

segments that you can clearly dominate and sell off or shut down others. If you don't, the economy will do it for you, more painfully and less profitably. INVESTORS should sell stocks by mid-January 2014 and look to buy them back in 2015 or later at a Dow as low as 5,800. FAMILIES should wait to buy real estate in areas where home prices have gone back to where the bubble started in early 2000. GOVERNMENTS need to stop the endless stimulus that creates more bubbles and kills the middle class, and should assist in restructuring the unprecedented debt bubble of 1983–2008. Dent shows that if you take the time to understand demographic data, using it to your advantage isn't all that difficult. By following his suggestions, readers will be able to find the upside to the downturn and learn how to survive and prosper during the most challenging years ahead.

Managing Financial Institutions Elizabeth S. Cooperman, 2016-12-08 This book goes beyond traditional financial institutions textbooks, which tend to focus on mathematical models for risk management and the technical aspects of measuring and managing risk. It focuses on the role of financial institutions in promoting social and economic goals for the communities in which they operate for the greater good, while also meeting financial and competitive challenges, and managing risks. Cooperman divides the text into seven easily teachable modules that examine the real issues and challenges that managers of financial institutions face. These include the transformative changes presented by social unrest, climate change and resource challenges, as well as the changes in how financial institutions operate in light of the opportunities that rapid innovations and disruptive technologies offer. The book features: Up-to-date coverage of new regulations affecting financial institutions, such as Dodd Frank and new SEC regulations. Material on project financing and new forms of financing, including crowd funding and new methods of payment for financial institutions. New sustainable finance models and strategies that incorporate environmental, social, and corporate governance considerations. A new chapter on sustainable financial institutions, social activism, the greening of finance, and socially responsible investing. Practical cases focusing on sustainability give readers insight into the socioeconomic risks associated with climate change. Streamlined and accessible, *Managing Financial Institutions* will appeal to students of financial institutions and markets, risk management, and banking. A companion website, featuring PowerPoint slides, an Instructor's Manual, and additional cases, is also available.

Strategic Materials and Computational Design Waltraud M. Kriven, Yanchun Zhou, Miladin Radovic, 2010-11-23 Contributions from three Focused Sessions that were part of the 34th International Conference on Advanced Ceramics and Composites (ICACC), in Daytona Beach, FL, January 24-29, 2010 are presented in this volume. The broad range of topics is captured by the Focused Session titles, which are listed as follows: FS1 - Geopolymers and other Inorganic Polymers; FS3 - Computational Design, Modeling Simulation and Characterization of Ceramics and Composites; and FS4 - Nanolaminated Ternary Carbides and Nitrides (MAX Phases). The session on Geopolymers and other Inorganic Polymers continues to attract growing attention from international researchers (USA, Australia, France, Germany, Italy, Czech Republic, and Viet Nam) and it is encouraging to see the variety of established and new applications being found for these novel and potentially useful materials. The session organizer gratefully acknowledges the support of the US Air Force Office of Scientific Research (AFOSR) through Dr. Joan Fuller. The AFOSR has continuously supported these conferences since the first meeting in Nashville, TN in 2003. Focused Session 3 was dedicated to design, modeling, simulation and characterization of ceramics and composites. 27 technical papers were presented on prediction of crystal structure and phase stability, characterization of interfaces and grain boundaries at atomic scale, optimization of electrical, optical and mechanical properties, modeling of defects and related properties, design of materials and components at different length scales, application of novel computational methods for processing. Four of these papers are included in this issue of CESP. Focused Session 4 was dedicated to MAX phases - a class of ternary carbides and nitrides with nanolaminated structure and general formula M_n+1A_n (where M is an early transition metal, A is an A-group element from IIIA to VIA, X is either C or N, and $n=1, 2, 3 \dots$). The

MAX phases have attracted recently a lot of attention because they possess unique combination of metallic- and ceramic-like properties. In all, 30 technical papers were presented during this session. Four of these papers are included in this issue.

The IMF and Argentina, 1991-2001 Mrs. Isabelle Mateos y Lago, Shinji Takagi, Mr. Ricardo Martin, Ms. Misa Takebe, Mr. Benjamin H. Cohen, 2004-09-30 This report evaluates the role of the IMF in Argentina during 1991-2001, focusing particularly on the period of crisis management from 2000 until early 2002. The primary purpose of the evaluation is to draw lessons for the IMF in its future operational work. The evaluation suggests ten lessons, in the areas of surveillance and program design, crisis management, and the decision-making process, and, on the basis of these lessons, offers six sets of recommendations to improve the effectiveness of IMF policies and procedures.

Biological Hazards in Food Maria Schirone, Pierina Visciano, Rosanna Tofalo, Giovanna Suzzi, 2017-03-07 The ingestion of food containing pathogenic microorganisms (i.e. bacteria and their toxins, fungi, viruses) and parasites can cause food-borne diseases in humans. A growing number of emerging pathogens, changes of virulence of known pathogens and appearance of antibiotic resistance has recently exposed consumers to a major risk of illness. Also infected people and the environment can spread microorganisms on raw or processed food. Outbreaks of food-borne diseases are often unrecognized, unreported, or not investigated and particularly in developing countries their agents and sources are mostly unknown. Surveillance and analytical methods aiming at their detection are to be hoped, as well as good strategies to struggle against these threats. This E-book is subdivided in chapters regarding to pathogenic and spoiling microorganisms, chemical hazards produced by biological agents and food safety management systems.
