Polish Revolutionary Populism Peter Brock, 1977-12-15 Polish populism, which advocated agrarian socialism by either revolutionary or reformist means, emerged first among the émigrés who had left Poland after the Russians defeated the nationalist uprising of 1830. In exile they came into contact with the ideas of French 'Utopian' socialists such as Babeuf, Saint-Simon, Fourier, and Cabet, and they attempted to adapt these ideas to the very different conditions prevailing in their east European homeland. Thus this version of populism preceded in time, and probably influenced, the emergence of the ideas of the better-known Russian narodniks. Polish Revolutionary Populism describes the activities and conflicting ideologies of the various organizations, abroad and in partitioned Poland, which were struggling for national independence and for agrarian and social reform. Like the author's recent work, *The Slovak National Awakening*, this book deals with the emerging national aspirations characteristic of central and eastern Europe at the time and with the variety of political and social theories that made debate so acrimonious.

Real Business of IT Richard Hunter, George Westerman, 2009-10-20 If you're a general manager or CFO, do you feel you're spending too much on IT or wishing you could get better returns from your IT investments? If so, it's time to examine what's behind this IT-as-cost mind-set. In *The Real Business of IT*, Richard Hunter and George Westerman reveal that the cost mind-set stems from IT leaders' inability to communicate about the business value they create-so CIOs get stuck discussing budgets rather than their contributions to the organization. The authors explain how IT leaders can combat this mind-set by first using information technology to generate three forms of value important to leaders throughout the organization: -Value for money when your IT department operates efficiently and effectively -An investment in business performance evidenced when IT helps divisions, units, and departments boost profitability -Personal value of CIOs as leaders whose contributions to their enterprise go well beyond their area of specialization The authors show how to communicate about these forms of value with non-IT leaders-so they understand how your firm is benefiting and see IT as the strategic powerhouse it truly is.
