Living the Dream Jim McArdle,2009-03-01 Legendary broadcaster Jack Brickhouse once said any team can have a bad century. He was joking, of course, but the Chicago Cubs franchise, whose games he worked for decades, entered 2008 on the brink of making his words come painfully true. A number of expansion teams in the four major sports never have won a World Series, Super Bowl, Stanley Cup, or NBA title in their brief histories. But no team ever has gone 100 years without winning a championship. Following the Cubs' quest to avert that infamous distinction is the backdrop for Living the Dream, which, for author Jim McArdle, it truly was. McArdle, a former Cubs employee as editor of the official team magazine Vine Line, quit his job to devote himself completely to the 2008 Cubs' season. Thanks to clubhouse access generously offered by the team and an apartment located just beyond Wrigley's left-field fence, McArdle was uniquely positioned to compile this fascinating story.

Making Friends on the Fly: Advances in Ad Hoc Teamwork Samuel Barrett,2015-05-25 This book is devoted to the encounter and interaction of agents such as robots with other agents and describes how they cooperate with their previously unknown teammates, forming an Ad Hoc team. It presents a new algorithm, PLASTIC, that allows agents to quickly adapt to new teammates by reusing knowledge learned from previous teammates. PLASTIC is instantiated in both a model-based approach, PLASTIC-Model and a policy-based approach, PLASTIC-Policy. In addition to reusing knowledge learned from previous teammates, PLASTIC also allows users to provide expert-knowledge and can use transfer learning (such as the new Two Stage Transfer algorithm) to quickly create models of new teammates when it has some information about its new teammates. The effectiveness of the algorithm is demonstrated on three domains, ranging from multi-armed bandits to simulated robot soccer games.

Periodization of Strength Training for Sports Tudor O. Bompa,Carlo Buzzichelli,2021-02-19 Tudor Bompa revolutionized Western training methods when he introduced his groundbreaking theory of periodization in Romania in 1963. He has since gone on to become a world-renowned exercise scientist and the foremost authority on periodization and the development of biomotor abilities. In Periodization of Strength Training for Sports, Fourth Edition, Bompa partners with international strength and conditioning expert Carlo Buzzichelli to go beyond the simple application of bodybuilding or powerlifting programs to show you what training to schedule—and when—to build athletic strength and maximize performance at the right time. Periodization of Strength Training for Sports demonstrates how to use periodized workouts to peak at optimal times by manipulating strength training variables through six training phases—anatomical adaptation, hypertrophy, maximum strength, conversion to specific strength, maintenance, and peaking. Coaches and athletes in 30 sports now have at their fingertips proven programs that take into consideration the specific phases and unique demands of their sport, along with information about the dominant energy system, limiting factors for performance, and objectives for strength training. No more guessing about preseason conditioning, in-season workloads, or rest and recovery periods—now it's simply a matter of implementing the strategies in this book. Rather than experiment with untested training regimens, let the proven science and ready-made training schedules go to work for you. Periodization of Strength Training for Sports eliminates the guesswork and establishes a clear path to achieving the best results for peaking at the ideal time. Earn continuing education credits/units! A continuing education exam that uses this book is also available. It may be purchased separately or as part of a package that includes both the book and exam.
