Managing Knowledge Steven Albert, Keith Bradley, 1997-10-02 Managing Knowledge reverses the status quo argument that organisational change is driven by the specific demands of large companies. Instead of viewing firms as the catalysts for gradual change, Albert and Bradley argue that expert professionals have fuelled a break away from the traditional organisational structure to an organisational structure at the heart of which is an agent and/or an agency system. The authors draw our attention to the growing phenomenon of atypical work manifested in workforce flexibility, mobility, the feminisation of professional employment, and technological changes. They focus upon a group of knowledge-based employees - experts - who increasingly have influence over work and wealth creation. Case studies are developed from companies including AT and T, the Hollywood film industry, London accounting firms, and specialised agencies such as Labforce and Knowledge Net.

The People's Congresses and Governance in China Ming Xia, 2007-10-30 This book provides a balanced assessment of China's communist rule, its viability as well as its prospect of democracy. The People's Congresses and Governance in China presents a complex but convincing analysis of the transformation of governance in China. As the first systemic and theoretical study of China's provincial legislatures, it draws our attention to one of the most promising growth points in China's changing constitutional order. Through in depth and first hand research, the author provides a comprehensive explanation about why the provincial legislatures have acquired institutional maturation and expanded power in the context of Chinese transitional political economy. The book portrays an innovative pattern of legislative development, sums up pragmatic local strategies for market creation, and identifies multiple dynamics for promoting accountability and democracy. Based upon the case study of provincial legislatures, Ming Xia reveals the formation of a new mode of governance in China's national politics: the network structure featuring institutional arrangements and the mohe (co-operation through competition) pattern of interaction abided by the major power players. This volume will be of interest to parliamentary scholars and parliamentarians who are concerned with the role of parliaments in transitional politics and economies of both post-communist and developing countries. It will also appeal to students and researchers of Chinese politics,

governance and Asian studies.

What Gifts Engender Rena Lederman, 1986 Gift exchange plays a crucial role in the social and political organization of Mendi in Papua New Guinea. This book reveals how considerable light can be shed on Mendi society, particularly on its political economy, by examining both the well-known ceremonial exchange festivals and the hitherto relatively little-studied everyday gift-giving practices. The author shows that the latter are crucial for understanding inter-group politics, the process of leadership, male-female relationships and the status of women, and the production, distribution and circulation of wealth. Currently the only book available on this society, the work offers an unusual combination of a social structural analysis with a study of local history and change. It is also of interest for its integration of the study of gift exchange and politics with the study of gender roles and relationships.

The London Stock Exchange Randal Michie, 2001-04-26 In 2001, the London Stock Exchange will be 200 years old, though its origins go back a century before that. This book traces the history of the London Stock Exchange from its beginnings around 1700 to the present day, chronicling the challenges and opportunities it has faced, avoided, or exploited over the years. Throughout, the history seeks to blend an understanding of the London Stock Exchange as an institution with that of the securities market of which it was - and is - such an important component. One cannot be examined satisfactorily without the other. Without a knowledge of both, for example, the causes of the 'Big Bang' of 1986 would forever remain a mystery. However, the history of the London Stock Exchange is not just worthy of study for what it reveals about the interaction between institution and market. Such was the importance of the London Stock Exchange that its rise to world dominance before 1914, its decline thereafter, and its renaissance from the mid-1980s, explain a great deal about Britain's own economic performance and the working of the international economy. For the first time a British economic institution of foremost importance is studied throughout its entire history, with regard to the roles played and the constraints under which it operated, and the results evaluated against the background of world economic progress.

This book provides network engineers, designers, and administrators with the underlying concepts as well as a complete and detailed description of the protocols and algorithms that comprise multicast. * Presents information on the entire range of multicast protocols, including, PIM-SM, MFTP, and PGM and explains their mechanisms, trade-offs, and solid approaches to their implementation * Provides an in-depth examination of Quality of Service concepts, including: RSVP, ST2, IntServ, and DiffServ * Discusses group address allocation and scoping * Discusses multicast implementation in ATM networks * Builds a solid understanding of the Mbone and surveys the successes and current limitations of real multicast applications on the Internet such as videoconferencing, whiteboards, and distance learning
