*Investment In Startups And Small Business Financing* Farhad Taghizadeh-hesary, Naoyuki Yoshino, Chul Ju Kim, Peter J Morgan, Daehee Yoon, 2021-08-03 Successful startups and small businesses can play a significant role in economic growth and job creation. They also contribute to economic dynamism by spurring innovation and injecting competition. Startups are known to introduce new products and services that can create new value in the economy. It is notable that most startups exit within their first ten years, and most surviving young businesses do not grow but remain small. Startups and small businesses face several obstacles to their development. Accessing capital is a crucial constraint on their growth. Most startups and small businesses have difficulties getting the funds they need because of their lack of a performance track record and lack of collateral, making it difficult for lenders or investors to assess their risk. Besides, they are in the early stages of development and face a very high possibility of failure, which significantly raises financing and investment risk. *Investment in Startups and Small Business Financing* provides 12 thematic and case studies on new methods for bringing private investment (loans or equity) to startups and easing small businesses' access to finance (debt and capital). The contributors are senior-level policy experts and researchers from governments, think tanks, academia, and international organizations. The chapters are authored in a policy-oriented way to be understandable for the readers with a different background. This book is a precious source for the governments for adopting the right policies to develop small businesses and startups and valuable for the researchers in economics, business, and finance.

*Handbook of Entrepreneurship Research* Zoltan J. Acs, David B. Audretsch, 2010-08-03 Interest in and attention to entrepreneurship has exploded in recent years. Nevertheless, much of the research and scholarship in entrepreneurship has remained elusive to academics, policymakers and other researchers, in large part because the field is informed by a broad spectrum of disciplines, including management, finance, economics, policy, sociology, and psychology, often pursued in isolation from each other. Since its original publication in 2003, the *Handbook of Entrepreneurship Research* has served as the definitive resource in the field, bringing together contributions from leading scholars in these disciplines to present a holistic, multi-dimensional approach. This new edition, fully revised and updated, and including several new chapters, covers all of the primary topics in entrepreneurship, including entrepreneurial behavior, risk and opportunity recognition, equity financing, business culture and strategy, innovation, and the impact of entrepreneurship on economic growth and development. Featuring an integrative introduction, extensive literature reviews and reference lists, the *Handbook* will continue to serve as a roadmap to the rapidly evolving and dynamic field of entrepreneurship.

**The Marketing Agency Blueprint** Paul Roetzer, 2011-11-29 Build a disruptive marketing agency for the modern age The marketing services industry is on the cusp of a truly transformational period. The old guard, rooted in tradition and resistant to change, will fall and new leaders will emerge. Hybrid marketing agencies that are more nimble, tech savvy, and collaborative will redefine the industry. Digital services will be engrained into the DNA and blended with traditional methods for integrated campaigns. The depth, versatility, and drive of their talent will be the cornerstones of organizations that pursue a higher purpose. The Marketing Agency Blueprint is a practical and candid guide that presents ten rules for building such a hybrid agency. The Marketing Agency Blueprint demonstrates how to: Generate more qualified leads, win clients with set pricing and service packages, and secure more long-term retainers Develop highly efficient management systems and more effective account teams Deliver greater results and value to clients This is the future of the marketing services industry. A future defined and led by underdogs and innovators. You have the opportunity to be at the forefront of the transformation.

*University-Industry Knowledge Interactions* Joaquín M. Azagra-Caro, Pablo D'Este, David Barberá-Tomás, 2022-02-22 University-industry interaction combines several layers of actors, states and effects. People make choices, based on their individual characteristics, at different stages of a scientific career, in a highly internationalised profession. Tensions arise when university administrators and managers need to strike a balance among different promotion instruments, or when the university or public research organisation tries to solve the trade-offs between long- and short-term relationships, or among new management practices. Impacts are related to scientific agendas, the economic returns for firms or the societal benefits. This book adopts a people-tension-impact approach to identify key insights, by combining qualitative and quantitative research, established and novel methodologies, and different geographic settings. The chapters in this volume provide new perspectives on university-industry interactions related to gender biases, entrepreneurial involvement of PhD students and the role of international mobility. They also focus on how the positive impacts of university-industry interactions coexist with unresolved tensions linked to policy combinations, long-term contractual relationships, management practices and organisational strategies. Chapters 4 and 6 are available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com](https://link.springer.com).

Hometown Investment Trust Funds Naoyuki Yoshino, Sahoko Kaji, 2013-03-21 This book records the first success stories of a new form of financial intermediation, the hometown investment fund, that has become a national strategy in Japan, partly to meet the need to finance small and medium-sized enterprises (SMEs) after the devastating earthquake and tsunami in March 2011. The hometown investment fund has three main advantages. First, it contributes to financial market stability by lowering information asymmetry. Individual households and firms have direct access to information about the borrowing firms, mainly SMEs, that they lend to. Second, it is a stable source of risk capital. The fund is project driven. Firms and households decide to invest by getting to know the borrowers and their projects. In this way the fund distributes risk but not so that it renders risk intractable, which was the problem with the "originate and distribute" model. Third, it contributes to economic recovery by connecting firms and households with SMEs that are worthy of their support. It also creates employment opportunities, at the SMEs as well as for the pool of retirees from financial institutions who can help assess the projects. Introduction of the hometown investment fund has huge global implications. The world is seeking a method of financial intermediation that minimizes information asymmetry, distributes risk without making it opaque, and contributes to economic recovery. Funds similar to Japan's hometown investment fund can succeed in all three ways. After all, the majority of the world's businesses are SMEs. The first

chapter explains the theory behind this method, and the following chapters relate success stories from Japan and other parts of Asia. This book should encourage policymakers, economists, lenders, and borrowers, especially in developing countries, to adopt this new form of financial intermediation, thus contributing to global economic stability.

**Islamic Fintech** Sara Sánchez Fernández,2021-03-29 The implementation of new technologies is expected to boost the development of Islamic Finance by increasing accessibility to banking and other financial services in Islamic communities and democratizing access to investment opportunities. At the same time, new technologies will increase financing opportunities and facilitate asset management for Sharia-compliant businesses. This collection of essays from selected experts in the field comprise some of the most topical issues on Islamic Fintech, combining a business focus with legal insights. The book takes as a point of departure the role that Islamic Fintech can play in promoting sustainability. The social vision of welfare improvement and justice is already embedded in Sharia's economic rules, which makes Islamic Finance particularly well suited to bridge the gap between sustainability and funding. Although it is not without challenges for the industry, technology will help unleash its potential. With a holistic approach to Islamic Fintech, the contributing authors address the application of new technologies to Islamic Finance, including robo-advisory, crowdfunding and digital ledger technology (both in the issuance of bitcoin and the registration of securities in tokenized form) and in certain sectors such as takaful (takaful-tech) and health (e-health). Finally, they explore the challenges posed by anti-money laundering ('AML') in the specific realm of Islamic Fintech. The book combines theoretical analysis with a practical focus, both through case studies and directly through the experiences of leading entrepreneurs. In addition, it provides insights on legal and regulatory aspects, which are key in a field that is still in its infancy and needs support from lawmakers and regulators. It is, thus, a reference for academics, legal practitioners, policymakers, entrepreneurs and the Islamic Finance community.
