CLINICAL STUDIES ON THE ROLE OF PREPARATIONS OF KASNI SEEDS IN TYPE 2 DIABETES MELLITUS PATIENTS

Dr. Praveen Katiyar,2021-05-04 Diabetes, also known as Diabetes Mellitus, occurs when the body is unable to make proper use of glucose, its main energy source. As a result the level of glucose in the blood becomes too high - hyperglycemia. There are three main types of diabetes - type 1, type 2 and gestational diabetes. The management of diabetes is a major health challenge. Diabetes is rising day by day. India is going to become the hub for diabetes mellitus patients. Its prevalence is steadily increasing everywhere.

Unfortunately lack of access to quality health care by the modern medicines is an important issue to be tackled by other therapeutic means. One of the most important therapeutic means may be indigenous products. Treatments for diabetes can include many options. In addition to conventional treatments there are certain claims made about various complementary and alternative treatments for diabetes. Complementary and alternative medicine includes health treatments that are not part of standard Western medical practice. The category encompasses a variety of disciplines that include everything from diet and exercise to mental conditioning and lifestyle changes. The benefit of taking chromium and other minerals has been studied and debated for several years. Several studies suggest that chromium supplements may improve diabetes control, but at present we don't have enough evidences. Ginseng has shown some sugar-lowering effects in fasting and after-meal blood sugar levels, as well as in A1c results but the studies were of very short term. But are the claims about various indigenous products and therapies accurate? For this we need evidences. The present research work was done to produce the evidences in support of Kasni seed and their preparations in management of hyperglycemias. The present work is a pioneer in the field of effectiveness of edible seeds on the diabetes mellitus. The book has been written in subsections. The beginning of book focuses on the impact of disease globally and the short term as well as long term consequences of the disease. Then it focuses on the existing therapies available in present era. The drawbacks of synthetic products and limitations have also been highlighted. The next section is focusing on the methodologies used for this clinical study and subsequently the results have also been presented. The last section is devoted for the discussion of the possible hypothesis regarding the effectiveness of experimental seeds and the possible conclusions.

Applied phytotherapy I. Ferencz Viktoria, This first volume of Applied Phytotherapy is about the most important herbs taught and used for phytotherapy purposes in Hungary. A comprehensive work that contains all the important information in one book that is essential in the practice of naturopathy. In addition to the history of phytotherapy, it discusses the basic botanical and phytotherapeutic concepts necessary for recognition and characterization. It summarizes the meaning of the most important medical and physiological Latin terms, associating them with each plant. He deals with phytochemistry, the solution preparation technologies used in phytotherapy, and the practice of recipe formation. The book contains a uniform, detailed description of 82 medicinal herbs and 7 apitherapy products for human use, supplemented with veterinary and other special specialist applications. The description of the effects of the individual medicinal plants contains, in addition to the knowledge of folk medicine, university teaching material as well as numerous international research results.

Advances in Plant Breeding Strategies: Vegetable Crops Jameel M. Al-Khayri,S. Mohan Jain,Dennis V. Johnson,2021-08-25

Plant breeders and geneticists are under constant pressure to sustain and expand food production by using innovative breeding strategies and introducing minor crops, which are well adapted to marginal lands, provide a source of nutrition, and have abiotic and biotic stress tolerance, to feed an ever-increasing human population. The basic concept of this book is to examine the use of innovative methods, augmenting traditional plant breeding, towards the improvement and development of new crop varieties, under the increasingly limiting environmental and cultivation factors, to achieve sustainable agricultural production and enhanced food security. Three volumes of the book series Advances in Plant Breeding Strategies were published in 2015, 2016 and 2018, respectively: Volume 1. Breeding, Biotechnology and Molecular Tools; Volume 2. Agronomic, Abiotic and Biotic Stress Traits and Volume 3. Fruits. In 2019, the following four volumes were published: Volume 4. Nut and Beverage Crops, Volume 5. Cereals, Volume 6. Industrial and Food Crops and Volume 7. Legumes. In 2021, three volumes are being concurrently published: Volume 8. Vegetable Crops: Bulbs, Roots and Tubers, Volume 9. Vegetable Crops: Fruits and Young Shoots and Volume 10. Vegetable Crops: Leaves, Flowerheads, Green Pods, Mushrooms and Truffles. This Volume 10, subtitled Vegetable Crops: Leaves, Flowerheads, Green Pods, Mushrooms and Truffles, consists of 14 chapters focusing on advances in breeding strategies using both traditional and modern approaches for the improvement of individual vegetable crops. Chapters are arranged in 4 parts according to the edible vegetable parts. Part I: Leaves - Chicory (*Cichorium intybus* L.), Chinese cabbage (*Brassica rapa* L. var. *pekinensis*), Rocket salad (*Eruca vesicaria* ssp. *sativa* Mill.),

Spring onion (*Allium fistulosum* L.), Water spinach (*Ipomoea aquatica* Forsk.) and Watercress (*Nasturtium officinale* R. Br.); Part II: Flowerheads and Green Pods - Cauliflower (*Brassica oleracea* var. botrytis L.), Globe artichoke (*Cynara cardunculus* var. scolymus L.), Garden pea (*Pisum sativum* L.) and Yardlong bean (*Vigna unguiculata* (L.) Walp. ssp. sesquipedalis (L.) Verdc.); Part III: Mushrooms - Enoki mushroom (*Flammulina velutipes* (Curtis) Singer) and Shiitake mushroom (*Lentinula edodes* (Berk.) Sing.); Part IV: Truffles - Desert truffles (*Terfezia* spp.) and White truffle (*Tuber magnatum* Picco and T. borchii Vittad.). Each chapter comprehensively reviews the contemporary literature on the subject and reflects the experiences of the authors. Chapters are written by internationally-reputable scientists and subjected to a review process to assure quality presentation and scientific accuracy. Each chapter begins with an introduction covering related backgrounds and provides in-depth discussion of the subject supported with high-quality color photos, illustrations and relevant data. The chapter concludes with recommendations for future research directions, a comprehensive list of pertinent references to facilitate further reading, and appendixes of genetic resources and concerned research institutes. This book series is a valuable resource for advanced students, researchers, scientists, commercial producers and seed companies as well as consultants and policymakers interested in agriculture, particularly in modern breeding technologies.

The UK Anti-Bribery Handbook Christopher Sallon KC, Sam Tate, 2021-11-30 The UK Anti-Bribery Handbook, Second Edition (formerly Bribery: A Compliance Handbook) is a guide to the Bribery Act 2010 and related cases, and acts as a reference point for those concerned with the risks arising from corrupt activities. Covering each of the principle offences, it enables the reader to implement adequate procedures to prevent bribes being paid. It contains practical guidance for those who are either conducting or facing investigations, and for those who may become the subject of a prosecution. The Second Edition includes: A revised internal investigations chapter co-authored by Sam Tate and Stephen Storey, Group Head of Ethics & Integrity at Compass Plc A new chapter by the former global head of anti-corruption at HSBC, Susan Scott, on corruption risk in regulated entities An updated chapter on Adequate Procedures setting out the latest compliance trends and expectations The UK Anti-Bribery Handbook provides checklists, case studies and relevant forms. It helps the reader to understand the key requirements of an internal investigation, to make practical updates to a corporate compliance program, and to review policies and procedures including those relating to gifts and entertainment. This is essential reading for in-house lawyers, compliance professionals and Board members who, post-Bribery Act, are ever more likely to be engaged with difficult practical issues and choices. Sir Keir Starmer, in the Foreword to the 1st edition, highlighted that: 'One of the great strengths of this book is the way the authors blend good practical legal advice, genuine insight about the attitude and approach to the authorities in the UK, and off-the-shelf policies to help corporate bodies navigate their way through these often difficult waters...The game has changed and those who ignore the practical advice offered in this book do so at their own peril'.

Evaluating the impact of Laws Regulating Illicit Drugs on Health and Society Carla Rossi, Susanna Conti, 2023-05-24 Evaluating the impact of Laws Regulating Illicit Drugs on Health and Society serves as an informative reference for social science researchers and policymakers on the science behind drug regulation. The book presents contributions from many leading researchers in drug law and policy evaluation. The 12 chapters highlight scientific evidence from a diverse range of international projects on evaluation of different illicit drug laws. Each contribution takes policies into account while also using methodological tools and relevant data sets. For a priori evaluation, the modern leximetric approach is applied to compare different drug laws. For posterior evaluation the analysis of social and health outcomes, using standard and new indicators are presented, discussed and applied. Next, the book covers the use of drug market estimation methods in policy research. Specific new indicators allowing the evaluation of interventions such as harm reduction and prevention are presented and analysed using international research data. The book concludes with a summary of the links of illegal drug market gains with corruption, and its consequences. Evaluating the impact of Laws Regulating Illicit Drugs on Health and Society gives readers a unique, evidence-based perspective on the relationship between drugs, laws, policy and socioeconomic conditions. Key Features Features 12 contributions from international experts on drug legislation and social science Demonstrates evidence-based evaluation of drug laws and policies Highlights Leximetric and forecast methods applied to illicit drug laws with examples Highlights the use of standard and new socioeconomic indicators to evaluate drug laws and policies Informs readers about different policy approaches to drug regulation and their consequences Summarizes the links of illegal drug markets with corruption Provides detailed references for further reading

Quality of Horticultural Crops: A Recurrent/New Challenge for Plant Scientists in a Changing World Nadia Bertin, Michel Génard, Maarten Hertog, 2018-10-11 Besides increasing crop yield to feed the growing population, improving crop quality is a challenging and key issue. Indeed, quality determines consumer acceptability and increases the attractiveness of fresh and processed products. In this respect, fruit and vegetables, which represent a main source of vitamins and other health compounds, play a major role in human diet. This is the case in developing countries where populations are prone to nutritional deficiencies, but this is also a pending issue worldwide, where the growing middle class is increasingly aware and in search of healthy food. So a future challenge for the global horticultural industry will be to answer the demand for better quality food in a changing environment, where many resources will be limited. This e-collection collates state-of-the-art research on the quality of horticultural crops, covering the underlying physiological processes, the genetic and environmental controls during plant and organ development and the postharvest evolution of quality during storage and processing.
