DITA Best Practices Laura Bellamy,Michelle Carey,Jenifer Schlotfeldt,2012 &>The Start-to-Finish, Best-Practice Guide to Implementing and Using DITA Darwin Information Typing Architecture (DITA) is today's most powerful toolbox for constructing information. By implementing DITA, organizations can gain more value from their technical documentation than ever before. Now, three DITA pioneers offer the first complete roadmap for successful DITA adoption, implementation, and usage. Drawing on years of experience helping large organizations adopt DITA, the authors answer crucial questions the official DITA documents ignore, including: Where do you start? What should you know up front? What are the pitfalls in implementing DITA? How can you avoid those pitfalls? The authors begin with topic-based writing, presenting proven best practices for developing effective topics and short descriptions. Next, they address content architecture, including how best to set up and implement DITA maps, linking strategies, metadata, conditional processing, and content reuse. Finally, they offer in the trenches solutions for ensuring quality implementations, including guidance on content conversion. Coverage includes: Knowing how and when to use each DITA element-and when not to Writing minimalist, task-oriented information that quickly meets users' needs Creating effective task, concept, and reference topics for any product, technology, or service Writing effective short descriptions that work well in all contexts Structuring DITA maps to bind topics together and provide superior navigation Using links to create information webs that improve retrievability and navigation Gaining benefits from metadata without getting lost in complexity Using conditional processing to eliminate redundancy and rework Systematically promoting reuse to improve quality and reduce costs Planning, resourcing, and executing effective content conversion Improving quality by editing DITA content and XML markup If you're a writer, editor, information architect, manager, or consultant who evaluates, deploys, or uses DITA, this book will guide you all the way to success. Facebook Steven Levy,2020-02-25 One of the Best Technology Books of 2020—Financial Times “Levy’s all-access Facebook reflects the reputational swan dive of its subject. . . . The result is evenhanded and devastating.”—San Francisco Chronicle “[Levy’s] evenhanded conclusions are still damning.”—Reason “[He] doesn’t shy from asking the tough questions.”—The Washington Post “Reminds you the HBO show Silicon Valley did not have to reach far for its satire.”—NPR.org The definitive history, packed with untold stories, of one of America’s most controversial and powerful companies: Facebook As a college sophomore, Mark Zuckerberg created a simple website to serve as a campus social network. Today, Facebook is nearly unrecognizable from its first, modest iteration. In light of recent controversies surrounding election-influencing “fake news” accounts, the handling of its users’ personal data, and growing discontent with the actions of its founder and CEO—who has enormous power over what the world sees and says—never has a company been more central to the national conversation. Millions of words have been written about Facebook, but no one has told the complete story, documenting its ascendancy and missteps. There is no denying the power and omnipresence of Facebook in American daily life, or the imperative of this book to document the unchecked power and shocking techniques of the company, from growing at all costs to outmaneuvering its biggest rivals to acquire WhatsApp and Instagram, to developing a platform so addictive even some of its own are now beginning to realize its dangers. Based on hundreds of interviews from inside and outside Facebook, Levy’s sweeping narrative of incredible entrepreneurial success and failure digs deep into the whole story of the company that has changed the world and reaped the consequences.

New Directions in Library and Information Science Education José-Marie Griffiths, Donald W. King, American Society for Information Science, 1986 To determine the current and future competencies required by librarians and information professionals, a project was undertaken to meet the following objectives: set forth an idealized framework to be used by the librarian and information professional community; determine a first set of competencies which are validated in the workplace to some extent; establish initial education and training requirements; initiate a process for communication among the principal librarians and information professional participants which can be continued after project completion; and describe steps that can be taken in the future to ensure continuation of the competency achievement cycle. To meet these objectives, substantial input was obtained from a large number of organizations, educators, employers, professional societies, and individual professionals. The study results are presented in a six-chapter report and five appendices. Report chapters comprise: Overview of the Project; A Framework for Describing Librarian and Information Professional Competencies; Methods; Information Workers and Librarians and Information Professionals; Librarian and Information Professional Competencies; and Educational Requirements and Implications. Appendices include a literature review; secondary analyses (including analyses of information professional and librarian vacancy announcements); an example of the relationships between competencies, performance, effectiveness, and value in three special libraries; a bibliography; and an annotated bibliography. Twelve supplementary volumes provide detailed descriptions of competencies for the following positions: (1) Academic Librarian; (2) Public Librarian; (3) School Librarian; (4) Special Librarian; (5) Database Producer; (6) Database Distributor/Service; (7) Information Center/Clearinghouse; (8) Records and Information Manager; (9) Archivist/Museum; (10) Information Analysis Center; (11) Information Service Company; and (12) Library System Supplier.
