- ⬜ Using CAT Tools in Freelance Translation Paulina Pietrzak,Michal Kornacki,2020-11-29 This book explores the impact of applying computer-assisted (CAT) tools in freelance translation toward better understanding translators' strategies, preferences, and challenges in using new technologies and identifying areas of enhancement in translator training. The volume offers a brief overview of the latest developments in technology in translation, examining such issues as the effect on the translation process and the dynamics of the translator-technology interaction. Drawing on data from a study with active translators in Poland, Pietrzak and Kornacki examine the underlying factors underpinning translators' lack of engagement with these tools, including such issues as prevailing pre-conceptions around technology and limited knowledge hindering the most efficacious use of these resources and the subsequent impact on translator identity. Taken together, the book brings together these insights to help pinpoint freelance translators' needs more effectively and adapt training programmes accordingly. The volume will be of interest to scholars in translation studies with an interest in process and technology as well as active translators.
- ⬜ Text Linguistics and Translation Ali Albashir Mohammed Al-Haj,2014-06-16 Competent translators do not work by rule of thumb or recipe, they possess, like good cooks, a lot of principles, which guide their work. Libraries in our Arab world have few books on translation from Arabic into English and vice versa, that may instigate thinking of students and even translators. A book of this kind which is being brought out to give to the students of translation and translators another source. It may be found to have enriched the existing literature by putting most of the relevant material at various chapters and by providing to the needy students and translators; a compact book on the subject.

- **Advances in SIoT (Social Internet of Things)** Gururaj H L,Pramod H B,Gowtham M,2023-04-19 The Social Internet of Things (SIoT) has become a hot topic in academic research. It employs the theory of social networks into the different levels of the Internet of Things (IoTs) and has brought new possibilities for the development of IoTs. Essentially, the SIoT is a subset of IoTs. It uses intelligent hardware and humans as the node, a social network as the organization type, the social relationship between things, things and humans, and between humans, formatting research methods and models with social network characteristics to realize the connection, service, and application of the IoTs. Moreover, SIoT is a form of realization of technology, architecture, and application of the IoTs using social network research methods. It further promotes the integration between real-world and virtual cyberspace, contributes the realization of the IoTs, expands the research scope of the social networking, and provides a new solution for the specific problems of the IoTs. Consequently, there is a tremendous need for researchers to have a comprehensive knowledge of the advances in SIoT. This special issue is soliciting scientific research papers that can present a snapshot of the latest research status of SIoT.
