Hydrogen Storage Jianjun Liu, 2012-09-05 Hydrogen, as an energy carrier, is widely regarded as a potential cost effective, renewable, and clean energy alternative to petroleum in order to mitigate energy shortage and global climate warming issues that the world is currently facing. However, storage of hydrogen is a substantial challenge, especially for applications in vehicles with fuel cells that use proton-exchange membranes (PEMs). Therefore, scientific community has started focusing their research activities on developing advanced hydrogen storage materials through nanotechnology. The book presents a wide variety of nanostructured materials used for application in hydrogen storage, covering chemical and physical storage approaches. The research topics include computational design, synthesis, processing, fabrication, characterization, properties and applications of nanomaterials in hydrogen storage systems.

Fundamentals of Forensic DNA Typing John M. Butler, 2009-09-30 Fundamentals of Forensic DNA Typing is written with a broad viewpoint. It examines the methods of current forensic DNA typing, focusing on short tandem repeats (STRs). It encompasses current forensic DNA analysis methods, as well as biology, technology and genetic interpretation. This book reviews the methods of forensic DNA testing used in the first two decades since early 1980's, and it offers perspectives on future trends in this field, including new genetic markers and new technologies. Furthermore, it explains the process of DNA testing from collection of samples through DNA extraction, DNA quantitation, DNA amplification, and statistical interpretation. The book also discusses DNA databases, which play an important role in law enforcement investigations. Development of an Integrated Approach to Routine Automation of Neutron Activation Analysis, 2018 Neutron activation analysis (NAA) is a powerful technique for determining bulk composition of major and trace elements. Automation may contribute significantly to keep NAA competitive for end-users. It provides opportunities for a larger analytical capacity and a shorter overall turnaround time if large series of samples have to be analysed. This publication documents and disseminates the expertise generated on automation in NAA during a coordinated research project (CRP). The CRP participants presented different cost-effective designs of sample changers for gamma-ray spectrometry as well as irradiation devices, and were able to construct and successfully test these systems. They also implemented, expanded and improved quality control and quality assurance as cross-cutting topical area of their automated NAA procedures. The publication serves as a reference of interest to NAA practitioners, experts, and research reactor personnel, but also to various stakeholders and users interested in basic research and/or services provided by NAA. The individual country reports are available on the CD-ROM attached to this publication.--Publisher's description

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in

Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

The country's energy needs will have to transition from diminishing and polluting non-renewable sources of energy to renewable sources. So what is the future of fossil fuels? Can the Mandatory Renewable Energy Target of 20% of Australia's energy supply by 2020 make a real difference? Topics in *Our Energy Future* include: carbon capture and storage; 'clean coal' technology; peak oil; nuclear power; boosting Australia's energy efficiency and productivity; and household energy-saving tips. The book also explores the major renewables in detail: solar, wind, hydroelectricity, geothermal, bio-energy, wave energy, and the potential of hydrogen power. Control and Management of Radioactive Material Inadvertently Incorporated Into Scrap Metal ,2011 Metal recycling has become an important industrial activity in all countries. It is seen as being socially and environmentally beneficial because it conserves natural ore resources and saves energy. However, radioactive material may become associated with scrap metal inadvertently and, if it is melted, can cause health and economic problems as well as public acceptance issues for scrap metal. This publication is the proceedings of a conference organized by the Spanish Nuclear Safety Council in cooperation with the IAEA with the aim of sharing experiences and contributing towards the resolution of problems caused by the inadvertent presence of radioactive material in scrap metal. Conclusions and recommendations were developed concerning the current situation and the future in dealing with the problems identified.--Provided by publisher.
