**Proportionality Analysis and Models of Judicial Review** Benedikt Pirker,2013 Proportionality analysis describes a particular legal technique of resolving conflicts between human rights or constitutional rights and public interests through a process of balancing. However, as a general tendency, the current vivid academic debate on proportionality pays insufficient attention to the institutional context - the question of judicial review. Based on the premise that proportionality analysis is a permissible approach to resolve conflicts between rights and other interests, this book lays out a strategy for courts and tribunals to deal with the challenge of using proportionality analysis in an adequate manner, taking into account their situation and context of judicial review. For this purpose, the book develops the concept of models of judicial review in a first theoretical chapter. These models are then applied to six comparative case studies in German and US constitutional law, the law of the European Convention on Human Rights, European Union law, World Trade Organization law, and international investment law. (Series: European Administrative Law - Vol. 8)

The Armenians in the Medieval Islamic World Seta B. Dadoyan,2011-11-30 In this first of a massive three-volume work, Seta B. Dadoyan studies the Armenian experience in the medieval Islamic world and takes the reader through hitherto undiscovered paradigmatic cases of interaction with other populations in the region. Being an Armenian, Dadoyan argues, means having an ethnic ancestry laden with narratives drawn from the vast historic Armenian habitat. Contradictory trends went into the making of Armenian history, yet most narratives fail to reflect this rich texture. Linking Armenian-Islamic history is one way of dealing with the problem. Dadoyan's concern is also to outline revolutionary elements in the making of Armenian ideologies and politics. This extensive work captures the multidimensional nature of the Armenian experience in the medieval Islamic world. The author holds that every piece of literature, including historical writing, is an artifact. It is a composition of many elements arranged in certain forms: order, sequence, proportion, detail, intensity, etc. The author has composed and arranged the larger subjects and their sub-themes in such a way as to create an open, dynamic continuity to Armenian history that is intellectually intriguing, aesthetically appealing, and close to lived experiences.

**Biodiversity Prospecting** Walter V. Reid,World Resources Institute,Instituto Nacional de Biodiversidad (Costa Rica),Rainforest Alliance,African Centre for Technology Studies,1993 Interest in the commercial value of genetic and biochemical resources is burgeoning. Virtually no precedent exists for policies and legislation to govern and regulate what amounts to a brand new industry. This report provides guidelines for establishing policies for biodiversity prospecting.

**Apollo 17** Lyndon B. Johnson Space Center,1973 The Apollo 17 flight and lunar landing, the sixth and final lunar landing and third extended science capability mission in the Apollo Program, are discussed with emphasis on the scientific endeavors conducted on the lunar surface. The scientific investigation of the mission is presented in three interrelated types of activities: the lunar surface sampling and observation, the lunar surface experiments, and the inflight experiments. Collection, documentation, and description of the lunar samples are discussed with a preliminary evaluation and analysis. The lunar surface experiments are described, including the results and their relationship to the scientific objectives of each experiment. The geochemical, photographic, geophysical, topographic, and medical data resulting from experiments conducted in flight are presented.

**Financial Innovation and Resilience** Lilia Costabile,Larry Neal,2018-09-28 As Ignazio Visco, Governor of the Bank of Italy, says in his Foreword, all economic policy makers today need to re-examine our history to help them confront the challenges of today. This edited volume focuses specifically on the theme of financial innovation and how financial resiliency was achieved in Naples. To highlight both the achievements of the public banks of Naples and their lessons for financial resiliency, the book focuses on financial crises and how they were overcome in Naples in contrast to other European financial systems. The first section focuses on the development of the public banks unique to Naples. The second section compares those with other banking systems and how they responded to the same shock in 1622, caused by the full mobilization of European belligerents to finance their efforts in the Thirty Years War. The next section compares lessons learned in the rest of Europe over the next century and a half. The final section comes back to original start of the narrative arc to suggest ways that today's policymakers and thinkers could use the historical experience of the public banks of Naples to deal better with the ongoing problems stemming from the financial crisis of 2007-08.

*Sapphira and the Slave Girl* Willa Cather,2009-07-01 Willa Cather's twelfth and final novel, *Sapphira and the Slave Girl*, is her most intense fictional engagement with political and personal conflict. Set in Cather's Virginia birthplace in 1856, the novel draws on family and local history and the escalating conflicts of the last years of slavery—conflicts in which Cather's family members were deeply involved, both as slave owners and as opponents of slavery. Cather, at five years old, appears as a character in an unprecedented first-person epilogue. Tapping her earliest memories, Cather powerfully and sparely renders a Virginia world that is simultaneously beautiful and, as she said, "terrible." The historical essay and explanatory notes explore the novel's grounding in family, local, and national history; show how southern cultures continually shaped Cather's life and work, culminating with this novel; and trace the progress of Cather's research and composition during years of grief and loss that she described as the worst of her life. More early drafts, including manuscript fragments, are available for *Sapphira and the Slave Girl* than for any other Cather novel, and the revealing textual essay draws on this rich resource to provide new insights into Cather's composition process.

**Metallo-Drugs: Development and Action of Anticancer Agents** Astrid Sigel,Helmut Sigel,Eva Freisinger,Roland K.O. Sigel,2018-02-05 Volume 18, entitled *Metallo-Drugs: Development and Action of Anticancer Agents* of the series *Metal Ions in Life Sciences* centers on biological, medicinal inorganic chemistry. The serendipitous discovery of the antitumor activity of cis-diamminodichloroplatinum(II) (cisplatin) by Barnett Rosenberg in the 1960s is a landmark in metallodrug-based chemotherapy. The success of cisplatin in the clinic, followed by oxaliplatin and carboplatin, along with their drawbacks relating mainly to resistance development and severe toxicity, initiated research on polynuclear platinum complexes and on Pt(IV) complexes as prodrugs. Furthermore, the indicated shortcomings led to the exploration of other transition and main group metal ions, among them Ru(II/III), Au(I/III), Ti(IV), V(IV/V), and Ga(III) including also the essential metal ions Fe(II/III), Cu(I/II), and Zn(II). Ionic as well as covalent and non-covalent interactions between structurally very different complexes and biomolecules like nucleic acids, proteins, and carbohydrates are studied and discussed with regard to their possible anticancer actions. Hence, MILS-18 summarizes the research at the forefront of medicinal inorganic chemistry, including studies on the next-generation, tailor-made anticancer drugs. All this and more is treated in an authoritative and timely manner in the 17 stimulating chapters of this book, written by 39 internationally recognized experts from 10 nations (from the US via Europe to China and Australia). The impact of this vibrant research area is manifested by more than 2700 references, nearly 150 illustrations (more than half in color) and several comprehensive tables. *Metallo-Drugs: Development and Action of Anticancer Agents* is an essential resource for scientists working in the wide range from enzymology, material sciences, analytical, organic, and inorganic biochemistry all the way through to medicine including the clinic ... not forgetting that it also provides excellent information for teaching.

*J & P Transformer Book* Martin Heathcote,2011-04-01 Maintaining appropriate power systems and equipment expertise is necessary for a utility to support the reliability, availability, and quality of service goals demanded by energy consumers now and into the future. However, transformer talent is at a premium today, and all aspects of the power industry are suffering a diminishing of the supply of knowledgeable and experienced engineers. Now in print for over 80 years since initial publication in 1925 by Johnson & Phillips Ltd, the J & P Transformer Book continues to withstand the test of time as a key body of reference material for students, teachers, and all whose careers are involved in the engineering processes associated with power delivery, and particularly with transformer design, manufacture, testing, procurement, application, operation, maintenance, condition assessment and life extension. Current experience and knowledge have been brought into this thirteenth edition with discussions on moisture equilibrium in the insulation system, vegetable based natural ester insulating fluids, industry concerns with corrosive sulphur in oil, geomagnetic induced current (GIC) impacts, transportation issues, new emphasis on measurement of load related noise, and enhanced treatment of dielectric testing (including Frequency Response Analysis), Dissolved Gas analysis (DGA) techniques and tools, vacuum LTCs, shunt and series reactors, and HVDC converter transformers. These changes in the thirteenth edition together with updates of IEC reference Standards documentation and inclusion for the first time of IEEE reference Standards, provide recognition that the transformer industry and market is truly global in scale. -- From the foreword by Donald J. Fallon Martin Heathcote is a consultant specializing in power transformers, primarily working for utilities. In this context he has established working relationships with transformer manufacturers on several continents. His background with Ferranti and the UK's Central Electricity Generating Board (CEGB) included transformer design and the management and maintenance of transformer-based systems. \* The definitive reference for all involved in designing, installing, monitoring and maintaining high-voltage systems using power transformers (electricity generation and distribution sector; large-scale industrial applications) \* The classic reference work on power transformers and their applications: first published in 1925, now brought fully up to date in this thirteenth edition \* A truly practical engineering approach to design, monitoring and maintenance of power transformers - in electricity generation, substations, and industrial applications.

*An Introduction to Islam* Frederick Denny,2015-09-21 An Introduction to Islam, Fourth Edition, provides students with a thorough, unified and topical introduction to the global religious community of Islam. In addition, the author's extensive field work, experience, and scholarship combined with his engaging writing style and passion for the subject also sets his text apart. An Introduction to Islam places Islam within a cultural, political, social, and religious context, and examines its connections with Judeo-Christian morals. Its integration of the doctrinal and devotional elements of Islam enables readers to see how Muslims think and live, engendering understanding and breaking down stereotypes. This text also reviews pre-Islamic history, so readers can see how Islam developed historically.
