**Venture Capital and Private Equity Contracting** Douglas J. Cumming,Sofia A. Johan,2009-04-02 Other books present corporate finance approaches to the VC/PE industry, but many key decisions require an understanding of the ways that law and economics work together. Venture Capital and Private Equity Contracting is better than straight corporate finance textbooks because it offers broad perspectives and principles that enable readers to deduce the economic implications of specific contract terms. This approach avoids the common pitfalls of implying that contractual terms apply equally to firms in any industry anywhere in the world. Explores the economic implications of contract terms for start-up firms in various industries Pairs international data with explanations and examples about differences in VC and PE national and regional markets Contains sample contracts, including limited partnership agreements, term sheets, shareholder agreements, and subscription agreements Presents international datasets on limited partnership agreements between institutional investors and VC and PE funds

Rural Archaeology in Early Urban Northern Mesopotamia Glenn M. Schwartz,2015-12-31 This book presents the results of the extensive excavation of a small, rural village from the period of emerging cities in upper Mesopotamia (modern northeast Syria) in the early to middle third millennium BC. Prior studies of early Near Eastern urban societies generally focused on the cities and elites, neglecting the rural component of urbanization. This research represents part of a move to rectify that imbalance. Reports on the architecture, pottery, animal bones, plant remains, and other varieties of artifacts and ecofacts enhance our understanding of the role of villages in the formation of urban societies, the economic relationship between small rural sites and urban centers, and status and economic differentiation in villages. Among the significant results are the extensive exposure of a large segment of the village area, revealing details of spatial and social organization and household economics. The predominance of large-scale grain storage and processing leads to questions of staple finance, economic relations with pastoralists, and connections to developing urban centers.

**Soil Survey of Cibola Area, New Mexico, Parts of Cibola, McKinley, and Valencia Counties** Tommie Lee Parham,1993 This soil survey contains information that can be used in land-planning programs in the survey area. It contains predictions of soil behavior for selected land uses. The survey also highlights limitations and hazards inherent in the soil, improvements needed to overcome the limitations, and the impact of selected land uses on the environment--Page xi
