Advanced Topics in Artificial Intelligence Norman Foo,2007-12-07 The 12th Australian Joint Conference on Artificial Intelligence (AI'QQ) held in Sydney, Australia, 6-10 December 1999, is the latest in a series of annual regional meetings at which advances in artificial intelligence are reported. This series now attracts many international papers, and indeed the constitution of the program committee reflects this geographical diversity. Besides the usual tutorials and workshops, this year the conference included a companion symposium at which papers on industrial applications were presented. The symposium papers have been published in a separate volume edited by Eric Tsui. Ar99 is organized by the University of New South Wales, and sponsored by the Australian Computer Society, the Commonwealth Scientific and Industrial Research Organisation (CSIRO), Computer Sciences Corporation, the KRRU group at Griffith University, the Australian Artificial Intelligence Institute, and Neuron- Works Ltd. Ar99 received over 120 conference paper submissions, of which about one-third were from outside Australia. From these, 39 were accepted for regular presentation, and a further 15 for poster display. These proceedings contain the full regular papers and extended summaries of the poster papers. All papers were refereed, mostly by two or three reviewers selected by members of the program committee, and a list of these reviewers appears later. The technical program comprised two days of workshops and tutorials, followed by three days of conference and symposium plenary and paper sessions.

The Acquisition of Chinese as a First and Second Language Xiaohong Wen,2020-11-25 This volume, through highly selective and rigorous review processes, has collected eight empirical studies showcasing research advances in multiple domains including child first language, adult additional language, and heritage language acquisition. The studies are theoretically motivated and have adopted a spectrum of innovative methodological strategies to achieve a broader understanding of the nature of learning and the learning process. The volume encompasses a wide range of contents: 1) The L1 and L2 acquisition of syntax, semantics, phonetics, and the syntax-discourse interface; 2) Data comparisons across different learner groups: L1 Chinese children, L2 Chinese learners, and Chinese heritage speakers; 3) Acquisition of language skills: speaking, listening, and writing; and last but not least, 4) Instructional interventions including consciousness-raising and metacognitive strategy training. The volume is intended to bridge the gap between research and instruction by helping teachers understand their students and their learning. Informed by research, teachers can opt for appropriate pedagogical approaches and instructional conditions for their students. The volume is guest-edited by Xiaohong Wen, Professor in Applied Linguistics and Chinese language Acquisition at the University of Houston.

Proceedings of the International Conference on Learning and Advanced Education (ICOLAE 2022) Mauly Halwat Hikmat,Yasir Sidiq,Naufal Ishartono,Yunus Sulistyono,Patmisari,Susiati,2023-08-29 This is an open access book. The COVID-19 pandemic in the last two years has influenced how educational system works. Online learning became the primal policy taken by all institutions in the world to lower the risk of the virus spread. Despite the drawbacks of the online learning, teachers and students were accustomed with the distant learning through web meetings, Learning Management Systems (LMS) and other online learning platforms. In that time, topics under digital learning and education 5.0 were the main stakes in academic disseminations. This year some institutions start to conduct their teaching and learning process classically as before the pandemic, others are still continuing online and not few are in hybrid. This leaves a question: what learning reform should be made in post-pandemic era? This conference invites researchers, experts, teachers and students to discuss the coping solutions of the question. It is important for them to contribute to the understanding of re-imaging online education for better futures, innovative learning design, new skills for living and working in new times, global challenge of education, learning and teaching with blended learning, flipped learning, integrating life skills for students in the curriculum, developing educators for the future distance learning, humanities learning in the digital era, assessment and measurement in education, challenges and transformations in education, technology in teaching and learning, new learning and teaching models. Not limited to these, scholars may add another interesting topic related to learning reform in post-pandemic era to present.
