Information Security and Privacy in Network Environments, 1994 The use of information networks for business and government is expanding enormously. Government use of networks features prominently in plans to make government more efficient, effective, and responsive. But the transformation brought about by the networking also raises new concerns for the security and privacy of networked information. This Office of Technology Assessment (OTA) report was requested by the Senate Committee on Governmental Affairs and the House Subcommittee on Telecommunications and Finance. The report begins with background information and an overview of the current situation, a statement of the problems involved in safeguarding unclassified networked information, and a summary of policy issues and options. The major part of the report is then devoted to detailed discussions of policy issues in three areas: (1) cryptography policy, including federal information processing standards and export controls; (2) guidance on safeguarding unclassified information in federal agencies; and (3) legal issues and information security, including electronic commerce, privacy, and intellectual property. Appendices include Congressional letters of request; the Computer Security Act and related documents; evolution of the digital signature standard; and lists of workshop participants, reviews, and other contributors. An index is provided. A separately published eight-page OTA Report Summary is included. (JLB).

Identification of Textile Fibers M M Houck, 2009-01-30 The identification of fibers is important to the textile industry, forensic science, fashion designers and historians among others. Identifying fibers involves observing the physical and chemical properties of the fiber for which there are a wide diversity of instruments available. This book provides a comprehensive review of fiber structure, the diversity of instruments available to identify fibers and applications for a range of industries. The first part of the book examines the main fibers, their structure and characteristics. Part two focuses on methods of fiber identification, ranging from microscopic to DNA analysis. Specific applications, including how textiles are identified in forensic investigations. Identification of textile fibers is an important text for forensic scientists, police and lawyers who may be involved with the use of textile fibers to provide evidence in criminal cases. It will also be relevant for textile designers, technologists and inspectors wishing to assess fiber quality and understand fiber damage. Provides a comprehensive review of the main types of fibre together with their structure, characteristics and identification Assesses methods of fibre identification from optical microscopy to DNA analysis as well as instruments available to identify fibres

Male Infertility Edmund S. Sabanegh, Jr., 2010-10-20 Male Infertility: Problems and Solutions provides a summary of state of the art developments in male infertility for both new and experienced practitioners. Written in a clear, concise and readable style, this volume allows the reader to obtain rapid answers to this challenging medical issue. Special emphasis is placed on diagnostic and treatment algorithms. Topics covered include interpretation of semen analysis and advanced testing, endocrine and genetic evaluation, diagnosis of azoospermia as well as an up-to-date interpretation and analysis of the many new therapies available for the treatment of male factor infertility. Male Infertility: Problems and Solutions provides rapid acquisition of pertinent background and development of management plans through the use of concise discussion and treatment algorithms and thus will be of great value to general urologists, gynecologists, primary care providers and allied health providers who manage infertility in both men as well as women.

Seed Proteins W. Gottschalk, H.P. Müller, 1983-04-30 Investigations on seed proteins have been intensively carried out during the past two decades. This is valid with regard to both their chemical composition as well as their nutritive value. The development of new biochemical and physical methods has resulted in obtaining deep insights into the structures of seed proteins and their mutual interactions. Intensive exchange of information between the scientists participating in national and international research programmes has given strong impulses for intensifying the research in this field. For the quantitative and qualitative investigations of seed proteins, not only some model plants were used; on the contrary, they were carried out on a large number of different crops important for different regions of the earth. In this way, a level of knowledge has been reached which could not be expected in this diversity within such a short period. This holds not only true for biochemical but also for physiological characters of the species of the limiting amino acids studied. With regard to nutritional aspects, the problem was of special interest, but also seed proteins acting as antinutritional factors were analysed in detail. Based on the knowledge of seed protein structures, it was possible to perform investigations on the genetic basis of their synthesis. This was done under two different aspects: The basic knowledge on the genes involved should be widened; moreover, it should be tried to improve the seed proteins quantitatively and qualitatively under the influence of mutant genes.

National Marine Policy Canada. Transport Canada, 1995 Contains fact sheets designed to provide similar information on all ports in Newfoundland. Information for the fact sheets was collected from the organisations responsible for managing each port. Information given for each port (wherever applicable) includes name of constituency or constituencies in which the port is located, amount of property owned and/or administered, number of persons employed, facilities such as piers and terminals, services provided, data on commercial traffic and finances, major commodities handled, capital and dredging expenditures, and a name/address/telephone number for further information. Includes lists of ports by category (regional/local, mandatory Canada port authority, remote sites, and deproclaimed public harbours) and a glossary.

Warhol-isms Andy Warhol, 2022-05-10 A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—"In the future, everyone will be world-famous for 15 minutes." Warhol-isms separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well. I went to [a psychiatrist] once, and he never called me back. They always say that time changes things, but you actually have to change them yourself. I've never met a person I couldn't call a beauty. New things are always better than old things. I'm still a commercial artist. I was always a commercial artist.

100 Words To Make You Sound Smart American Heritage Dictionaries, 2006-10-04 Find the right words to make a point, seal the deal, or just keep folks listening! Chosen by the editors of the American Heritage Dictionaries, these words can help anyone who wants to be a more compelling communicator—as a worker, consumer, advocate, friend, dinner companion, or even romantic prospect. The book includes a colorful variety of words, including handy words of just one syllable (such as glib) and words derived from the names of famous people (such as Freudian slip and Machiavellian). There are expressions from popular culture (Catch-22) and words that date back to classical civilization (spartan and stoic). Each word is clearly defined and shown in context with quotations from magazines, newspapers, broadcast media, movies, and television. For many words, quotations from distinguished authors and speakers are also given and word histories are explained. *100 Words to Make You Sound Smart* provides an enjoyable way to communicate more effectively, distinctively, and articulately.

Biomedical Science and Technology Mark Walters,2015-01-24 This book is an attempt to provide a comprehensive account of biomedical science and biotechnology. Biomedical science is a vast field dealing with disease progression, paradigms and therapeutic measures. For instance, physiological systems engineering in medical assessment is analyzed under biomedical sciences. Biotechnology covers study of biological sciences, efficacy of pharmaceuticals, application of genetic engineering and much more. Mathematical drafting of physiological systems and their assessment comes under physiological engineering. Even in hospital management, both biomedical science and engineering are required in order to run hospitals efficiently. This book will prove to be a valuable source for clinicians, scientists and students.

The Sayings of Mahatma Gandhi Graham Brash Editorial Staff,Mahatma Gandhi,Peter H. Burgess,1984 Although Gandhi denies the sainthood that others pressed upon him, and claimed to be no more than a practical realist with less than average ability, there has never been any doubt in the minds of millions of his admirers that he was somehow a man of another order -- more sensitive, more aware, more highly conscious than even the most gifted of men. He brought to the world the priceless gift of a new hope for its salvation through non-violence; a concept far from nebulous and ineffectual, as his countrymen were to discover in their struggle for India's independence. This book offers a selection of Gandhi's sayings, arranged in an order of progression so that his ideas and philosophy become more accessible to the reader wishing to develop a broader understanding of this remarkable man who, for many, remains the greatest mortal of this century.
