AeroStruct: Enable and Learn How to Integrate Flexibility in Design Ralf Heinrich, 2018-01-30 This book reports on the German research initiative AeroStruct, a three-year collaborative project between universities and the aircraft industry. It describes the development of an integrated multidisciplinary simulation environment for aircraft analysis and optimization using high-fidelity methods. This system is able to run at a high level of automatism, thus representing a step forward with respect to previous ones. Its special features are: a CAD description that is independent from the disciplines involved, an automated CFD mesh generation and an automated structure model generation including a sizing process. The book also reports on test cases by both industrial partners and DLR demonstrating the advantages of the new environment and its suitability for the industry. These results were also discussed during the AeroStruct closing Symposium, which took place on 13-14 October 2015 at the DLR in Braunschweig, Germany. The book provides expert readers with a timely report on multidisciplinary aircraft design and optimization. Thanks to a good balance between theory and practice, it is expected to address an audience of both academics and professional, and to offer them new ideas for future research and development.

Space Supporting Africa Annette Froehlich, André Siebrits, 2019-05-30 In this book the background and context of Africa's political and socio-economic landscape is presented and unpacked through a primary needs approach which focuses on climate, biodiversity, health, water, education, and space-related capacity building. African theoretical contributions from the International Relations field are discussed, and Africa's new Space Policy and Strategy, along with debates around the establishment of an African Space Agency, are explored. The African International Space Ecosystem is then analyzed, including its dimensions of intra-African space relations and initiatives, African participation in COPUOS, and international space activities, agreements, and initiatives in Africa. The final part is dedicated to the national space infrastructure and activities of African states.

Venecia's Earthling James L. Barbour, 2013-04-03 Bill Brady, a highly-placed U.S. official is abducted by the beautiful and otherworldly Venecia and transported across the galaxy to the planet Aequatanus. There he discovers a world at peace with reasonable prosperity, health and contentment enjoyed by all its inhabitants. Bill returns to Earth on a mission to promote the successful methods he has observed. The process begins with proposals for a reformed United Nations, improved continental alliances, and neutralization of weapons of mass destruction along with others. A romance between Bill and his beautiful alien hostess is deftly woven throughout the book to make for an enjoyable read. While fictional in form, VENECIA'S EARTHLING contains a potential blueprint of our evolving world organization and order. The literary content, charts and explanatory notes in particular, set out ideas intended to stimulate constructive thinking as we begin to shape our coming world and move forward in the 21st Century and beyond.

Safety and Security Engineering VII Lombardi, M., 2018-01-29 Papers presented at the 7th in a series of interdisciplinary conferences on safety and security engineering are contained in this book. The papers include the work of engineers, scientists, field researchers, managers and other specialists involved in one or more of the theoretical and practical aspects of safety and security. Safety and Security Engineering, due to its special nature, is an interdisciplinary area of research and application that brings together in a systematic way, many disciplines of engineering, from the traditional to the most technologically advanced. This volume covers topics such as crisis management, security engineering, natural and man-made disasters and emergencies, risk management, and control, protection and mitigation issues. Specific themes include: Risk analysis, assessment and management; System safety engineering; Incident monitoring; Information and communication security; Disaster management; Emergency response; Critical infrastructure protection; Counter terrorism issues; Human factors; Transportation safety and security; Modelling and experiments; Security surveillance systems; Cyber security / E security; Loss prevention; BIM in Safety and Security.

The Role of Italian Fighter Aircraft in Crisis Management Operations: Trends and Needs Vincenzo

Camporini, Tommaso De Zan, Alessandro Marrone, Michele Nones, Alessandro R. Ungaro, 2014-08-16 Italian combat aircraft have played an increasingly important role in the international missions in which Italy has participated in the post-Cold War era – from the First Gulf War to Libya, including Bosnia-Herzegovina, Kosovo and Afghanistan. This participation has been a significant tool of Italy's defense policy, and therefore of its foreign policy towards crisis areas relevant to its national interests (from the Western Balkans to the Mediterranean), as well as towards its most important allies within NATO and the EU. This IAI publication analyses the role of these military capabilities in recent operations and their prospects for the future. In fact, a number of trends can be inferred from the operational experience in ten international missions, in which Italy deployed more than 100 combat aircraft in more than 13,000 sorties, clocking up 36,000 flight hours. These trends are considered in light of the recent developments in the doctrine of Air Power, as well as possible future scenarios for the use of combat aircraft in crisis theaters. The aim of the analysis is to understand the needs of the Italian Armed Forces – the Air Force and Navy in particular – which will have to replace a substantial portion of their current combat fleets in the near future due to the gradual obsolescence of the aircraft in service – an operational necessity linked to the inevitable political decisions regarding the options available in the field of military procurement for maintaining the capabilities required so far for international missions. In this context, the study looks into the acquisition of F-35 aircraft, also considering the industrial aspects of a multinational program that will produce

more than 3,000 units for over 12 countries.

Conceptual Aircraft Design Ajoy Kumar Kundu, Mark A. Price, David Riordan, 2019-01-02 Provides a Comprehensive Introduction to Aircraft Design with an Industrial Approach This book introduces readers to aircraft design, placing great emphasis on industrial practice. It includes worked out design examples for several different classes of aircraft, including Learjet 45, Tucano Turboprop Trainer, BAe Hawk and Airbus A320. It considers performance substantiation and compliance to certification requirements and market specifications of take-off/landing field lengths, initial climb/high speed cruise, turning capability and payload/range. Military requirements are discussed, covering some aspects of combat, as is operating cost estimation methodology, safety considerations, environmental issues, flight deck layout, avionics and more general aircraft systems. The book also includes a chapter on electric aircraft design along with a full range of industry standard aircraft sizing analyses. Split into two parts, Conceptual Aircraft Design: An Industrial Approach spends the first part dealing with the pre-requisite information for configuring aircraft so that readers can make informed decisions when designing vessels. The second part devotes itself to new aircraft concept definition. It also offers additional analyses and design information (e.g., on cost, manufacture, systems, role of CFD, etc.) integral to conceptual design study. The book finishes with an introduction to electric aircraft and futuristic design concepts currently under study. Presents an informative, industrial approach to aircraft design Features design examples for aircraft such as the Learjet 45, Tucano Turboprop Trainer, BAe Hawk, Airbus A320 Includes a full range of industry standard aircraft sizing analyses Looks at several performance substantiation and compliance to certification requirements Discusses the military requirements covering some combat aspects Accompanied by a website hosting supporting material Conceptual Aircraft Design: An Industrial Approach is an excellent resource for those designing and building modern aircraft for commercial, military, and private use.

Aircraft Financing Rob Murphy, 2022-02-24 Aircraft are mainly bought by two groups of buyers: 1. Airlines for their own use 2. Operating lessors for onward leasing to airlines Both groups of buyers require substantial external funding, both debt and equity, to accommodate these purchases. Historically five key sources have funded the aviation industry: 1. bank debt (secured and unsecured) 2. export credit agency guaranteed debt (secured) 3. capital markets (secured and unsecured bonds; equity and debt solutions) 4. internal cash flow generation 5. tax based leasing products This is the leading text providing guidance on all the funding options available, the best way to secure funding and how to ensure that robust legal structures framing the commercial deal are in place. The book is divided into four core sections: Part A: Market Context which sets the scene giving the user market context and an overview of aircraft financing Part B: Transaction structuring which looks at the credit, the asset, the legal structuring and tax drivers Part C: Core Products and Regional Markets (Brazil, Russia, India, China, France, Germany, Spain and Japan) Part D: Regulatory Matters including accounting developments Key updates for the new Fifth Edition include: - New chapters on: - The environment - Restructuring - Compliance - GATS (Global Aircrafts Trading Systems (GATS) - Full explanation and analysis of recent regulatory changes including changes brought about by Basel IV Due to the complexities involved in this area and the need to ensure that any commercial deal is legally sound Aircraft Financing is the essential reference tool for anyone involved in aircraft financing transactions. This title is included in Bloomsbury Professional's Banking and Finance Law online service.

The Early Development of the Aviation Industry Malcolm Abbott, Jill Bamforth, 2019-05-09 The Early Development of the Aviation Industry: Entrepreneurs of the Sky provides an introduction to the world of the early aviation industry and the business endeavours of the original aviators. Many of the first pioneers who flew heavier-than-air planes went on to develop considerable industrial concerns. In doing so they exhibited a number of entrepreneurial qualities, which provide useful case studies for those interested in studying how successful entrepreneurs create or develop opportunities at the inception and emergence of high-tech industries. This book looks at the careers of pioneer aviators in the United States, Britain and France such as A.V. Roe, Thomas Sopwith, Glenn Curtiss and William Boeing. It examines this group of entrepreneurs during the start-up and early development stages of an emerging industry undergoing considerable technological change, and relates this experience to contemporary studies and experiences of entrepreneurship. The book explores what made these men successful in their entrepreneurial endeavours to help promote a better understanding of what makes an entrepreneur and what business and economic conditions are needed to allow such men to be successful. This book makes a major contribution to our knowledge of the development of the twentieth century economy and is essential reading for students and academics who are interested in the development of aviation and the nature of entrepreneurial behaviour.

Best Practice Procurement Andrew Erridge, Ruth Fee, John McIlroy, 2001 This book presents a range of cutting edge perspectives on subjects which are central to improving purchasing performance, including supply chain management, outsourcing and partnership, professional development, IT and e-commerce, and performance evaluation.
