Lessons from Africa Merry M. Merryfield, 1989 Written by 25 African educators from 15 African nations that make up the African Social Studies Programme (ASSP), a Pan-African organization headquartered in Nairobi, Kenya, this document is designed to supplement the sparse material on Africa available in the K-12 curriculum and textbooks in the United States, and these 11 lessons encourage U.S. middle schools to explore, appreciate, and become aware of African culture. The topics of the lessons include: (1) diverse lifestyles; (2) cross-cultural understanding; (3) Ghanaian culture; (4) marriage customs in Liberia, Malawi, and Uganda; (5) Yoruba infant naming ceremonies; (6) cuisine and etiquette in Sierra Leone, Uganda, and Zambia; (7) Swazi culture; (8) family life in Ghana, Tanzania, and Zambia; (9) education in Lesotho; (10) youth employment opportunities in Nigeria; and (11) African perspectives of the United States. Each lesson includes a preview, learning objectives, required resources, teaching procedures, and student activities and exercises. Handouts, drawings, a select bibliography, and lists of U.S. African studies centers, organizations, and publishers are

also included. (DJC)

**Africa** Betty K. Staley, 2017-03 Resource for kindergarten through high school teachers in a variety of topics of African culture for classroom use, Trick Geography Patty Blackmer, 2017-09-13 I can't believe how much I just learned! That was one mom's response after observing a single class session of Trick Geography. Trick Geography: Africa--Teacher Guide (Student Book sold separately) is a simple, yet powerful geography curriculum which routinely moves students from geographic illiteracy to command of African countries, their shapes and capitals, and major bodies of water, mountains, and deserts in about 6 weeks. And all with pleasure and high retention! How does it work? Morocco looks like a maraca, so we trace the dotted outline of a maraca drawn inside the country's border. The capital is Rabat, so we circle a robot (Rabat) shaking the maraca (Morocco). It's THAT easy! Physical features are taught using simple connections. Atlas (Atlas Mountains) builds his muscles by lifting the maraca (Morocco). Delightful graphics, phonetic connectors, dot-to-dots, and fill-in-the-blanks facilitate multiple learning styles and make the process more like a game than a curriculum. Trick Geography is easy enough for elementary students yet sophisticated enough for the high schooler and adult. It is ideal for home or school settings. Teachers appreciate the simple instructions which require virtually no prep time or learning curve and which give students the option of going through the program on their own. Evaluation is a cinch with matching tests which are included. Recommended for

ages 8 to adult. 59 pages. (The Trick Geography: USA and World editions are also available.) [www.TrickGeography.com](http://www.TrickGeography.com)

*Geography Teacher Education and Professionalization* Eyüp Artvinli, Inga Gryl, Jongwon Lee, Jerry T. Mitchell, 2022-11-02 This book focuses on how current and prospective teachers worldwide are prepared for the significant task of teaching geography, given the important role of teachers. It eschews a traditional career-centric framework (pre-service, in-service teaching) in favor of a topical approach toward issues that all teachers face. The book updates thinking on geography education subfields such as GI education and fieldwork and traces important contemporary discourses such as digitalization and sustainability. The book further explains the broad variety of institutionalization of geography teacher education in various political systems. In short, this book collects strategies for geography teacher educators worldwide to provide insight into the challenges, conditions, and solutions present at the classroom and institutional level. As such, this book is a must-have for teacher educators and geography teachers worldwide.

*Critical Thinking Activities Geography--Africa* Jodie Weddle Proctor, 2014-03-01 Sharpen geography students' critical-thinking skills with brain-teasing activities. Parents, students, and teachers will love these fun challenges, puzzles, and logical thinking pages. They're a great way to practice higher-order thinking skills.

Geography of Africa Teacher's Guide Without Common Core Indicators Barbie Heit, Teacher's Guide for PRIME title Geography of Africa (Does Not Contain Common Core Indicators)

*Living History* Godfrey N. Brown, 2022-02-16 Originally published in 1967, this book represents the late Professor Brown's twin skills as historian and as educationalist at their best. It is one of a series of books which he edited, and which was offered to Africa teachers in training. The series was designed to help those who were called upon to teach the many subjects of the primary school curriculum or two or more subjects with the junior forms of secondary schools. It is dedicated to the proposition that giving a good basic education to a country's children is vital to its development programme. Godfrey Brown's book starts with a discussion of the place and purpose of history in education – why do we teach it to children? He then describes methods of teaching language skills in history, observation and (at some length) social development through history. He ends with The History of the Future and two practical appendices listing where the African teacher of history could obtain useful teaching material.

**Teaching Africa** Brandon D. Lundy, Solomon Negash, 2013-05-15 “A valuable resource [with] useful ideas about how to . . . enhance student engagement with the continent, and expand Africa's presence within the curriculum.”  
–Stephen Volz, Kenyon College Teaching Africa introduces innovative

strategies for teaching about Africa. The contributors address misperceptions about Africa and Africans, incorporate the latest technologies of teaching and learning, and give practical advice for creating successful lesson plans, classroom activities, and study abroad programs. Teachers in the humanities, sciences, and social sciences will find helpful hints and tips on how to bridge the knowledge gap and motivate understanding of Africa in a globalizing world.

**Geography Education for Global Understanding** Ali Demirci, Rafael de Miguel González, Sarah Witham Bednarz, 2018-04-26 This book presents the core concepts of geographical education as a means of understanding global issues from a spatial perspective. It treats education, supported by high standards, approaches, methodologies, and resources, as essential in exploring the interactions of the world's human and environmental systems at local, regional, and global scales embedded in the nature of the discipline of geography. It covers topics such as climate change, sustainable development goals, geopolitics in an uncertain world, global crisis, and population flows, which are of great interest to geography researchers and social sciences educators who want to explore the complexity of contemporary societies. Highly respected scholars in geography education answer questions on key topics and explain how global understanding is considered in K-12 education in significant countries around the globe. The book discusses factors such as the Internet, social media, virtual globes and other

technological developments that provide insights into and visualization – in real time – of the intensity of relationships between different countries and regions of the earth. It also examines how this does not always lead to empathy with other political, cultural, social and religious values: terrorism threats and armed conflicts are also essential features of the global world. This book opens the dialogue for global understanding as a great opportunity for teachers, educators, scholars and policy makers to better equip students and future citizens to deal with global issues.

**Schooling for Sustainable Development in Africa** Heila Lotz-Sisitka, Overson Shumba, Justin Lupele, Di Wilmot, 2016-11-11 This book considers the scope and dynamics of Education for Sustainable Development (ESD) and learning in schools in Africa. It explores the conditions and processes that support such learning, and examines how ESD in schooling can improve the quality and relevance of education. The quality of education has been defined

internationally as a key concern for educational institutions around the world, including schools in Africa. The models of quality are often limited to performance-based approaches and/or inclusive approaches. The contributions in this book show that there is more to a discussion on educational quality in Africa than performance success and/or inclusion. The chapters explain how ESD brings a new relevance to education in Africa, and at the same time, sounds the beginning of a new concept of quality education. The volume presents a collection of experiences in creating and supporting quality learning processes through a variety of ESD practices.
