*The Art of War in an Age of Peace* Michael O'Hanlon, 2021 An informed modern plan for post-2020 American foreign policy that avoids the opposing dangers of retrenchment and overextension Russia and China are both believed to have grand strategies--detailed sets of national security goals backed by means, and plans, to pursue them. In the United States, policy makers have tried to articulate similar concepts but have failed to reach a widespread consensus since the Cold War ended. While the United States has been the world's prominent superpower for over a generation, much American thinking has oscillated between the extremes of isolationist agendas versus interventionist and overly assertive ones. Drawing on historical precedents and weighing issues such as Russia's resurgence, China's great rise, North Korea's nuclear machinations, and Middle East turmoil, Michael O'Hanlon presents a well-researched, ethically sound, and politically viable vision for American national security policy. He also proposes complementing the Pentagon's set of 4+1 pre-existing threats with a new 4+1 biological, nuclear, digital, climatic, and internal dangers.

**The Marketing of War in the Age of Neo-Militarism** Kostas Gouliamos, Christos Kassimeris, 2013-05-13 The post-9/11 era and the overall impact of international terrorism have generated much debate regarding the role of military apparatus in modern society. This book assesses the inherent meaning of the militarization from a critical, interdisciplinary perspective. Against the background of democracy and capitalism, *The Marketing of War in the Age of Neo-Militarism* challenges prevailing accounts of the military-industrial complex as it explores significant interrelated themes denoting the accelerating process of militarization of society. Designed to address pressing socio-political phenomena, this book is the first of its genre contesting conventional wisdom about the perceived link between war and the military-industrial complex. It is unique not merely because of its approach, but also for its thorough analysis of deeply affected social institutions and processes such as education, popular culture, geopolitics, military expenditure, space and the environment. Contributing authors advance the discussion by exposing factual information demonstrating the nature and scope of society's militarization. Their analysis is also broadened to encompass key concepts and diverse aspects of the subject matter that provoke a lively debate. The book offers compelling arguments that will be indispensable to scholars, students, professionals, and policy and decision makers with an interest in social and political sciences as well as in other related fields.

The English People at War in the Age of Henry VIII Steven J. Gunn, 2018 War should be recognised as one of the defining features of life in the England of Henry VIII. Henry fought many wars throughout his reign, and this book explores how this came to dominate English culture and shape attitudes to the king and to national history, with people talking and reading about war, and spending money on weaponry and defence.

*War in an Age of Risk* Christopher Coker, 2013-05-08 Wars throughout history have been fought in the name of ideology, religion and the pursuit of peace. Our thinking about war - when it is justified, how it should be fought and how it is perceived - has changed dramatically over time. Whereas in the past war has been seen as a battle of wills, this provocative and illuminating new book shows how war has evolved into an exercise in risk management. In a rare blend of political science, sociology, history and cultural thought, Christopher Coker peels away the layers of meaning shrouding our current understanding of war and warfare. Using the ideas of writers such as Zygmunt Bauman, Ulrich Beck and Frank Furedi, he shows that risk has become the language of business, politics and public policy and so we should not be surprised that it has now become the language of war. The book highlights the increasing difference between homeland security and national security in the modern world, arguing that the defense of the citizen is often now more challenging than the defense of the state. By demonstrating the

changing character and complexity of conflict from World War I to the current the current fight against terrorism, the book provides a powerful and highly distinctive account of the re-branding of war in an age of risk. This book is set to ignite debate amongst students and scholars of international politics as well as appealing to anyone interested in war and its place in contemporary society.

War in an Age of Revolution, 1775-1815 Roger Chickering, Stig Förster, 2010-02-08 The essays in this volume examine the historical place of revolutionary warfare on both sides of the Atlantic, focusing on the degree to which they extended practices common in the eighteenth century or introduced fundamentally new forms of warfare.

**Ashigaru - Samurai Combat in the Age of the Country at War** Matthew Craig, 2012-09-11 Ashigaru is a table-top game designed to replicate the samurai combat that took place during the time of the Sengoku Jidai (Age of the Country at War) through the Tokugawa period of Japan (1500-1650). With these rules, players will be able to simulate the skirmishes that made up the longest period of internal conflict in Japan's history. Full color/60 pages (\*available in hard cover) Includes: Statistics for 26 weapons, 80 Wounded markers, a Painting guide with simple steps to help get new painters started, Scenario section with 4 scenarios.

*The War of 1812 in the Age of Napoleon* Jeremy Black, 2012-11-08 The War of 1812 is etched into American memory with the burning of the Capitol and the White House by British forces, The Star-Spangled Banner, and the decisive naval battle of New Orleans. Now a respected British military historian offers an international perspective on the conflict to better gauge its significance. In *The War of 1812 in the Age of Napoleon*, Jeremy Black provides a dramatic account of the war framed within a wider political and economic context than most American historians have previously considered. In his examination of events both diplomatic and military, Black especially focuses on the actions of the British, for whom the conflict was, he argues, a mere distraction from the Napoleonic War in Europe. Black describes parallels and contrasts to other military operations throughout the world. He stresses the domestic and international links between politics and military conflict; in particular, he describes how American political unease about a powerful executive and strong army undermined U.S. military efforts. He also offers new insights into the war in the West, amphibious operations, the effects of the British blockade, and how the conflict fit into British global strategy. For those who think the War of 1812 is a closed book, this volume brims with observations and insights that better situate this "American" war on the international stage.

*Triumphs in the Age of Civil War* Carsten Hjort Lange, 2016-08-11 Many of the wars of the Late Republic were largely civil conflicts. There was, therefore, a tension between the traditional expectation that triumphs should be celebrated for victories over foreign enemies and the need of the great commanders to give full expression to their prestige and charisma, and to legitimize their power. *Triumphs in the Age of Civil War* rethinks the nature and the character of the phenomenon of civil war during the Late Republic. At the same time it focuses on a key feature of the Roman socio-political order, the triumph, and argues that a commander could in practice expect to triumph after a civil war victory if it could also be represented as being over a foreign enemy, even if the principal opponent was clearly Roman. Significantly, the civil aspect of the war did not have to be denied. Carsten Hjort Lange provides the first study to consider the Roman triumph during the age of civil war, and argues that the idea of civil war as normal reflects the way civil war permeated the politics and society of the Late Roman Republic.

**Theories of War and Peace** Michael E. Brown, Owen R. Cote, Jr., Sean M. Lynn-Jones, Steven E. Miller, 1998-09-15 New approaches to understanding war and peace in the changing international system. What causes war? How can wars be prevented? Scholars and policymakers have sought the answers to these questions for centuries. Although wars continue to occur, recent scholarship has made progress toward developing more sophisticated and perhaps more useful theories on the causes and prevention of war. This volume includes essays by leading scholars on contemporary approaches to understanding war and peace. The essays include expositions, analyses, and critiques of some of the more prominent and enduring explanations of war. Several authors discuss realist theories of war, which focus on the distribution of power and the potential for offensive war. Others examine the prominent hypothesis that the spread of democracy will usher in an era of peace. In light of the apparent increase in nationalism and ethnic conflict, several authors present hypotheses on how nationalism causes war and how such wars can be controlled. Contributors also engage in a vigorous debate on whether international institutions can promote peace. In a section on war and peace in the changing international system, several authors consider whether rising levels of international economic independence and environmental scarcity will influence the likelihood of war.

*Urban Society in an Age of War* Christopher R. Friedrichs, 2014-07-14 Under the premise that local history can illuminate aspects of the past in ways that few works of broad historical synthesis can ever hope to equal, Christopher Friedrichs draws a comprehensive portrait of the small German city of Nördlingen during a turbulent century and a half of early modern history. In doing so he explores the transition from a traditional to a modern way of life. Originally published in 1980. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

*Experiences of War in Europe and the Americas, 1792-1815* Mark Lawrence, 2021-07-20 This work seeks to offer a new way of viewing the French Wars of 1792-1815. Most studies of this period offer international, political, and military analyses using the French Revolution and Napoleon as the prime mover. But this book focuses on military and civilian responses to French Revolutionary and Napoleonic wars, throughout the rest of Europe and the Americas. It shows how the unprecedented mobilization of this era forged a generation of soldiers and civilians sharing a common experience of suffering, bequeathing the West with a new veteran sensibility. Using a range of sources, especially memoirs, this book reveals the adventure and suffering confronting ordinary soldiers campaigning in Europe and the Americas, and the burdens imposed on civilians enduring rising and falling empires across the West. It also reveals how the wars liberated slaves, serfs, and common people through revolutions and insurgencies.

**Age of War** Michael J. Sullivan, 2018-07-03 The epic battle between humankind and their godlike rulers finally ignites in the masterful follow-up to *Age of Myth* and *Age of Swords*. The alliance of humans and renegade Fhrey is fragile—and about to be tested as never before. Persephone keeps the human clans from turning on one another through her iron will and a compassionate heart. The arrogant Fhrey are barely held in check by their leader, Nyphron, who seeks to advance his own nefarious agenda through a loveless marriage that will result in the betrayal of the person Persephone loves most: Raithe, the God Killer. As the Fhrey overlords marshal their army

and sorcerers to crush the rebellion, old loyalties will be challenged while fresh conspiracies will threaten to undo all that Persephone has accomplished. In the darkest hour, when hope is all but lost, new heroes will rise . . . but at what terrible cost? Magic, fantasy, and mythology collide in Michael J. Sullivan's Legends of the First Empire series: AGE OF MYTH • AGE OF SWORDS • AGE OF WAR

**Battling the Elements** Harold A. Winters,2001-03-21 Throughout history, from Kublai Khan's attempted invasions of Japan to Rommel's desert warfare, military operations have succeeded or failed on the ability of commanders to incorporate environmental conditions into their tactics. In *Battling the Elements*, geographer Harold A. Winters and former U.S. Army officers Gerald E. Galloway Jr., William J. Reynolds, and David W. Rhyne, examine the connections between major battles in world history and their geographic components, revealing what role factors such as weather, climate, terrain, soil, and vegetation have played in combat. Each chapter offers a detailed and engaging explanation of a specific environmental factor and then looks at several battles that highlight its effects on military operations. As this cogent analysis of geography and war makes clear, those who know more about the shape, nature, and variability of battleground conditions will always have a better understanding of the nature of combat and at least one significant advantage over a less knowledgeable enemy.

**Signs of Recognition** Webb Keane,2023-09-01 Webb Keane argues that by looking at representations as concrete practices we may find them to be thoroughly entangled in the tensions and hazards of social existence. This book explores the performances and transactions that lie at the heart of public events in contemporary Anakalang, on the Indonesian island of Sumba. Weaving together sharply observed narrative, close analysis of poetic speech and valuable objects, and far-reaching theoretical discussion, *Signs of Recognition* explores the risks endemic in representational practices. An awareness of risk is embedded in the very forms of ritual speech and exchange. The possibilities for failure and slippage reveal people's mutual vulnerabilities and give words and things part of their power. Keane shows how the dilemmas posed by the effort to use and control language and objects are implicated with general problems of power, authority, and agency. He persuades us to look differently at ideas of voice and value. Integrating the analysis of words and things, this book contributes to a wide range of fields, including linguistic anthropology, cultural studies, social theory, and the studies of material culture, art, and political economy.

*Final Report of the Provost Marshall General to the Secretary of War on the Operations of the Selective Service Systems* United States. Provost Marshall General's Office. War Department,1920

*The First Age of Industrial Globalization* Maartje Abbenhuis,Gordon Morrell,2019-10-17 This book offers an accessible and lively survey of the global history of the age of industrialization and globalization that arose in the wake of the Napoleonic Wars and collapsed in the maelstrom of the First World War. Through a combination of industrialization, technological innovation and imperial expansion, the industrializing powers of the world helped to create inter-connected global space that left few regions untouched. In ten concise chapters, this book relays the major shifts in global power, economics and society, outlining the interconnections of global industrial, imperial and economic change for local and regional experiences, identities and politics. It finishes with an exposé on the catastrophic impact of the First World War on this global system. *The First Age of Industrial Globalization* weaves together the histories of industrialization, world economy, imperialism, international law, diplomacy and war, which historians usually treat as separate developments, and integrates them to offer a new analysis of an era of fundamental historical change. It shows that the revolutionary changes in politics, society

and international affairs experienced in the 19th century were inter-connected developments. It is essential reading for any student of modern global history.
