A New Era in Global Health William Rosa, MS, RN, AGPCNP-BC, ACHPN, FCCM, Caritas

Coach, 2017-06-26 Explores the great potential for nursing involvement in promoting global health. This unique text elucidates the relationship between global nursing and global health, underscoring the significance of nurses' contributions in furthering the Post-2015 Agenda of the United Nations regarding global health infrastructures, and examining myriad opportunities for nurses to promote the 17 Sustainable Development Goals (SDGs) and foster health and healthy environments worldwide. While past nursing literature has emphasized nursing's potential involvement and influence in the global arena, this is the first book to identify, validate, and promote nurses' proactive and multidimensional work in furthering current transnational goals for advancing health on a global scale. The book includes an introduction to global health, clarification of terms and roles, perspectives on education, research, and theory related to global nursing, a history of the partnership between the United Nations and the nursing profession, an in-depth exploration of the 17 SDGs and relevant nursing tasks, as well as several chapters on creating a vision for 2030 and beyond. It is based on recent and emerging developments in the transnational nursing community, and establishes, through the writings of esteemed global health and nursing scholars, a holistic dialogue about opportunities for nurses to expand their roles as change agents and leaders in the cross-cultural and global context. The personal reflections of contributors animate such topics as global health ethics, the role of caring in a sustainable world, creating a shared humanity, cultural humility, and many others. Key Features: Examines, for the first time, nursing's role in each of the 17 SDGs Integrates international initiatives delineating nursing's role in the future of global health Creates opportunities for nurses to redefine their contributions to global health Includes personal reflections to broaden perspectives and invite transnational approaches to professional development Distills short, practical, and evidence-based chapters describing global opportunities for nurses in practice, education, and research

Our Common Agenda - Report of the Secretary-General United Nations, 2021-09-10 On the seventy-fifth anniversary of the United Nations, the world has faced its biggest shared test since the Second World War in the coronavirus disease (COVID-19) pandemic. Yet while our welfare, and indeed the permanence of human life, depend on us working together, international cooperation has never been harder to achieve. This report answers a call from UN Member States to provide recommendations to advance our common agenda and to respond to current and future challenges. Its proposals are grounded in a renewal of the social contract, adapted to the challenges of this century,

taking into account younger and future generations, complemented by a new global deal to better protect the global commons and deliver global public goods. Through a deepening of solidarity—at the national level, between generations, and in the multilateral system—Our Common Agenda provides a path forward to a greener, safer and better future.

From Rio+20 to a New Development Agenda Felix Dodds, Jorge Laguna-Celis, Liz

Thompson, 2014-01-21 Twenty years after the United Nations Conference on Environment and Development, The Earth Summit, the Rio+20 conference in 2012 brought life back to sustainable development by putting it at the centre of a new global development partnership, one in which sustainable development is the basis for eradicating poverty, upholding human development and transforming economies. Written by practitioners and participants involved in the multilateral process of negotiations, this book presents a unique insider analysis of not only what happened and why, but also where the outcomes might impact in the future, particularly in the UN development agenda beyond 2015. The book throws light on the changing nature of multilateralism and questions frequent assumptions on how policy is defined within the UN. It shows that Rio+20 was more than an international meeting; it represented a culminating point of decades of successes and failures and a watershed moment for seminal concepts, ideas and partnerships including the Green Economy, zero tolerance on land degradation, the introduction of Sustainable Development Goals, the creation of national measurements of consumption, production and well-being that are intended to go beyond GDP, the introduction of national green accounting and the commitment of billions of dollars for sustainable development partnerships, including Sustainable Energy for All. The authors conclude by mapping out a new agenda for development in 2015, when the current Millennium Development Goals framework is due to expire. An agenda that will restore faith in the UN and inspire a global response to the demographic, economic and environmental challenges that will define our future in the decades to come.

The G20, Development and the UN Agenda 2030 Dries Lesage, Jan Wouters, 2022-12-31 This book offers a unique assessment of the G20's development agenda and its potential to be an impactful actor in the global architecture of development cooperation. Representing two-thirds of the world population, 85 percent of economic output, 75 percent of global trade, and 80 percent of carbon dioxide emissions, the G20 embodies an overwhelming concentration of economic and political power, enhanced through regular meetings of heads of state and government. This position allows it the opportunity to play a significant role in ongoing multilateral policy processes, but also to further

undermine universal development governance at the UN, already challenged by the Bretton Woods institutions, OECD and G8. Providing context and a history of the G20's involvement in development governance, expert international contributors consider the outcome of major conferences, the perspectives of China, India, and the EU, the shift away from positions held by Western countries and the role of civil society. They also offer in-depth analysis of the G20's engagement with issues concerning infrastructure, food and agriculture, taxation, macro-economic policy and the Sustainable Development Goals. The book will be of interest to scholars and students of development, international organisations and global governance.

Agenda 21 Glenn Beck, Harriet Parke, 2012-11-20 When the government comes for her mother, Emmeline embarks on a plan to save her family and expose the truth behind the objectives of the United Nations' agenda 21.

Postcrisis Growth and Development Shahrokh Fardoust, Yongbeom Kim, Claudia Paz Sep lveda, 2010-11-09 Post-crisis Growth and Development lays the groundwork for setting development priorities and advances the discussion among the G20, and non-G20 countries on development policy in infrastructure, trade, food security, financial inclusion, and Millennium Development Goals (MDGs), as they relate to strong, sustainable, and balanced global growth.

G20 Contribution to the 2030 Agenda Progress and Way Forward OECD, United Nations Development Programme, 2019-09-07 As the world's premier forum for international economic co-operation, the G20 plays a critical role in helping to achieve the 2030 Agenda for Sustainable Development. Based on robust evidence and available data, this report examines how the G20's contributions to the global goals across key sectors are already making a difference, while also suggesting where it could go further in leading by example to support the global goals. Collectively, G20 members account for around 85% of global gross domestic product, 75% of world trade and 80% of global carbon dioxide emissions – to name just a few areas of the G20's influence. This report, commissioned by the Government of Japan in support of its 2019 G20 Presidency, takes stock of the G20's progress to date against its Action Plan on the 2030 Agenda for Sustainable Development.

The Eastern Partnership and the 2030 Agenda for Sustainable Development United Nations Development Programme (UNDP), 2020-10-31 The EaP is a joint policy initiative that aims to deepen and strengthen relations between the EU, its Member States and the post-Soviet nations of Armenia, Azerbaijan, Belarus, Georgia, Moldova and Ukraine. This policy initiative was meant to complement and strengthen the Eastern dimension of the European Neighbourhood Policy. To introduce some level of coherence in their relationship with the EaP partner countries the '20 Deliverables for 2020', was first published on 15 December 2016. This report focuses primarily on the 20 Deliverables for 2020 because the sectoral areas included can be considered in relation to the UN 2030 Agenda for Sustainable Development. As all member states of the EU and the six countries covered by the EaP are committed to the 2030 Agenda, the report considers the contributions and opportunities presented by 20 for 2020 as mutually reinforcing. The report is intended to offer strategic insights about the political framing of the SDGs in those countries covered by the EaP and an analysis of common development challenges. It explores some long-term challenges around economic growth, demography and the environment; and assesses the status of SDG implementation in each country. It then offers

some priority areas that governments and development partners can focus on to increase the transformative potential of their policies and investments.

An Immodest Agenda Amitai Etzioni,1983

The Green Agenda in American Politics Robert J. Duffy,2003 Organizations such as the Sierra Club and Friends of the Earth are familiar to anyone with an interest in environmental protection. As activist groups, they played by the same rules for years. But in 1994, the rules changed. With the Republican takeover of Congress, environmental groups faced sweeping changes in federal policies that threatened the enforcement of environmental laws. As these organizations intensified their efforts to meet these challenges, they also altered their electoral strategies and political spending patterns. This book traces those actions and shows what they mean for the future of environmentalism in the political arena. While environmental advocacy groups have become bigger and better funded in recent years, so have the corporate interests that compete with them for the attention of public and politicians. *The Green Agenda in American Politics* offers a new look at environmental advocacy that focuses on contemporary lobbying, electioneering, and agenda setting in this new context. Drawing on interviews with activists from a wide range of organizations, Robert Duffy describes what environmental groups actually do when lobbying officials or the public. He examines activity at both national and state levels to emphasize their growing use of websites, email, and action alert networks to conduct more sophisticated grassroots campaigns, and he shows how they are devoting more funds to unregulated forms of spending such as independent expenditure, issue advocacy advertising, and public education campaigns. Duffy also tracks emerging trends in interest group politics and provides an overview of activism through the early 1990s. He then documents the emergence of more aggressive action after 1994, such as providing campaign services to candidates and mounting voter registration drives. He also shows how state and local groups have begun to play more important roles in the wake of the rollback of federal environmental regulations. Brimming with new insights into interest group lobbies in general and contemporary environmental groups in particular, Duffy's book opens a new window on the influence of Big Money in the supposedly democratic electoral process.

Winning the '20s Martin Reeves,Kevin Whitaker,2021-05-10 Over the past decade, businesses have faced relentless change on multiple dimensions, and the list of the world's largest companies has changed enormously. The keys to success are likely to be just as different for the new decade. *Winning the '20s* analyzes the new competitive environment that businesses face and outlines what will it take to win in the 2020s. To stay ahead of the trends that are reshaping business, leaders need

to rethink existing assumptions and retool their companies. Both traditional incumbents and younger digital giants will face very different but equally critical challenges in the 2020s—and would do well to learn from each other's strengths. This book discusses the new dimensions of competition that will affect corporate strategy in the next decade and how leaders can reinvent their organizations to be better suited for the new environment. The companies that succeed in the 2020s will look very different than they do today—they will have evolved their businesses to harness new technologies and reshaped their external relationships, organizations, and approaches accordingly. Winning the '20s will help business professionals as well as academics and students with an interest in strategy and leadership answer this critical question for the start of this decade: How should you prepare your company to avoid being left behind and emerge as a winner in a rapidly evolving business landscape?

The G20 Development Agenda Parthasarathi Shome, 2016-03-14 This book focuses on major development themes in the G20's agenda in the provision of global public goods.

Agenda 21 United Nations, 2013-03-03 Agenda 21 is a non-binding, voluntarily implemented action plan of the United Nations with regard to sustainable development. It is a product of the UN Conference on Environment and Development (UNCED) held in Rio de Janeiro, Brazil, in 1992. Its purpose is an action agenda for the UN, other multilateral organizations, and individual governments around the world that can be executed at local, national, and global levels. The 21 in Agenda 21 refers to the 21st century.

Urban Future 21 Peter Hall, Ulrich Pfeiffer, 2013-09-13 Prepared for the World Commission on Twenty-First Century Urbanization Conference in Berlin in July 2000. This book is an entirely new and comprehensive review of the state of world urban development at the millennium and a forecast of the main issues that will dominate urban debates in the next 25 years. It is the most significant book on cities and city planning problems to appear for many years.

Hispanics in the United States Pastora San Juan Cafferty, David Wells Engstrom, Hispanics in the United States represents a collective exploration providing a basic foundation of the information available to understand Hispanics in the United States and create an effective policy agenda. Hispanics are projected to be the largest minority group in the United States in the twenty-first century. The contributions define an agenda which will be useful for students, scholars, service practitioners, political activists, as well as policy makers. The opening essays define the diversity of the Hispanic experience in America and put each of the other essays within a larger context. This edition adds a new introduction by the editors incorporating and evaluating the implications of the results of the

national 2000 census. The book is organized into two sections: the first establishes the historical, demographic, religious, and cultural context of Hispanics in the United States. The second describes the major issues facing this population in the American social structure, specifically the areas of health care, the labor market, criminal justice, social welfare, and education. The work concludes with a discussion of the role played by Hispanics in the political life of the nation. The contributors, all of whom are scholars with demonstrated competence in the areas, include: Teresa A. Sullivan, David Maldonado, Melissa Roderick, Barry Chiswick, Michael Hurst, Zulema Suarez, Alvin Korte, Katie McDonough, Cruz Reynoso, and Christine Marie Sierra, as well as David Engstrom and Pastora San Juan Cafferty. Together they have produced a book which will be extremely useful to anyone developing public policies and creating social interventions at either the national or local levels during the coming decade. This new edition is a valuable contributor to discussions about the issues defining the population that will be the largest minority group in the United States in this century. Pastora San Juan Cafferty is professor, in the School of Social Service Administration, and a member of the Center for Latin America Studies at the University of Chicago. She is co-author of the *Dilemma of American Immigration: Beyond the Golden Door* and *The Politics of Language*. She has written extensively on issues of race and ethnicity in America. David W. Engstrom is associate professor in the school of social work at San Diego State University and the author of *Presidential Decision Making Adrift*. He has published in the areas of immigration, health care, and program evaluation.

Envisioning the Agenda for Water Resources Research in the Twenty-First Century National Research Council, Division on Earth and Life Studies, Water Science and Technology Board, 2001-07-05

In this century, the United States will be challenged to provide sufficient quantities of high-quality water to its growing population. Water is a limiting resource for human well-being and social development, and projections of population growth as well as changing social values suggest that demands for this resource will increase significantly. These projections have fueled concerns among the public and water resources professionals alike about the adequacy of future water supplies, the sustainability and restoration of aquatic ecosystems, and the viability of our current water resource research programs and our institutional and physical water resource infrastructures. With the goal of outlining a roadmap to guide policymakers, the Water Science and Technology Board (WSTB) held a series of discussions at several of its meetings in 1998-2000 about the future of the nation's water resources and the appropriate research needed to achieve their long-term sustainability. From those discussions, the board produced this report, the objectives of which are to: draw attention to the urgency and

complexity of water resources issues facing the United States in the twenty-first century; broadly inform decision makers, researchers, and the public about these issues and challenges; identify needed knowledge and corresponding water resources research areas that should be emphasized immediately and over the long term; and describe ways in which the setting of the water research agenda, the conduct of water research, and investments devoted to such research should be improved in the next few decades. This report discusses major research questions related to the critical water issues that face the nation. It lays out an interdisciplinary research portfolio for the next 20 years and recommends agenda-setting processes that can maximize the nation's ability to prioritize and conduct water resources research.

Hijacking the Agenda Christopher Witko,Jana Morgan,Nathan J. Kelly,Peter K. Enns,2021-05-25 Why are the economic interests and priorities of lower- and middle-class Americans so often ignored by the U.S. Congress, while the economic interests of the wealthiest are prioritized, often resulting in policies favorable to their interests? In *Hijacking the Agenda*, political scientists Christopher Witko, Jana Morgan, Nathan J. Kelly, and Peter K. Enns examine why Congress privileges the concerns of businesses and the wealthy over those of average Americans. They go beyond demonstrating that such economic bias exists to illuminate precisely how and why economic policy is so often skewed in favor of the rich. The authors analyze over 20 years of floor speeches by several hundred members of Congress to examine the influence of campaign contributions on how the national economic agenda is

set in Congress. They find that legislators who received more money from business and professional associations were more likely to discuss the deficit and other upper-class priorities, while those who received more money from unions were more likely to discuss issues important to lower- and middle-class constituents, such as economic inequality and wages. This attention imbalance matters because issues discussed in Congress receive more direct legislative action, such as bill introductions and committee hearings. While unions use campaign contributions to push back against wealthy interests, spending by the wealthy dwarfs that of unions. The authors use case studies analyzing financial regulation and the minimum wage to demonstrate how the financial influence of the wealthy enables them to advance their economic agenda. In each case, the authors examine the balance of structural power, or the power that comes from a person or company's position in the economy, and kinetic power, the power that comes from the ability to mobilize organizational and financial resources in the policy process. The authors show how big business uses its structural power and resources to effect policy change in Congress, as when the financial industry sought deregulation in the late 1990s, resulting in the passage of a bill eviscerating New Deal financial regulations. Likewise, when business interests want to preserve the policy status quo, it uses its power to keep issues off of the agenda, as when inflation eats into the minimum wage and its declining purchasing power leaves low-wage workers in poverty. Although groups representing lower- and middle-class interests, particularly unions, can use their resources to shape policy responses if conditions are right, they lack structural power and suffer significant resource disadvantages. As a result, wealthy interests have the upper hand in shaping the policy process, simply due to their pivotal position in the economy and the resulting perception that policies beneficial to business are beneficial for everyone. *Hijacking the Agenda* is an illuminating account of the way economic power operates through the congressional agenda and policy process to privilege the interests of the wealthy and marks a major step forward in our understanding of the politics of inequality.
