Cultural Organizations, Networks and Mediators in Contemporary Ibero-America Diana Roig-Sanz,Jaume Subirana,2020-01-03 This book proposes an innovative conceptual framework to explore cultural organizations at a multilateral level and cultural mediators as key figures in cultural and institutionalization processes. Specifically, it analyzes the role of Ibero-American mediators in the institutionalization of Hispanic and Lusophone cultures in the first half of the 20th century by means of two institutional networks: PEN (the non-governmental writer's association) and the International Institute of Intellectual Cooperation (predecessor to UNESCO). Attempting to combine cultural and global history, sociology, and literary studies, the book uses an analytical focus on intercultural networks and cultural transfer to investigate the multiple activities and roles that these mediators and cultural organizations set in motion. Literature has traditionally studied major figures and important centers of cultural production, but other regions and localities also played a crucial role in the development of intellectual cooperation. This book reappraises the place of Ibero-America in international cultural relations and retrieves the lost history of key secondary actors. The book will appeal to scholars from international relations, global and cultural history, sociology, postcolonial Studies, world and comparative literature, and New Hispanisms. American Catholics in the Protestant Imagination Michael P. Carroll,2007-11-12 Michael P. Carroll argues that the academic study of religion in the United States continues to be shaped by a Protestant imagination that has warped our perception of the American religious experience and its written history and analysis. In this provocative study, Carroll explores a number of historiographical puzzles that emerge from the American Catholic story as it has been understood through the Protestant tradition. Reexamining the experience of Catholicism among Irish immigrants, Italian Americans, Acadians and Cajuns, and Hispanics, Carroll debunks the myths that have informed much of this history. Shedding new light on lived religion in America, Carroll moves an entire academic field in new, exciting directions and challenges his fellow scholars to open their minds and eyes to develop fresh interpretations of American religious history.

Transgender Marxism Jules Joanne Gleeson,Elle O'Rourke,2021-05-20 Transgender Marxism is the first volume of its kind, offering a provocative and groundbreaking synthesis of transgender studies and Marxist theory.Reflecting on the relations between gender and labour, it shows how these linked phenomena structure antagonisms in particular social and historical situations. While no one is spared gendered conditioning, the contributors argue that transgender people nonetheless face particular pressures, oppressions and state persecution. The collection makes a particular contribution to Marxist feminism and social reproduction theory, through both personal and analytic examinations of the social activity demanded of trans people around the world.Exploring trans lives and movements through a Marxist lens, the book also assesses the particular experience of surviving as trans in light of the totality of gendered experience under capitalism. Twinning Marxism with other schools of thought - including psychoanalysis, phenomenology and Butlerian performativity - Transgender Marxism ultimately offers an insight into transgender experience, and an exciting renewal of Marxist theory itself.

Peace Psychology in Asia Cristina Jayme Montiel,Noraini M. Noor,2009-06-04 In recent years, peace psychology has grown from a utopian idea to a means of transforming societies worldwide. Yet at the same time peacebuilding enjoys global appeal, the diversity of nations and regions demands interventions reflecting local cultures and realities. Peace Psychology in Asia shows this process in action, emphasizing concepts and methods diverging from those common to the US and Europe. Using examples from China, India, Indonesia, the Philippines, and elsewhere in the region, chapter authors illuminate the complex social, political, and religious conditions that have fostered war, colonialism, dictatorships, and ethnic strife, and the equally intricate personal and collective psychologies that need to be developed to encourage reconciliation, forgiveness, justice, and community. Peace Psychology in Asia: Integrates psychology, history, political science, and local culture into concepts of peace and reconciliation. Highlights the indigenous aspects of peace psychology. Explains the critical relevance of local culture and history in peace work. Blends innovative theoretical material with empirical evidence supporting peace interventions. Balances its coverage among local, national, regional, and global contexts. Analyzes the potential of Asia as a model for world peace. As practice-driven as it is intellectually stimulating, Peace Psychology in Asia is vital reading for social and community psychologists, policy analysts, and researchers in psychology and sociology and international studies, including those looking to the region for ideas on peace work in non-Western countries.

The Autofictional Alexandra Effe,Hannie Lawlor,2022-01-03 This open access book offers innovative and wide-ranging responses to the continuously flourishing literary phenomenon of autofiction. The book shows the insights that are gained in the shift from the genre descriptor to the adjective, and from a broad application of "the autofictional" as a theoretical lens and aesthetic strategy. In three sections on "Approaches," "Affordances," and "Forms," the volume proposes new theoretical approaches for the study of autofiction and the autofictional, offers fresh perspectives on many of the prominent authors in the discussion, draws them into a dialogue with autofictional practice from across the globe, and brings into view texts, forms, and media that have not traditionally been considered for their autofictional dimensions. The book, in sum, expands the parameters of research on autofiction to date to allow new voices and viewpoints to emerge.

Interdisciplinary Perspectives on Consciousness and the Self Sangeetha Menon,Anindya Sinha,B. V. Sreekantan,2013-12-12 This book brings together ancient spiritual wisdom and modern science and philosophy to address age-old questions regarding our existence, free will and the nature of conscious awareness. Stuart Hameroff MD Professor, Anesthesiology and Psychology, and Director, Center for Consciousness Studies The University of Arizona, Tucson, Arizona This book presents a rich, broad-ranging overview of contemporary research and scholarship into consciousness and the self.... It is ... to their credit that the editors have assembled a highly stimulating set of scholars whose expertise cover all the relevant areas. I strongly recommend the book to anyone with an interest in understanding the directions in which contemporary thinking about the nature of consciousness is headed. B. Les Lancaster Emeritus Professor of Transpersonal Psychology Liverpool John Moores University, UK This volume is a collection of 23 essays that contribute to the emerging discipline of consciousness studies with particular focus on the concept of the self. The essays together argue that to understand consciousness is to understand the self that beholds consciousness. Two broad issues are addressed in the

volume: the place of the self in the lives of humans and nonhuman primates; and the interrelations between the self and consciousness, which contribute to the understanding of cognitive functions, awareness, free will, nature of reality, and the complex experiential and behavioural attributes of consciousness. The book presents cutting-edge and original work from well-known authors and scholars of philosophy, psychiatry, behavioural sciences and physics. This is a pioneering attempt to present to the reader multiple ways of conceptualizing and thus understanding the relation between consciousness and self in a nuanced manner.

Preventing Dementia? Annette Leiba, Silke Schicktanz, 2020-10-06 The conceptualization of dementia has changed dramatically in recent years with the claim that, through early detection and by controlling several risk factors, a prevention of dementia is possible. Although encouraging and providing hope against this feared condition, this claim is open to scrutiny. This volume looks at how this new conceptualization ignores many of the factors which influence a dementia sufferer's prognosis, including their history with education, food and exercise as well as their living in different epistemic cultures. The central aim is to question the concept of prevention and analyze its impact on aging people and aging societies.

Genocide Perspectives: Essays on Holocaust and genocide, 1997

The Cambridge Handbook of Sociocultural Psychology Jaan Valsiner, Alberto Rosa, 2007-06-04 This book, first published in 2007, is an international overview of the state of our knowledge in sociocultural psychology - as a discipline located at the crossroads between the natural and social sciences and the humanities. Since the 1980s, the field of psychology has encountered the growth of a new discipline - cultural psychology - that has built new connections between psychology, sociology, anthropology, history and semiotics. The handbook integrates contributions of sociocultural specialists from fifteen countries, all tied together by the unifying focus on the role of sign systems in human relations with the environment. It emphasizes theoretical and methodological discussions on the cultural nature of human psychological phenomena, moving on to show how meaning is a natural feature of action and how it eventually produces conventional symbols for communication. Such symbols shape individual experiences and create the conditions for consciousness and the self to emerge; turn social norms into ethics; and set history into motion.

Rural Resistance in South Africa Themba Kepe, Lungisile Ntsebeza, 2011-11-04 Drawing on scholarship from multiple disciplines, this volume presents a fresh understanding of the Mpondo uprising in South Africa; focusing on its meanings and significance in relation to land, rural governance, politics and the agency of the marginalized.

Strategic Imaginations Anke Gilleir, Aude Defurne, 2020-12-15 Imaginations of female rule and the imaginative strategies of women rulers What is the gender of political power? What happens to the history of sovereignty when we reconsider it from a gender perspective? Political sovereignty has been a major theme in European thought from the very beginning of intellectual reflection on community. Philosophy and political theory, historiography, theology, and literature and the arts have, often in dialogue with one another, sought to represent or recalibrate notions of rule. Yet whatever covenant was imagined, sovereign rule has consistently been figured as a male prerogative. While in-depth studies of historical women rulers have proliferated in the past decades, these have not systematically explored how all women rulers throughout the entirety of European culture have had to operate in a context that could not think power as female - except in grotesque terms. *Strategic Imaginations* demonstrates that this constitutive tension can only be brought out by studying women's political rule in a comparative and longue durée manner. The book offers a collection of essays that brings together studies of female sovereignty from the Polish-Lithuanian to the British Commonwealth, and from the Middle Ages to the genesis of modern democracy. It addresses historical figures and takes stock of the rich yet unsettling imagination of female rule in philosophy, literature and art history. For all the variety of geographical, social, and historical contexts it engages, the book reveals surprising resonances between the strategies women rulers used and the images and practices they adopted in the context of an all-pervasive skepticism toward female rule.

Critical Analysis of Organizations Catherine Casey, 2002-01-23 'Catherine Casey has written an excellent book that provides a lucid and comprehensive critical analysis of organizations....[It] extends in reach and relevance beyond the specific field of organization studies and the sociology of organizations to encompass broader intellectual developments that have had a significant impact on contemporary sociology and cultural studies' - Barry Smart, Professor of Sociology, University of Portsmouth 'I anticipate that it will prove to be an attractive book in organization studies, industrial sociology and general sociology. I am sure that this will be a book that will make a major impact' - Mike Reed, Professor of Organization Theory, Lancaster University In this comprehensive and scholarly book, the essential critical strands in organizational analysis are explained. It examines how central traditions have realigned in relation to the challenge of postmodernism and the new reflexive turn in organizational studies. Judicious, innovative and written with the needs of students in mind, this book offers a renewed and revitalized critical accent in organization studies - one that focuses on existing and emerging social tendencies, contestations and struggles. It will be essential reading for senior students of organization studies and sociology.

Multi-systemic Resilience Michael Ungar, 2021 Across diverse disciplines, the term resilience is appearing more and more often. However, while each discipline has developed theory and models to explain the resilience of the systems they study (e.g., a natural environment, a community post-disaster, the human mind, a computer network, or the economy), there is a lack of over-arching theory that describes: 1) whether the principles that underpin the resilience of one system are similar or different from the principles that govern resilience of other systems; 2) whether the resilience of one system affects the resilience of other co-occurring systems; and 3) whether a better understanding of resilience can inform the design of interventions, programs and policies that address wicked problems that are too complex to solve by changing one system at a time? In other words (and as only one example among many) are there similarities between how a person builds and sustains psychological resilience and how a forest, community or the business where he or she works remains successful and sustainable during periods of extreme adversity?

Does psychological resilience in a human being influence the resilience of the forests (through a change in attitude towards conservation), community (through a healthy tolerance for differences) and businesses (by helping a workforce perform better) with which a person interacts? And finally, does this understanding of resilience help build better social and physical ecologies that support individual mental health, a sustainable environment and a successful economy at the same time?--

Fanged Noumena Nick Land,2011-04-01 A dizzying trip through the mind(s) of the provocative and influential thinker Nick Land. During the 1990s British philosopher Nick Land's unique work, variously described as "rabid nihilism," "mad black deleuzianism," and "cybergothic," developed perhaps the only rigorous and culturally-engaged escape route out of the malaise of "continental philosophy" —a route that was implacably blocked by the academy. However, Land's work has continued to exert an influence, both through the British "speculative realist" philosophers who studied with him, and through the many cultural producers—writers, artists, musicians, filmmakers—who have been invigorated by his uncompromising and abrasive philosophical vision. Beginning with Land's early radical rereadings of Heidegger, Nietzsche, Kant and Bataille, the volume collects together the papers, talks and articles of the mid-90s—long the subject of rumour and vague legend (including some work which has never previously appeared in print)—in which Land developed his futuristic theory-fiction of cybercapitalism gone amok; and ends with his enigmatic later writings in which Ballardian fictions, poetics, cryptography, anthropology, grammatology and the occult are smeared into unrecognisable hybrids. *Fanged Noumena* gives a dizzying perspective on the entire trajectory of this provocative and influential thinker's work, and has introduced his unique voice to a new generation of readers.

Design Thinking Research Christoph Meinel,Larry Leifer,2021-03-26 Extensive research conducted by the Hasso Plattner Design Thinking Research Program at Stanford University in Palo Alto, California, USA, and the Hasso Plattner Institute in Potsdam, Germany, has yielded valuable insights on why and how design thinking works. The participating researchers have identified metrics, developed models, and conducted studies, which are featured in this book, and in the previous volumes of this series. This volume provides readers with tools to bridge the gap between research and practice in design thinking with varied real world examples. Several different approaches to design thinking are presented in this volume. Acquired frameworks are leveraged to understand design thinking team dynamics. The contributing authors lead the reader through new approaches and application fields and show that design thinking can tap the potential of digital technologies in a human-centered way. In a final section, new ideas in neurodesign at Stanford University and at Hasso Plattner Institute in Potsdam are elaborated upon thereby challenging the reader to consider newly developed methodologies and provide discussion of how these insights can be applied to various sectors. Special emphasis is placed on understanding the mechanisms underlying design thinking at the individual and team levels. Design thinking can be learned. It has a methodology that can be observed across multiple settings and accordingly, the reader can adopt new frameworks to modify and update existing practice. The research outcomes compiled in this book are intended to inform and provide inspiration for all those seeking to drive innovation – be they experienced design thinkers or newcomers.

Experiments With People Robert P. Abelson,Kurt P. Frey,Aiden P. Gregg,2014-04-04 *Experiments With People* showcases 28 intriguing studies that have significantly advanced our understanding of human thought and social behavior. These studies, mostly laboratory experiments, shed light on the irrationality of everyday thinking, the cruelty and indifference of 'ordinary' people, the operation of the unconscious mind, and the intimate bond between the self and others. This book tells the inside story of how social psychological research gets done and why it matters. Each chapter focuses on the details and implications of a single study, but cites related research and real-life examples. All chapters are self-contained, allowing them to be read in any order. Each chapter is divided into: *Background--provides the rationale for the study; *What They Did--outlines the design and procedure used; *What They Found--summarizes the results obtained; *So What?--articulates the significance of those results; *Afterthoughts--explores the broader issues raised by the study; and *Revelation--encapsulates the 'take-home message' of each chapter. This paperback is ideal as a main or supplementary text for courses in social psychology, introductory psychology, or research design.

The Catalyzing Mind Kenneth R. Cabell,Jaan Valsiner,2013-11-11 How do we understand and explain phenomena in psychology? What does the concept of "causality" mean when we discuss higher psychological functions and behavior? Is it possible to generate "laws" in a psychological and behavioral science—laws that go beyond statistical regularities, frequencies, and probabilities? An international group of authors compare and contrast the use of a causal model in psychology with a newer model—the catalytic model. *The Catalyzing Mind: Beyond Models of Causality* proposes an approach to the qualitative nature of psychological phenomena that focuses on the psychological significance and meaning of conditions, contexts, and situations as well as their sign-mediating processes. Contributors develop, apply, and criticize the notion of a catalyzing mind in hopes of achieving conceptual clarity and rigor. Disciplines such as philosophy, psychology, semiotics and biosemiotics are used for an interdisciplinary approach to the book. Research topics such as history and national identity, immigration, and transitions to adulthood are all brought into a dialogue with the concept of the catalyzing mind. With a variety of disciplines, theoretical concepts, and research topics this book is a collective effort at an approach to move beyond models of causality for explaining and understanding psychological phenomena.

Darwin's Conjecture Geoffrey M. Hodgson,Thorbjørn Knudsen,2010-12 A theoretical study dealing chiefly with matters of definition and clarification of terms and concepts involved in using Darwinian notions to model social phenomena.

Thank You for Dying for Our Country Chaim Noy,2015 Combining ethnographic, semiotic, and performative approaches, this book examines texts and accompanying acts of writing of national commemoration. The commemorative visitor book is viewed as a mobilized stage, a communication medium, where visitors' public performances are presented, and where acts of participation are authored and composed. The study contextualizes the visitor book within the material and ideological environment where it is positioned and where it functions. The semiotics of commemoration are mirrored in the visitor book, which functions as a participatory platform that becomes an extension of the commemorative spaces in the museum. The study addresses tourists' and visitors' texts, i.e. the commemorative entries in the book, which are succinct dialogical utterances. Through these public performances, individuals and groups of visitors align and affiliate with a larger imagined national community. Reading the entries allows a unique perspective on communication practices and processes, and vividly illustrates such concepts as genre, voice, addressivity, indexicality, and the very acts of writing and reading. The book's many entries tell stories of affirming, but also resisting the narrative tenets of Zionist national identity, and

they illustrate the politics of gender and ethnicity in Israel society. The book presents many ethnographic observations and interviews, which were done both with the management of the site (Ammunition Hill National Memorial Site), and with the visitors themselves. The observations shed light on processes and practices involved in writing and reading, and on how visitors decide on what to write and how they collaborate on drafting their entries. The interviews with the site's management also illuminate the commemoration projects, and how museums and exhibitions are staged and managed.
